THIS IS WHERE YOU FALL IN LOVE WITH DRIVING AGAIN.

To create the Altima Coupe, we didn't just subtract two doors, we started with a clean sheet. The result is stunning. And more. With a shorter wheelbase for agility and a lower ride height for a sporty ride, the Coupe goes beyond a styling statement. You'll see it's a completely different driving experience.

MADE TO DRIVE. BUILT TO LAST.

Over 5,000 quality and durability tests make sure your Altima will keep performing mile after mile.

Road Tests – At our proving grounds in Arizona, we replicate some of the worst roads a vehicle could ever travel over. Detroit-sized potholes, New York City manhole covers, Belgian cobblestones, and truck-scarred LA freeway are all part of the rigorous testing. We're pretty sure you'll go a little easier on your Altima.

Weather Tests – Locked in a special chamber, then baked under 266 bulbs burning at 375 watts each to reach extreme temperatures. Add in 95% humidity for good measure and then make sure each Altima passes with flying colors. Now that's a durability test.

OF COURSE, SAFETY IS AT THE TOP OF YOUR LIST. GOOD THING ALTIMA HAS YOUR BACK.

Nissan Advanced Air Bag System (AABS) – Includes dual-stage supplemental front air bags with seat belt sensors and an occupant-classification sensor. Built into the front seats, two supplemental air bags also offer side-impact protection and move with you as you adjust your seating position. Plus, roof-mounted curtain side-impact supplemental air bags help provide head protection for both rows of outboard occupants.¹

Front-seat Active Head Restraints – Designed to move up and forward in certain rear-end collisions to help cushion the blow if one should occur.

snugKids™ – Nissan safety engineers have dedicated thousands of hours to evaluating hundreds of child restraints in Nissans. The result: An industry first, The Snug Kids Child Safety Seat Fit Guide. This guide lists child seats that fit the rear seats of Nissan vehicles, as well as offers tips on correct installation. Look for the latest Fit Guide at [NissanUSA.com/SnugKids](https://www.nissanusa.com/SnugKids)

LATCH System – The Altima LATCH System (Lower Anchors and Tethers for CHildren) lets you secure LATCH-compatible child restraints in the rear seats without having to use seat belts or a locking clip.

Brake Override Technology – Like every Nissan since 2005, Altima comes standard with Brake Override Technology. It's designed to help slow down your vehicle and bring it to a safe stop in an emergency by overriding accelerator input and reducing engine power when the accelerator and brake pedals are applied simultaneously.
