This is what happens when you have muscle-car heritage coursing through your veins. You get modern-day marvels that are engineered with more passion, precision and performance than ever before. This is the Brand that boasts both style and power, and never makes you choose between the two. With more than 100 years under their belt, each vehicle in the 2017 Dodge lineup pays homage

to its iconic bloodline with award-winning features and superior craftsmanship. The snarling engines and sleek exteriors of each vehicle beg to be taken out on the open road. The Dodge name continues to live on with the same determination that the Dodge brothers had when first creating the Brand. It's time to put the pedal to the metal and live fast. **HERE'S TO THE NEXT GENERATION OF INNOVATION.**

2017 DODGE CHALLENGER

*IF YOU KNOW.
YOU KNOW.*

It's an enigma. Nothing has changed. Everything has changed. The name and its signature styling continue to turn diehards on while the latest technology and modern mechanics give this legend the chops to uphold the weight of its storied reputation. It's a paragon of muscle, outfitted with intense handling dynamics and leading-edge components that transfer hard-core power to the road. This is Dodge Challenger — equal parts icon and modern-day performance machine. The golden age of muscle is now.

RINGS OF FIRE

The Challenger looks intimidating. And it should, considering what's lurking under its sleek sheet metal. But this modern beast is equally as fierce on the outside. The menacing projector headlamps with quad halo LED surrounds are a throwback to the famed '71. Challenger also gives other drivers a breathtaking parting shot — bold, seamless, split LED taillamps. Their design nods to the past while projecting a contemporary appearance.

A TRUE CLASSIC NEVER GOES OUT OF STYLE — it just gets better over time. Challenger has kept pace by melding retro styling with amped-up attitude. It starts with menacing projector headlamps with quad halo LED surrounds, a heritage split grille surround, and the hood's power-bulge and functional inlets. Walk around this legend and you'll find it looks as intimidating from the rear as it does from the front. Challenger T/A takes retro to a new

level with Satin Black body graphics, premium-painted Satin Black Mopar® Induction Hood, Satin Black rear spoiler with T/A graphics, T/A illuminated air catcher headlamps, Satin Black wrapped roof and decklid, Lightweight Forged Aluminum wheels and more. T/A 392 models also boast new 20x9.5-inch wheels wrapped in Pirelli® tires and six-piston Brembo® brakes.

////// Challenger T/A shown in Green Go*. *Late availability.

FEELS LIKE FRIDAY

////// Challenger T/A interior shown.

THE NEW CHALLENGER T/A // Open the door and the heritage inspired Houndstooth cloth seats or the available Black Nappa leather trim with Alcantara® suede seats might make you feel like you've unlocked a portal to the golden age of muscle. The Gloss Black cluster bezel or the White-face instrument cluster might seem like the focus of the Challenger T/A interior, but they're not. No, the most important element of this cockpit is the driver. Front performance seats feature comfortable contours and large side bolsters help provide maximum lateral support. The leather performance steering wheel with vehicle control buttons and bright pedals helps you handle the road with ease.

Every Challenger model gives full bragging rights with must-have features like a heritage-inspired shifter, Tic-Toc-Tach gauges, premium soft-touch materials and available Dodge Performance Pages. Challenger also makes room for everyone with seating for five adults.

//// Challenger T/A shown with available Black Nappa leather trim with Alcantara suede inserts and embroidered Silver logo.

The only thing retro is the atmosphere — the tech is purely 21st-century. Challenger offers plenty of savvy features, including a seven-inch reconfigurable digital gauge cluster. Buttons on the steering wheel let you scan through hundreds of different vehicle configurations and customize what information you see and how you see it.

////// Engineered with technology, Uconnect® brings a range of communication and entertainment services directly to your Challenger. Depending on your trim level and options, this system includes a touchscreen display up to 8.4 inches and steering wheel-mounted controls that operate features like a Bluetooth® enabled phone, Integrated Voice Command^{[1]*} navigation, radio, cruise control and more.

APPLE CARPLAY™^[2] A smarter, safer way to use an iPhone® inside your vehicle and seamlessly integrate it with the Uconnect touchscreen and Siri® voice control. You can make calls, access music, send and receive messages, get directions optimized for traffic conditions and more, while staying focused on the road.

