GOING GREEN HAS NEVER BEEN THIS REVOLUTIONARY.

It's not surprising that *Green Car Journal* picked the new Volt as the 2016 Green Car of the Year.¹

Volt offers up to 53 pure electric miles² on a single charge and up to 420 miles² on a full charge and a full tank of gas. Chevrolet also expects owners will drive over 1,000 miles² between fill-ups with regular charging. With impeccable style and advanced EV technologies like Regen on Demand™ and Location-Based Charging, going green doesn't get any more revolutionary than this.

¹ Visit GreenCarJournal.com for more information. ² EPA-estimated 53-mile EV range based on 106 MPGe combined city/highway (electric); 367-mile extended range based on 42 MPG combined city/highway (gas). Actual range varies with conditions.

EXTERIOR DESIGN

Volt Premier in Kinetic Blue Metallic (extra-cost color).

LOOKS CAN GO JUST AS FAR. That's the beauty of it. The muscular new shape, along with the upper and lower grille pads, give Volt an identity of its own. From the finely tuned exterior and LED signature daytime running lamps to the redesigned grille, there's brilliance in every detail.

EXPERIENCE EFFICIENCY. Aesthetically and aerodynamically, it works together. Deliberate contours and expressive proportions form a bold, confident stance and offer optimal efficiency. So staring is understandable, but get inside and you'll find the journey is even more rewarding.

PRETTY SMART. You get the complete package: a sporty look without sacrificing intelligent features. Advanced EV technologies such as Regen on Demand, which offers an innovative way to recharge while driving, and the Power Flow screen helps keep you aware. Brains and beauty are all in one.

FILL-UPS? FEW AND FAR BETWEEN. Chevrolet expects owners will drive over 1,000 miles¹ between fill-ups with regular charging. And to top it off, Volt has 294 lb.-ft. of torque for a superb driving experience. Which means the next time you see a gas station, you can speed up – and pass it.

¹ EPA-estimated 53-mile EV range based on 106 MPGe combined city/highway (electric); 367-mile extended range based on 42 MPG combined city/highway (gas). Actual range varies with conditions.

1. YOU HAVE OPTIONS. Volt offers two trim levels with unique wheels and multiple color choices. So it's easy to make Volt match your own unique personality.

2. WINK, WINK. LED front signature lighting enhances the eye-catching design with illuminating detail. Nothing but bright roads ahead for you.

3. IMPRESSIVE CURVES. Volt was expertly carved and shaped with diligence and precision all in the name of performance and efficiency. Plus, its wide stance contributes to nimble handling.

INTERIOR DESIGN

Volt Premier Interior in Jet Black with available features.

WELCOME. Inside, you'll see everything about Volt is visually stunning. The beautifully crafted interior offers available heated leather-appointed seats to keep you comfortably in place, while twin-needle stitching provides a luxurious appeal. A refined driving experience is achieved before you even take off.

YOUR INVITATION TO INNOVATION. Thoughtfully designed and tailored to meet your needs, Volt welcomes you with comfort. Detail is taken to another level with intuitiveness and ingenuity, so everything is centered around you.

VOLT STANDS OUT AND FITS IN. You'll have plenty of space to put your stuff. With functional cargo space and accommodations for five passengers, there's no room for compromise.

ONE TOUCH GIVES YOU ALL ACCESS. A color touch-screen in the center of the instrument panel puts everything you need within reach. Energy screens, certain features from your phone, music, infotainment and other controls – it's all right here, and easily accessible.

LEADING THE WAY. Chevrolet is the first and only car company to offer built-in 4G LTE Wi-Fi^{®1} to cars, trucks and crossovers, providing the ability to seamlessly connect your smart devices and vehicles to the Internet! It offers great signal quality and bandwidth for up to seven devices.

Apple CarPlay™ CONNECTIVITY² Take some of your favorite compatible iPhone[®] features and put them on your vehicle's touch-screen display in a smart, simple manner. Access your Phone, Music, Maps, and Messages, as well as some of your other favorite apps (e.g., iHeartRadio³ and Pandora[®] Internet Radio³).

INTUITIVE INTERIOR. If it feels like you and Volt have an instant connection, it's because you do. Advanced EV and entertainment technologies make driving Volt as seamless and convenient as possible. So, as you get to know Volt, Volt learns about you based on the way you drive.

