<sup>1</sup> Availability varies by model. <sup>2</sup> 16-inch wheels on base 2.5i. <sup>3</sup> The Supplemental Restraint System (SRS) (airbags) affords the driver and the front and rear outboard passengers additional protection in moderate to severe frontal and side-impact collisions. This system provides supplemental protection only, and seatbelts must be worn in order to avoid injuries to out-of-position occupants upon bag deployment and to provide the best combined protection in a serious accident. Children should always be properly restrained in the rear seat.

# 2010 Outback

never holds **back**

**Introducing the all-new Subaru Outback.**

Take more field trips. Find your own scenic point. Discover a new playground. The Subaru Outback is game for whatever you can think up. It doesn't let rain, snow, city limits, unpaved roads or anything hold it back. The Outback has the capability to go just about anywhere and all the style and comfort you need for when you're just staying local. So, pick a destination, grab some friends, fire up the nav system and go.

## back to nature

Remote. Distant. Out-of-the-way. No access. No problem. Outback has the ability and range to get you closer to nature and the versatility to bring all the gear and people you need to make the most of it. See for yourself when you check out one of the hundreds of outdoor events sponsored by Subaru each year. And while you're out there enjoying our beautiful Earth, know that Subaru is helping to protect it by building cleaner, longer-lasting vehicles in zero landfill plants. The Outback, unlike most SUVs, also achieves Partial Zero Emission Vehicle (PZEV)<sup>1</sup> status and SmartWay<sup>®</sup> certification.<sup>2</sup>

<sup>1</sup> Available on 2009 Outback 2.5i non-turbo models certified as Partial Zero Emission Vehicles (PZEV) that are sold, registered and operated in California, Connecticut, Maine, Massachusetts, New Jersey, New York, Oregon, Pennsylvania, Rhode Island, Vermont and Washington. PZEV emissions warranty applies only in certain states. See your dealer for complete information on emissions and new car limited warranties.  
<sup>2</sup> For all 2009 Legacy, Outback and Forester non-turbo 2.5-liter models certified as PZEV that are sold, registered and operated in California and certain other states.

Live life to the fullest with the space and room to be as spontaneous as you want. Whether it is taking a couple extra people along for a weekend getaway, or deciding last minute to throw in some more gear, your Outback can handle it. With even more passenger space, cargo space and multiple storage areas, nothing else quite measures up to the Outback.

Increased Passenger Space

Underfloor Cargo Storage

8 Cup Holders

71.3 cu.ft. Cargo Space

# power **backed** by balance

## Subaru Boxer Engine

It's okay to get carried away when you've got control on your side. The SUBARU BOXER® engine is not only engineered for power but for poise as well. The cylinders are horizontally opposed providing a more efficient distribution of smooth power. The shorter profile and lower placement of the engine give the Outback a lower center of gravity assuring a more stable, yet responsive drive. Whether you choose the fuel-efficient 2.5-liter 4-cylinder or the potent 3.6-liter 6-cylinder engine, you'll have enough power to put everything behind you.

## Lineartronic™ CVT

The road may not be smooth, but the power always is with Lineartronic™ CVT (Continuously Variable Transmission), now available on 2.5i models. To maintain the superior balance and enhance the inherent efficiency of our unique SUBARU BOXER® engine and Symmetrical AWD system, we created the compact and lightweight Lineartronic™ CVT. Simply put it in Drive and this gearless transmission can automatically adjust as needed, seamlessly keeping the optimal rev range at all times and using the momentum you've already built up. Resulting in smooth, uninterrupted power that maximizes both performance and fuel efficiency.

Durable Construction

Increased Reliability

Horizontally Opposed Design

Smoother Operation

Lower Center of Gravity

Greater Agility

## back roads or any roads

Sometimes the ideal spot doesn't have the most ideal road conditions getting there. But with Subaru Symmetrical All-Wheel Drive, the compact layout of the drivetrain and SUBARU BOXER® engine allows power to flow more directly and efficiently to all four wheels for exceptional traction on all roads and in all kinds of conditions. And its unique configuration offers total side-to-side symmetry and balance for increased stability and performance.

All-weather Conditions

8.7-inch Ground Clearance

Responsive Handling

All-road Agility

Outback 3.6R Limited in Steel Silver Metallic.

# get **back** safely

## Active and Passive Safety

The best ending to any adventure is getting home safely, which is why we engineered the Outback with multidimensional safety features designed to help keep you safe. Our active and passive safety technology helps you to avoid an accident and also helps to protect you if one is unavoidable. All of these precautions have led to the 2009 Outback earning the coveted five-star crash-test safety rating.<sup>1</sup>

## Stopping Power

When you need to stop suddenly, your Outback is ready with the help of Brake Assist and Electronic Brake-force Distribution that distributes braking power front to rear.

<sup>1</sup> 2010 Outback not yet tested. 5-star front and side-impact ratings for 2009 Outback. Government star ratings are part of the National Highway Traffic Safety Administration's (NHTSA's) New Car Assessment Program. Visit [safercar.gov](http://safercar.gov) for more information.  
<sup>2</sup> Always wear seatbelts. Children should be properly restrained in the rear seat.

## Increased Awareness

Keep your eyes on the road ahead and your hands on the wheel with the steering wheel-mounted controls. And if you need to see what's behind you, the available rear vision camera gives you better awareness when you're backing up.

## Greater Control

Standard on the all-new Outback, is our Symmetrical All-Wheel Drive, Vehicle Dynamics Control (VDC) and double-wishbone rear suspension that work together to help keep your Outback on the road and in control.

## All-around Protection

Subaru Outback is engineered inside and out with a Ring-shaped Reinforcement Frame that diverts impact energy away from the cabin, and front, front-side and side-curtain airbags<sup>2</sup> to help guard you and your passengers in the event of an accident.