ANDROID AUTO™^[2] Automatically provides a safer way to use Android while driving. Share information while you easily access the best of Google: maps with voice-guided navigation and play music, place phone calls or send and receive messages^[3] and ask Google search any question by voice command^[1]

EFFICIENCY IS A

MUSCLE

30

////// UP TO 30 MPG*

////// **3.6L DOHC PENTASTAR® VARIABLE VALVE TIMING (VVT) 24V V6 WITH 305 HP AND 30 MPG HWY.*** This robust 3.6-liter V6 delivers 305 horsepower, an estimated six-second 0 – 60 time and up to 30 mpg highway.* It's the combination of a TorqueFlite® eight-speed transmission, fully independent dual-cam phasing, sequential port fuel injection, and high-flow intake and exhaust ports that result in this exceptional blend of high torque and fuel efficiency.

////// **5.7L HEMI® V8 WITH UP TO 375 HP, 410 LB-FT OF TORQUE AND 25 MPG HWY.†** Pair the 5.7-liter HEMI V8 with a standard TREMEC® six-speed manual (375 hp, 410 lb-ft of torque) and it takes you from 0 – 60 mph in the low five-second range. When equipped with the TorqueFlite eight-speed automatic (372 hp, 400 lb-ft of torque) and Fuel Saver Technology, eight cylinders transition to four when full power is not required to help provide an increase in fuel efficiency.

////// **392 HEMI V8, 485 HP, 475 LB-FT OF TORQUE AND UP TO 25 MPG HWY.‡** The available HEMI V8 delivers a performance feast — 485 horsepower, 475 lb-ft of torque, an impressively flat torque curve and a 0 – 60 time in the mid four-second range. When equipped with the TorqueFlite eight-speed, Fuel Saver Technology deactivates four cylinders if eight are not needed, creating a double threat of power and efficiency.

*2016 EPA estimated 19 mpg city/30 mpg highway with 3.6-liter engine and eight-speed automatic transmission. Actual mileage may vary.

†2016 EPA estimated 16 mpg city/25 mpg highway when equipped with automatic transmission. Actual mileage may vary. ‡2016 EPA estimated 15 mpg city/25 mpg highway. Actual mileage may vary.

TRACK-PROVEN TUNED CHASSIS // High-demanding track conditions require tightly engineered hardware. Challenger R/T Scat Pack and 392 HEMI® Scat Pack Shaker showcase a high-performance tuned chassis that's ready to go.

SHOCK ABSORBERS // Bilstein® high-performance shock absorbers are precision-damped to help provide a confident, smooth ride for the everyday commute while being capable for weekend track duty.

SUSPENSION // Options range from Sport-tuned to high-performance to the top-of-the-line competition suspension featuring adaptive damping. A bold combination of movement and staying power comes from a sophisticated suspension geometry and rear-wheel drive. Whether it's the everyday commute or more challenging driving situations, the independent five-link rear suspension is finely tuned to help provide superior handling and a comfortable ride. When the rubber meets the road, a lower unsprung mass helps maintain better tire contact with the ground and reduces road noise. Models equipped with a 392 HEMI V8 feature unique suspension geometry that helps improve balance, cornering ability and steering responsiveness. Exclusive Bilstein shocks and a lowered suspension allow these performers to achieve 0.93 G on the skid pad — on par with some of the world's best-handling cars. The three-mode Bilstein Adaptive Damping System on Challenger SRT® models takes drivers from Street Mode (sporty) to Sport Mode (firm) to Track Mode (firmest, max handling).

AGGRESSIVE FRONT- AND REAR-CAMBER GEOMETRY // Performance handling requires maximum road-holding grip, and Challenger Scat Pack models deliver with aggressive front- and rear-camber geometry. Set at -1.2 degrees in the front and -0.75 degrees in the rear, Challenger is set up for high-speed cornering with its tires leaning inboard at the top relative to the body.

BRAKES // Standard four-wheel antilock disc brakes provide solid stopping power. Available Brembo® brakes help create superior cooling and fade performance courtesy of wind tunnel-designed brake cooling ducts that direct airflow to vented rotors for consistent stopping power.

YOU'VE EARNED YOUR STRIPES // // // There are car lovers, and then there are those who eat, breathe and sleep cars. Who spend their free-time tinkering. Who can't leave well enough alone. Who remember a time when you didn't show up unless your car was tricked out with parts, stripes and a Scat Pack sticker on the quarter-glass that served as a tell that your Challenger was hiding something substantial under the hood. There's another generation that won't settle for just a performance car. They're seeking the ultimate combination of raw power, pure performance and authentic attitude. These vehicles are for both contingents.