SIRI EYES FREE⁴ For compatible iPhone users, the system allows limited hands-free interaction for those times when you want to read or compose a text message, make a phone call or play your favorite music.

1. ONSTAR REMOTELINK® MOBILE APP!

Now you can control your car from anywhere you have a signal, with an app that lets you remote start your vehicle and pinpoint your vehicle's location on a map. You can also manage your Wi-Fi hotspot, unlock your doors, monitor your charge level and efficiency. And you can even find the nearest charging station – all from your smartphone. You're connected wherever you go.

2. MAKING SMARTPHONES SMARTER. With an available wireless charging feature², the 2017 Volt makes it easier to keep your smartphone fully powered. Simply equip your phone with an accessory backplate or case, so you can keep your phone charged on the go.

3. EASY ACCESS TO YOUR SMARTPHONE. With Android Auto™ connectivity,³ you can interact with select smartphone apps. This system takes some of your compatible Android phone's features and puts them on the Chevrolet MyLink⁴ display in a smart, simple manner. You can access your phone, text messages, music, navigation and more.

¹ Requires compatible mobile device and active OnStar subscription. Visit onstar.com for details and system limitations. ² The system wirelessly charges one PMA- or Qi-compatible mobile device. TWO CHARGE OPTIONS. An available Level 2, 240-volt charging system can replenish the battery in 4.5 hours (professional installation required). There is also a standard 120-volt portable cord that will charge the battery in approximately 13 hours!¹

THERE'S A SCREEN FOR EVERYTHING. Want to know how much power you will use? Volt has a screen for that. The Energy Usage Score screen shows you how well you use energy. Get quick access to valuable data, such as your battery level, charge settings, range estimation and more.

LOCATION-BASED CHARGING. Volt makes charging efficient, with home and away settings for recharging. This feature allows you to take advantage of off-peak electricity rates when you're at home but always begins charging immediately when you're away.

REGEN ON DEMAND. Through a steering wheel-mounted paddle, Regen on Demand seamlessly transfers the kinetic energy from the motion of Volt and stores it in the battery while slowing down the vehicle.

¹ Using the 120-volt portable charger will take approximately 19 hours at the default 8-amp setting and can be reduced to 13 hours at the 12-amp setting. Actual time may vary with temperature.

LITHIUM-ION BATTERY The advanced 18.4 kWh lithium-ion battery was designed to be lightweight, powerful and efficient. The all-new battery cell delivers 20 percent more energy by volume!¹

GENERATOR When the battery runs low, the gas-powered generator kicks in to extend the range over 360 miles more!²

REGENERATION Volt empowers you to put energy back into your battery through regenerative braking and a steering wheel-mounted Regen on Demand paddle.

ELECTRIC DRIVE UNIT The Electric Drive Unit in Volt propels the vehicle with energy either from the vehicle's battery or its range-extending gas-powered generator, making it the electric vehicle with a backup plan.

1. PARENTS, BREATHE. Teen Driver technology encourages safe driving habits for new drivers in a number of ways, including muting the audio system when front-seat occupants are not wearing their safety belts and giving audible and visual warnings when the vehicle is traveling over predetermined speeds.

2. ONSTAR® AUTOMATIC CRASH RESPONSE! In a crash, built-in sensors can alert a specially trained OnStar Advisor, who can be connected into your Volt to see if you need help – even if you can't ask for it. Advisors can use GPS technology to pinpoint your location and request emergency help. OnStar Automatic Crash Response is included in the OnStar Guidance Plan,² which is standard for 6 months.

3. INTELLIGENT AIR BAGS. Volt features 10 standard air bags³ and a collision sensor system designed to only deploy the air bags that are needed.

¹ Visit onstar.com for vehicle availability, details and system limitations. OnStar acts as a link to existing emergency service providers. Not all vehicles may transmit all crash data. ² Visit onstar.com for coverage map, details and system limitations. ³ Air bag inflation can cause severe injury or death to anyone too close to the bag when it deploys. Be sure every occupant is properly restrained. A NOTE ON CHILD SAFETY: Always use safety belts and the correct child restraint for your child's age and size, even with air bags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal air bag. See the Owner's Manual and the child safety seat instructions for more safety information.

WE'VE GOT YOUR BACK. AND SIDES. AND FRONT.

LOW-SPEED FORWARD AUTOMATIC BRAKING. If the vehicle is traveling at low speeds and the system determines a front-end collision situation is imminent with a detected vehicle ahead, and the driver has not already applied the brakes, this available system automatically engages the brakes to help reduce the collision's severity. The system may even help avoid contact at very low speeds.

