

1938 FORD V-8 STATION WAGON

DESIGNED FOR A GREAT VARIETY OF TASKS. DESIRED FOR STYLE AS MUCH AS UTILITY.

RECOGNIZED AS BOTH FASHIONABLE AND USEFUL

The Ford V-8 Station Wagon for 1938 is styled with the fresh beauty of the new Ford De Luxe passenger car. Among the outstanding appearance features are:

Massive fenders - Rounded headlamps
Mechanical brakes - Hood hinged at rear
Rear trunk with endless steel
V-type windshield - Chromium frame
Body lines gracefully curved toward rear

The interior is spacious and comfortable with seats for seven and driver, with generous luggage space on the tail gate.

Seat cushion springs of new lattice type
Each seat cushion spring in individual
inlay casing

Cushions and seat backs of rubberized,
washable art-leather

Room at right of center seat for easy
access to rear

Adjustable Safety Glass windows

With center and rear seats removed,
the Station Wagon changes character
to a handy, light handling unit.

Load space is 72 inches long

44 inches wide (average)

37.5 inches high (at rear)

Rear seat can replace center seat, giving
room for extra luggage, and five pas-
sengers and driver

Tires are 6.00-16, 6-ply

6.50-16, 6-ply tires are optional for
small extra charge

Because of its stylishness and adapt-
ability of seating and load space, the
Station Wagon is widely employed by:

Country estates - Country clubs

Camps - Inns - Hotels

Schools - Business district garages

SAFETY GLASS ALL AROUND - DOORS, WINDOWS AND TAIL GATE CAN BE LOCKED

FEATURES OF THE 1938 FORD V-8 STATION WAGON

85-HORSEPOWER ENGINE—The Station Wagon is powered by the brilliant 85-horsepower V-8 engine used in the new De Luxe Ford car.

EASY-ACTION SAFETY BRAKES—Sure and reliable, under all conditions, Ford Safety Brakes provide quick, smooth stopping with light pedal pressure.

UPHOLSTERY—Art-leather. **WHEELBASE**—112 inches.

SAFETY GLASS ALL AROUND AT NO EXTRA COST—The most important 1938 feature of the Station Wagon is Safety Glass as standard equipment in all doors, side and rear windows. Door and side windows are adjustable. The rear window can also be opened and held in position by brackets. Passengers can enjoy closed-car comfort in bad weather, since all windows are weather-tight. Locks on windows, doors and tail gate now provide safety for luggage—another entirely new feature. Windows are latch-locked from the inside. The tail gate is locked by key from the outside.

PRINTED IN U. S. A.

EQUIPMENT INCLUDED IN THE PRICE—Ash tray, front bumper guards, de luxe steering wheel, two windshield wipers, twin air electric horns, rustless steel wheel bands, door and window locks, spare wheel, tire and tire lock, spare tire cover, two tail lights, two sun visors, cigar lighter, glove compartment lock, glove compartment clock.

SPARE WHEEL AND TIRE MOUNTED BEHIND FRONT SEAT—The spare wheel and tire are now mounted behind the driver's seat. A cloth tire cover protects clothes of passengers. With the spare inside, the tail gate is lighter, easier to close. The window above tail gate is hinged at the top. It can be clamped at maximum opening where it will not interfere with loading. Room for easy access to the rear is provided at the right of the center seat. Each seat holds three. Rear seat can replace center seat.

The Ford Motor Company, whose policy is one of continuous improvement, reserves the right to change specifications, design, or price, without incurring obligation.