THE PIONEERS OF MUSCLE: DODGE, MOPAR®, SCAT PACK // // // 392 HEMI® Scat Pack Shaker is the real deal, straight from the factory. We're talking functional, fully floating, open-element Shaker hood scoop with cold air induction. A Mopar Cold Air Intake, conical air filter and legendary 392 HEMI V8 engine churn out 485 horsepower and 475 lb-ft of torque. Because power means nothing without control, four-piston Brembo® brakes, 3-mode Electronic Stability Control (ESC)⁽⁴⁾ with Full-Off Mode, high-performance suspension with 20x9-inch wheels and performance steering are standard.

The 392 HEMI Scat Pack Shaker shows its supremacy with a 392 HEMI badge on the Shaker hood scoop, bold hood-to-tail stripes and a retro fender badge.

// // // Challenger 392 HEMI Scat Pack shown in Contusion Blue.

POWER, PERFORMANCE AND SPEED

///// The TorqueFlite® eight-speed automatic transmission helps deliver impressive fuel efficiency and world-class precision. Available Dodge Performance Pages, paddle shifters and standard Sport Mode help lower shift times from 350 to 250 ms. SRT® models, when in Track Mode, reduce shift times even more, from 350 ms down to 160 ms for lightning-quick gear changes.

///// When the TorqueFlite is mated to the Supercharged 6.2-liter SRT Hellcat HEMI® V8, it's fortified to withstand the groundbreaking 707 horsepower and 650 lb-ft of torque unleashed by the engine. Enhancements include additional pinion gears and five more clutch pack discs.

///// The passion of the manual is alive and well. Challenger also offers the intensity of a heavy-duty TREMEC® six-speed manual transmission for those who want to put the power of shifting into their own hands.

///// Challenger 392 HEMI® Scat Pack Shaker shown in Go Mango.

707 HORSEPOWER

////// FEEL THE FURY

WE DIDN'T HOLD BACK, NEITHER SHOULD YOU

Like a predator laying in wait, stalking its prey, Challenger SRT® Hellcat is just waiting for you to unlock the full potential of 707 horsepower with your Red key. The 2017 Dodge Challenger SRT Hellcat is propelled by the Supercharged 6.2-liter SRT Hellcat HEMI® V8 and offers a bewildering quarter-mile time of 10.8 seconds and a top speed of 199 mph.*

Opt to mate this powerplant to the TorqueFlite® eight-speed automatic transmission that's uniquely designed to withstand that epic horsepower and torque, or to the high-performance Viper modified TREMEC® six-speed manual transmission that boasts an internal cooling pump and external, vehicle-mounted oil cooler.

*NHRA certified 10.8 @ 126 with street-legal drag tires. 11.2 @ 125 with production tires.

//// Challenger SRT® Hellcat shown in TorRed with standard 20x9.5-inch lightweight forged aluminum wheels with available Brass Monkey finish.

///// EPIC. POWERFUL. INTENSELY FAST.

CHALLENGER SRT® HELLCAT AND CHALLENGER SRT 392 // This Supercharged 6.2-liter SRT Hellcat HEMI® V8 lives up to the hype. The engine features a forged-steel crankshaft and induction-hardened bearing surfaces, a specially tuned crank damper tested to 13,000 rpm, high-strength forged-alloy pistons coupled to powder-forged connecting rods, high-load capacity bushings and diamond-like carbon-coated piston pins. Premium-grade heat-treated aluminum cylinder heads with die-cast aluminum rocker covers are optimized for superior thermal conductivity.

The Supercharger houses internal charge coolers and an integrated electronic bypass valve. The twin-screw rotors are specially treated to accommodate tighter internal tolerances between the rotors and help improve overall performance. Air is delivered into the engine's air box via the Air Catcher™ Inlet Port located in the driver's-side parking lamp. A 92mm throttle body controls airflow into the Supercharger, air charger coolers and then into the inlet port.

With this kind of power, it's a given that the exterior demands exclusive extras like a Viper inspired aluminum hood, a functional scoop flanked by a set of functional air extractors and new SRT Hellcat badges. Owners are handed both a Red and Black key fob at delivery. The Black key restricts power to 500 horsepower, while the Red key unlocks the full 707 horsepower.

Challenger SRT 392 shows its authority with a robust, naturally aspirated 392 HEMI V8 engine with a powerful 485 horsepower and 475 lb-ft of torque. Both SRT 392 and SRT Hellcat let drivers personalize their drive experience via the Drive Modes features: pre-configured Default, Sport and Track settings, as well as a Custom setting for a uniquely tailored experience.

Inside, both SRT 392 and SRT Hellcat sport a blend of premium materials, race-inspired technology and heritage-influenced design cues.