FORWARD COLLISION ALERT. This available feature continually monitors how close your vehicle is to the vehicle in front of you. If the system determines that a front-end collision with a detected vehicle is imminent, it alerts the driver to a potential crash. It also warns the driver if their Volt is following a detected vehicle much too closely.

LANE KEEP ASSIST. At speeds above 37 mph, the available camera-based system monitors road lines and will gently turn the steering wheel if the vehicle begins changing lanes without the use of a turn signal.

SIDE BLIND ZONE ALERT. This available feature uses radar sensors on both sides of the vehicle to help "look" for other vehicles in your side blind zone areas and indicates their presence with LED-lit symbols in the exterior mirrors.

LANE CHANGE ALERT. Working with available Side Blind Zone Alert, available Lane Change Alert employs radar sensors in the rear quarter panels to help detect and alert the driver to fast-approaching vehicles in the adjacent lane from up to 80 feet away, not just in the side view mirror blind zones.

REAR CROSS TRAFFIC ALERT. Available Rear Cross Traffic Alert helps alert drivers to approaching traffic when backing up. If a vehicle is detected, the driver is warned with visual and audible alerts.

REAR VISION CAMERA. The standard rear vision camera with dynamic guiding lines uses the Chevrolet MyLink 8-inch diagonal color touch-screen display to show the area behind your Volt while you are backing up.

AUTOMATIC PARKING ASSIST. This available, ingenious system enables Volt to detect viable parking spaces, determine approach angles and take over the steering to neatly maneuver into an available space. Throttle, brake and gear selection input is still required by the driver, but the vehicle steers itself into any suitable-sized parallel or perpendicular (90-degree) parking spot.

FRONT AND REAR PARK ASSIST. Ideal when pulling into a parking spot at low speeds, the available system senses stationary objects and warns you if an object is too close. As you shift into Reverse, the rear vision camera automatically displays a live image of the area behind the vehicle on the Chevrolet MyLink screen and includes guiding lines to help when backing up.

INTELLIBEAM HEADLAMPS. When oncoming headlamps are sensed or when taillamps are detected in front of you, the available IntelliBeam® high beam assist intuitively adjusts between low and high beams.

FULL-SPEED ADAPTIVE CRUISE CONTROL. This available feature enhances cruise control by allowing the vehicle to automatically follow a detected vehicle at the driver-selected following gap, reducing the need to frequently brake and accelerate.

ENGINES Chevrolet products are equipped with engines produced by GM Powertrain or other suppliers to GM worldwide. The engines in Chevrolet products may also be used in other GM makes and models.

ASSEMBLY Chevrolet vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Chevrolet vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest you verify that your vehicle includes the equipment you ordered and that, if there were changes, they are acceptable to you.

ONSTAR OnStar services require vehicle electrical system (including battery), wireless service and GPS satellite signals to be available and operating for features to function properly. A NOTE ON CHILD SAFETY Always use safety belts and the correct restraint for your child's age and size. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with a passenger air bag. See the Owner's Manual and child safety seat instructions for more safety information.

IMPORTANT WORDS ABOUT THIS CATALOG We have tried to make this catalog comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models and availability. Specifications, dimensions, measurements, ratings and other numbers in this catalog and other printed materials provided at the dealership or affixed to vehicles are approximations based on design and engineering drawings, prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the time of printing, please check with your Chevrolet

dealer for complete details. Chevrolet reserves the right to lengthen or shorten the model year for any product for any reason or to start and end model years at different times. Certain vehicle features may lose their usefulness over time due to obsolescence from technological changes. Unless otherwise noted, all claims based on GM Compact Car segment and latest available competitive information. Excludes other GM vehicles.

SPARE TIRE INFORMATION There is no standard jack or spare tire in the 2017 Chevrolet Volt. Your vehicle has a tire sealant and compressor kit that uses a liquid tire sealant to temporarily seal up to a one-quarter-inch puncture in the tread area of the tire. After using the tire inflator kit, it is recommended that you take the tire to an authorized retailer for inspection and repair as soon as possible, but at least within 100 miles of driving. The tire sealant cannot seal and inflate sidewall damage, punctures larger than one-quarter inch, or a tire that has unseated from the wheel. The sealant can only be used on one tire and for one time before its expiration date.