PUT A DODGE

IN YOUR GARAGE

-1963

2017 DODGE CHARGER

This is a car with more than 50 years of credentials behind its name. A car that helped usher in the first era of muscle and is now fueling the segment's resurgence with a broader definition of performance. It's no longer just about feasting on burnt rubber, it's about equal parts attitude, personality and horsepower. It's about performance on the streets and at the pump. It's about having the audacity to give a family-friendly sedan a ludicrous 707 horsepower. This is Dodge Charger, a car with skin in the game for a half-century. A performance car no longer satisfied with merely distancing itself from the pack, it's aiming to lap the pack.

DODGE FEVER ⁻¹⁹⁶⁸

Charger's amped-up attitude is so fierce, it's impossible to ignore. The first glance sends chills. The second begs you to run your hand along its low, lean profile and scalloped bodyside. Its imposing grille leaves no question where this retro-modern muscle comes from. Front to rear, Charger commands authority with projector headlamps and LED lighting. Even the most discerning eyes take note.

////// Charger Daytona shown in Yellow Jacket.

HIT UP AN OLD FLAME //

The heritage-inspired Charger R/T Scat Pack proudly wears the Scat Pack Bee on its Gloss Black grille. Built for performance, a large inlet and scoop transfers gulps of fresh air beneath the hood to efficiently cool the engine compartment. The 392 HEMI® fender badges let onlookers know exactly what's under the hood. Available High Intensity Discharge (HID) headlamps with LED daytime running lamps and bulked-up 20x9-inch wheels amp up the track-infused design. Its rear heat extractors and 1-piece Satin Black performance spoiler bear witness that this vehicle means business.

//// Charger R/T Scat Pack shown in Pitch Black.

////// Charger R/T shown in Black/Pearl Nappa leather with Sepia accent stitching and perforated inserts.

THIS MUSCLE HAS A SOFT SIDE

Don't just love us for our body. Want us for our technology. Appreciate us for our soft spaces and for our ability to accommodate your friends.

Charger's driver-focused interior is stocked with race-inspired details, bold colors and retro-cued soft-touch surfaces. A genuine, 1-piece-stamped aluminum instrument panel bezel adds the finishing touch on an interior that is dedicated to the details.

Take control with the thick-rim three-spoke Sport steering wheel. Available paddle shifters with rev-matching capability bring track-inspired performance to the everyday drive.

Seating for five ranges from premium cloth to Nappa leather trim and Alcantara® suede to premium Laguna leather. Standard Dual-Zone Temperature Control and available heated/ventilated front seats, heated rear seats and full-circumference heated steering wheel bring year-round comfort, in any climate.

DRIVEN BY TECHNOLOGY

While the performance technology helps pull extraordinary numbers, it's the driver-centered tech that adds more envy to the interior. It starts with a seven-inch reconfigurable digital gauge cluster. From here, you get real-time information and vehicle status updates in full color, as well as available turn-by-turn navigation information and visual safety system notifications.

Keep tabs on performance numbers including 0 – 60 time, reaction time and lap timer with available Dodge Performance Pages. The pages also include configurable Drive Modes that allow you to make performance adjustments to the engine, transmission, steering response and traction control.

The center console shifter gives Charger a distinctive level of sophistication. The electronic shifter with AutoStick mimics the operation of a traditional linkage shifter, while allowing for smoother and more efficient shifting.

A black gas pump nozzle and hose are laid out on a dark asphalt surface. The nozzle is on the right side, and the hose forms a large circle. In the center of the circle, the number '30' is written in large, bold, red font. To the right of the '30', the text 'UP TO 30 MPG*' is written in a smaller, white, sans-serif font, oriented vertically.

30

UP TO 30 MPG*

*Based on 2017 FCA group testing. EPA estimates not yet available. Actual mileage may vary.

THRILL RIDES

THE LINE STARTS HERE

////// 3.6L DOHC PENTASTAR® VARIABLE VALVE TIMING (VVT) 24V V6 WITH MAX 300 HP AND UP TO 30 MPG HWY.* This powerplant boasts 292 horsepower and kicks the ponies up to 300 when paired with the available Rallye Group that includes Sport Mode, cold-air induction, sport-tuned exhaust and die-cast paddle shifters. Couple that with the standard TorqueFlite® eight-speed for an impressive combination of 0 – 60 in the mid six-second range and up to 30 mpg highway.*

////// 5.7L HEMI® VVT V8 WITH 370 HP, 395 LB-FT OF TORQUE AND UP TO 25 MPG HWY† The legendary engine releases a big dose of horsepower, impressive torque and a 0 – 60 mph acceleration in the low five-second range. The standard TorqueFlite eight-speed automatic transmission with AutoStick and Fuel Saver Technology helps Charger deliver a whole new level of performance and efficiency. It's technology like this that supplies Charger with an equal dose of muscle and responsibility.

////// 392 HEMI V8, 485 HP, 475 LB-FT OF TORQUE AND UP TO 25 MPG HWY‡ Standard on Charger R/T Scat Pack, Daytona 392 and SRT® 392, the intensity of this HEMI V8 churns out a potent 485 horsepower and 475 lb-ft of torque across a wide rpm range. Charger SRT accelerates from 0 – 60 mph in the high four-second range and covers a quarter-mile in the high 12-second range. The robust TorqueFlite eight-speed automatic transmission features rev-matching on downshifts.

////// 6.2L SRT HELLCAT HEMI V8 WITH 707 HP AND 650 LB-FT OF TORQUE. This is the baddest of the bunch. It assaults the asphalt with 707 horsepower, an unreal 650 lb-ft of torque and 0 – 60 mph in the mid three-second range. Paired to the TorqueFlite eight-speed, it delivers impressive street driving and maximum performance with 160-millisecond shifts and rev-matching on downshifts. The SRT TorqueFlite eight-speed features enhancements over the standard version to be able to withstand the groundbreaking power, including additional pinion gears and five more clutch pack discs.

*Based on 2017 FCA group testing. EPA estimates not yet available. Actual mileage may vary. †2016 EPA estimated 16 mpg city/25 mpg hwy. Actual mileage may vary. ‡2016 EPA estimated 15 mpg city/25 mpg hwy. Actual mileage may vary.

DODGE REBELLION -1966

FEEL IT COMING

CHARGER R/T SCAT PACK // Loaded with a legendary 392 HEMI® V8, this powerhouse unleashes 485 horsepower and 475 lb-ft of torque. Four-piston Brembo® brakes, 3-mode Electronic Stability Control (ESC)^[4] with Full-Off Mode. High-performance suspension with Bilstein® shocks, 20x9-inch wheels and available Three-Season Performance tires work together to bring top-shelf control. The interior merges retro styling with modern technology. Race-inspired seats feature the famed Scat Pack logo embroidered on either standard high-performance premium cloth or available Nappa leather trim with Alcantara® suede inserts. Standard on the R/T Scat Pack model, Dodge Performance Pages feature everything from Launch Control to a G-force meter to drag-race timers. This real-time data can also be displayed on either the 8.4-inch Uconnect® touchscreen or the standard seven-inch reconfigurable digital display nestled between the gauges. For an even greater degree of personalization, the Charger R/T Scat Pack customizable settings can be accessed through the standard Uconnect touchscreen that gives the driver the ability to adjust steering feel, transmission shift points and throttle response.

////// Charger R/T Scat Pack shown in Granite.

DOMESTIC. NOT DOMESTICATED.

707

HORSEPOWER

In its own right, Dodge Charger makes a bold statement. Tag on three little letters to the nameplate and enthusiasts know there's an extra punch to its performance. Add an additional surname to the bundle and this vehicle's credentials are amplified even louder. Charger SRT® Hellcat ... the name says it all. With 707 horsepower, 650 lb-ft of torque, an 11.0 second NHRA-certified quarter-mile elapsed time on street tires, and 0 – 100 – 0 mph in under 13 seconds ... the numbers back it up.

////// Charger SRT Hellcat shown in White Knuckle.

////// CUT THE COMPETITION OFF AT THE KNEES

Program your driving experience and keep track of performance data via customizable SRT® Performance Pages. Everything from horsepower to G-force meter to drag-race timers to downloadable apps is right at your fingertips. This real-time data can be displayed on the seven-inch reconfigurable digital gauge cluster or on the 8.4-inch Uconnect® touchscreen.

At delivery, SRT Hellcat owners are handed both a Red and Black key fob. The Red unlocks the potential max horsepower while the Black enables more conservative performance. At delivery, SRT Hellcat owners are handed both a Red and Black aluminum hood showcases a colossal air intake and dual heat extractors that vacate the heat that 707 horsepower can make.

The Bilstein® three-mode Adaptive Damping Suspension on Charger SRT Hellcat models provides

Tip to tail, inside and out, Dodge Charger SRT Hellcat reigns supreme. Whether you're checking out its menacing sheet metal or its track-inspired interior, it's clear this machine exudes unrelenting power. selectable driving dynamics settings that adjust shocks and transmission shifts to suit any drive — Street Mode (sporty) to Sport Mode (firm) to Track Mode (firmest, max handling).

These Drive Modes tailor the driving experience by controlling horsepower, transmission shift speeds, paddle shifters, traction control and suspension

Extensive wind tunnel and road testing helped create an engine cooling package that lets Charger SRT Hellcat challenge other driving experience. settings. Drive Modes are pre-configured for Sport, Track and Default settings, while the Custom Mode allows the driver to configure their own unique driving experience.

This is the real deal, handcrafted with an extreme level of detail straight from the factory. The 2017 Viper ACR has true racecar capability and is built for the weekend racer who wants the most extreme — but still street-legal — track car available.

This marvel harnesses its raw power from an all-aluminum, 645-horsepower, 600-lb-ft of torque, hand-built 8.4-liter V10 overhead-valve engine. Viper ACR sets itself apart with world-class aerodynamics and suspension, massive carbon ceramic Brembo® brakes with six-piston calipers and high-performance tires specifically designed for the vehicle. Delivering nearly 1 ton of downforce, 1.5-G cornering during high-speed turns and the ultimate in stopping performance with unprecedented brake-fade resistance, Viper ACR strikes fear in the competition. Unique exhaust tips on the side-mounted exhaust pipes help provide reduced exhaust pressure.

Each Viper is engineered to withstand severe track duty in ambient temperatures of 100 degrees Fahrenheit (with a professional driver). Power reaches the pavement through the standard TREMEC® six-speed manual transmission. Get all the jaw-dropping details on all Viper models at driveSRT.com

///// THE DEFINITION OF EXCLUSIVITY

Dodge Viper not only honors enthusiasts' desire for fierce power and performance, but feeds their appreciation for custom details and superior quality. The iconic, hand-built American supercar gives owners superior bragging rights: 1-of-1 exclusivity. This unprecedented level of uniqueness and personalization allows enthusiasts the ability to customize a 1-of-1 design from more than 50 million build combinations. Each custom-build starts with Viper GT content — then the choices are all yours. With 16,000 exterior color options, 48,000 custom stripe colors, 11 wheel options, 16 interior trims, seven aero wing assembly packages, three brake packages, four suspension options, and badging and a fuel filler door available in either Satin Chrome or Satin Black, and an also available anodized fuel filler door with the available Anodized Carbon Package, no two Vipers will be alike. To secure the rarity of each Snake, no two customers can order the same configuration, including color, in the same model year. Stitch-by-stitch, bolt-by-bolt and with every hand-painted exterior, Viper is truly one of a kind.

DESIGN YOURS AT driveSRT.com

LIMITED-EDITION ANNIVERSARY MODELS

When you routinely feast on asphalt for breakfast and chase it down with a straight shot of adrenaline, cake and ice cream make for a lackluster, borderline offensive, birthday celebration. No, the most reverent way to celebrate 25 years of exotic high-performance heritage — both on- and off-track — is with a four-pack of special editions that pay tribute to some of the most iconic Vipers in the nameplate's history.

Each limited-edition Viper model in the anniversary collection features a serialized instrument panel badge that includes model name and owner-name customization. Here's the quarter-century lineup:

VIPER SNAKESKIN EDITION GTC // The menacing Snakeskin Green exterior of this special edition is inspired by the original 2010 Viper Snakeskin ACR. Like its predecessor, one glance strikes desire in the soul of enthusiasts.

VIPER VOODOO II EDITION ACR // It wasn't black magic that made the 2010 Viper Voodoo edition an automotive legend, it was vehemently tuned mechanics that had devotees clamoring.

VIPER GTS-R COMMEMORATIVE EDITION ACR // Built to pay homage to one of the nameplate's most distinguishable and iconic paint schemes of all time — the 1998 White and Blue combination Viper GTS-R GT2 Championship Edition.

VIPER 1:28 EDITION ACR // The name salutes the Viper ACR's single lap record of 1:28.65 set at the historic Laguna Seca Raceway in Monterey, California in October 2015.

BONDURANT®

THE OFFICIAL RACING SCHOOL OF **DODGE**
SRT

With great power comes great responsibility. This is exactly why each Dodge SRT® is built with a host of technologically advanced safety and security features. But there are still a few things that technology can't fix — knowing, understanding and fully appreciating the levels of performance that Dodge's modern

day marvels are capable of delivering. To that end, Dodge has created a new partnership, The Bob Bondurant® School of High-Performance Driving. For nearly 50 years, Bob Bondurant's method of training has served more than 500,000 drivers from around the world. We're tapping into that wealth of

knowledge and making Bondurant the official high-performance driving school of Dodge and SRT. Anyone who buys a vehicle from the SRT lineup will receive a one-day high-performance driving class, included with their purchase, where they'll learn new skills to backup their new hardware.

HERE'S WHAT YOU CAN DO. REMAIN FOCUSED ON THE ROAD WITH YOUR HANDS ON THE WHEEL, WHILE YOU COMMUNICATE, NAVIGATE AND STAY ENTERTAINED.

//// **LISTEN** to music, talk shows and sports. Access all genres, favorite artists, winning teams — all the time with SiriusXM® Satellite Radio^[5] //// **DISCOVER** new places, find the best shopping, dancing, entertainment venues and restaurants //// **SPEAK UP** and be heard, send and receive calls and texts^[3] while driving safely with hands-free phone capability^[1] //// **NAVIGATE** to every adventure, get turn-by-turn directions so you don't get lost on the way (unless you want to) //// **START** your car from afar, get your engine running, unlock your door or flash your headlamps from almost anywhere using your smartphone //// **SEE** into the future, hear weather and traffic reports* with a five-year trial subscription to SiriusXM Travel Link^[5] and SiriusXM Traffic^[5]

APPLE CARPLAY™^[2]

A smarter, safer way to use an iPhone® inside your vehicle and seamlessly integrate it with the Uconnect® touchscreen and Siri® voice control. You can make calls, access music, send and receive messages, get directions optimized for traffic conditions and more, while staying focused on the road.

ANDROID AUTO™^[2]

Automatically provides a safer way to use Android while driving. Share information while you easily access the best of Google: maps with voice-guided navigation and play music, place phone calls or send and receive messages^[3] and ask Google search any question by voice command^[1]

SAFETY & SECURITY FEATURES

PARKSENSE® REAR PARK ASSIST^[6] //// When the vehicle is in Reverse, the system can sense objects at low speeds. When sensors detect objects in the back-up pathway, the system provides an audible and visual warning. Available on Challenger and Charger.

RAIN BRAKE SUPPORT //// When the windshield wipers have been activated, the system pulses the brake pads closer to the spinning rotors, helping to keep the rotors and pads dry for greater control and operator security. Standard on Challenger and Charger.

LANESENSE® LANE DEPARTURE WARNING (LDW) WITH LANE KEEP ASSIST^[7] //// Alerts and assists the driver; leverages electric power steering (EPS) to deliver subtle steering-wheel input when the system detects the need for course correction. Available on Charger.

BLIND SPOT MONITORING (BSM)^[8] WITH REAR CROSS-PATH DETECTION^[6] //// Dual radar sensors constantly monitor driver blind spots, providing notification of an encroaching vehicle via illuminating icons on the sideview mirrors and by audible chime. The system includes Rear Cross-Path Detection,^[6] which monitors for vehicles and objects in perpendicular relationships to the vehicle while backing out of tight parking spots. Available on Challenger and Charger.

ADAPTIVE CRUISE CONTROL (ACC)^[9] //// Helps maintain distance from the vehicle ahead. Available on Challenger. Under certain traffic conditions, Charger models with this system can bring the vehicle to a full stop without driver intervention.

FULL-SPEED FORWARD COLLISION WARNING (FCW) WITH ACTIVE BRAKING^[10] //// Radar and camera technology combine to help determine if frontal impact appears imminent; if so, the system prefills the brakes, then transmits audible and visual warnings for the driver to intervene. No driver response triggers brief brake application as a tactile alert; if the driver remains unresponsive and a frontal collision risk remains, brakes are applied to slow the vehicle before impact. The system can bring the vehicle to a full stop if speed is reduced below 20 mph. Available on Charger. Available with Challenger models, FCW^[10] system transmits audible and visual warnings. Warning sensitivity can be adjusted to driver preference.

PARKVIEW® REAR BACK-UP CAMERA^[6] //// This system displays an accurate visual reference of what is behind your vehicle when it's in Reverse. Available on Challenger and Charger.

ELECTRONIC STABILITY CONTROL (ESC)^[4] //// This system is designed to assist drivers in maintaining control of their vehicles during extreme steering maneuvers. ESC^[4] senses when a vehicle is starting to spin (oversteer) or plow (understeer), and attempts to correct the vehicle's course by automatically controlling the throttle and applying the brakes at individual wheels. Standard on Challenger and Charger.

READY ALERT BRAKING //// The system anticipates situations when the driver may initiate an emergency brake stop and uses the ESC^[4] pump to precharge the brake system in order to decrease the time required for full brake application. Standard on Challenger and Charger.

RAIN-SENSING WINDSHIELD WIPERS //// System sensors automatically detect moisture on the windshield and activate the wipers. Available on Challenger and Charger.

//// Dodge Challenger SXT shown with Authentic Dodge Accessories by Mopar: Wide Center Racing Stripe Graphic, Hood Pin Kit, Black Chrome Grille Surround and 20-inch Black Envy Wheels.

//// **ALWAYS AT YOUR SERVICE.** The story of Mopar began nearly 80 years ago with a focus on motor parts and the introduction of a simple can of antifreeze. Through the decades, we have grown into so much more. Today, as the official service, parts and customer care provider for FCA US LLC Brand vehicles, we walk alongside you as your partner in the vehicle ownership experience. That's why we offer authentic parts and accessories designed by the same engineers that created your vehicle to make it truly *yours*. It's why our team is comprised of expert dealer technicians who know your make and model best, armed with leading-edge diagnostic technology no one else can match. And it's why we've created unique services like Mopar Owner Connect, Express Lane Service and Mopar Vehicle Protection® plans to offer convenience and peace of mind. In short, we are not only here to service cars, trucks, minivans and SUVs — we are here to service people's lives. It's this commitment that fuels who we are. And it's our promise to you that Mopar will always be at your service. See your dealer for the full line of Authentic Accessories available for your Dodge vehicle, or visit mopar.com

• = Included 0 = Optional P = Package

The image features three Dodge vehicles in a dark, smoky environment illuminated by a strong red light. The vehicles are positioned in a line, with the central one being a Dodge Challenger. A large, stylized 'D' logo is superimposed over the center of the image. The text 'DOMESTIC. NOT DOMESTICATED.' is written across the middle of the image in a bold, italicized font. The scene is dramatic and emphasizes the brand's identity.

DOMESTIC. NOT DOMESTICATED.

WARNING: Dodge is highly addictive.

5 YEAR/60,000 MILE¹³¹
POWERTRAIN LIMITED WARRANTY

[1] Requires a mobile phone equipped with the Bluetooth Hands-Free Profile. Visit UconnectPhone.com for system and device compatibility. [2] Apple CarPlay and Android Auto require a compatible mobile device connected via USB cable to the Uconnect system. Data plan rates may apply. Visit UconnectPhone.com for system and device compatibility. [3] Voice Text Reply and Voice Texting features require a compatible mobile device enabled with Bluetooth Message Access Profile (MAP). iPhone and some other smartphones do not currently support Bluetooth MAP. Visit UconnectPhone.com for system and device compatibility. Ensure MAP is ON and incoming message notification is enabled. Vehicle must be registered for Uconnect Access and you must fulfill minimum subscription requirements. Also requires the use of a compatible smartphone that supports text messaging and Bluetooth. Visit UconnectPhone.com for system and device compatibility. [4] No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. [5] SiriusXM subscriptions for audio and data services are sold by SiriusXM to follow your trial subscription. **If you decide to continue listening after your trial, the subscription plan you choose will automatically renew thereafter and you will be charged according to your chosen payment method at then-current rates.** Fees and taxes apply. To cancel, you must call SiriusXM at 1-866-635-2349. See the SiriusXM Customer Agreement for complete terms and get more information at www.siriusxm.com. All fees and programming subject to change. Your equipment and features for SiriusXM services will vary depending upon the vehicle you select and may be limited in select markets. [6] Always look before proceeding, electronic drive aid is not a substitute for conscientious driving; always be aware of your surroundings. [7] LDW is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use brakes to avoid collisions. [8] Always check visually for vehicles prior to changing lanes. [9] ACC is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid collisions. [10] FCW system is solely an alert system for the front of the vehicle which does not take any actions to change the vehicle dynamics to avoid a collision and is not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid collisions. [11] Always sit properly with the head restraint properly adjusted. Never place anything in front of the head restraint. [12] The Advanced Front Air Bags in this vehicle are certified to the new U.S. federal regulations for Advanced Air Bags. Children 12 years old and younger should always ride buckled up in a rear seat. Infants in rear-facing child restraints should never ride in the front seat of a vehicle with a passenger front air bag. All occupants should always wear their lap and shoulder belts properly. [13] Transferable. See dealer for complete details and a copy of the 5-Year/60,000-Mile Powertrain Limited Warranty.
