ZEPHYR... WHAT'S NEW FOR 1980

Outstanding new functional features, a variety of fresh new colors and trims, and several desirable new options are designed to enhance Zephyr's deserved popularity as a stylish, practical automobile in 1980.

Noteworthy functional developments include two major powertrain advances. New to Zephyr is the optional 2.3 liter turbocharged four-cylinder engine which provides the fuel economy of a small four for routine cruising and low power operation, yet delivers significantly augmented engine output to meet high power demands (available approximately Nov., 1979). A new 4.2 liter (255 CID) V-8 replaces last year's optional 5.0 liter (302 CID) engine, offering a lighter powerplant that provides traditional V-8 qualities. Other technical developments aimed at improving fuel efficiency include the use of lightweight, high-pressure "P" metric steel-belted radial-ply tires to reduce rolling resistance, the use of high strength steel in certain components to reduce weight, and a further reduction in aerodynamic drag.

Also new to Zephyr for 1980 are quad rectangular sealed-beam halogen headlamps that use less electrical power to produce the same illuminating power as previous

headlamps.

Interior changes include a revised luxury level door trim panel design. In addition, both the base and Accent-level bench seats have been revised to a "double-bucket" sew style.

Incorporating mid-size interior roominess in compact-sized exterior dimensions, the space-efficient 1980 Zephyr retains features it introduced, such as driver command seating position with easy-to-read instruments and stalk-mounted controls on the steering column. Mechanical highlights include standard front disc brakes, rack-and-pinion steering, an advanced strut-type coil-spring front suspension and a four-bar link coil-spring rear suspension. Zephyr's standard engine is the 1980 version of Ford's popular 2.3 liter overhead cam four.

Again in 1980, Zephyr is offered in two- and four-door sedans, a Z-7 sport coupe and a four-door station wagon. For extra luxury buyers also can select the rich Ghia option for all models and the Villager station wagon.

NEW PRODUCT FEATURES

FUNCTIONAL

- New, lighter weight 4.2L (255 CID) V-8 engine replaces optional 5.0L (302 CID) V-8*
- 2.3L Turbo engine available as an option (available approximately Nov., 1979)*
- Lightweight, high-pressure "P" metric steel-belted radial-ply tires standard on all models*
- Quad rectangular sealed-beam halogen headlamps standard*
- Redesigned shock strut mountings in front suspension
- Revised scissors-type jack
- New fluidic windshield washer system*
- New self-adjusting clutch standard on manual transmissions
- Revised choke system for improved cold starts

EXTERIOR

- Standard front bumper guards moved inward 3-1/8 inches
- Nine new paint colors:
 - Dark Chamois Metallic
 - Dark Cordovan Metallic
 - Dark Blue Metallic
 - Chamois Metallic
 - Dark Pine Metallic
 - Sand Metallic
 - Pastel Sand
 - Dark Chamois Metallic
 - Dark Cordovan Metallic
 - Chamois Metallic
 - Sand Metallic
 - Medium Bittersweet

* Refer to Technical Information section

- Four new vinyl roof colors:

- Dark Blue
- Sand
- Cordovan
- Caramel

- Four new tu-tone paint combinations:

- Black/Silver
- Dark Blue/Light Medium Blue
- Cordovan/Medium Bittersweet
- Sand Metallic/Pastel Sand

INTERIOR

- New vinyl trim on base bench and bucket seats
- New optional cloth on the base Zephyr seats
- Base door trim panel has bright moldings deleted
- Base and Accent-level bench seats have a revised "double bucket" sew style
- Accent-level door panel has a revised band pattern and a 1/2-inch bright-and-woodgrain racetrack molding
- New optional cloth trim on the Accent-level interior
- Accent-level bucket seat has a revised pleating to match the bench seat
- Three new interior trim colors:
 - Caramel
 - Vaquero
 - Sand

OPTIONS

- 2.3L turbocharged engine with automatic transmission (includes power dome hood)
- 4.2L (255 CID) V-8 engine (requires automatic transmission)
- Optional 3.45:1 axle ratio (available on 2.3L engine with automatic transmission only)
- Option revision:
 - Automatic transmission floor shift now available with 2.3L engine

ZEPHYR SEDAN

Zephyr 2-Door Sedan

ZEPHYR SEDAN STANDARD EQUIPMENT

EXTERIOR

Front:

- Dual rectangular halogen headlamps
- Dual park/turn signal lamps
- Bright features include:
 - Vertical theme grille
 - Headlamp/parking lamp frames
 - Aluminum bumper
 - Windshield molding
 - Stand-up hood ornament
- Front bumper guards

Side:

- Deluxe wheel covers
- Upper body-side dual accent stripes
- Dual front fender louvers
- Bright features include:
 - Wheelip moldings
 - Rocker panel molding
 - Door belt molding
 - Roof drip molding
 - Left-hand outside mirror

Rear:

- Distinctive horizontal taillamps with integral backup lamps
- Bright features include:
 - Rear window surround molding
 - Aluminum bumper
 - Taillamp bezels

Finish:

- Electrocoat paint primer process
- Electrostatic paint process
- Corrosion protection with use of pre-coated steel panels

INTERIOR

- Low back bucket seats
- All-vinyl seat trim
- Driver command seating position
- Continuous-loop front seat lap and shoulder belts
- Inertia seat back release (2-door models only)
- European-style front door armrest
- Color-keyed, 10 oz. cut-pile carpeting

- Color-keyed steering wheel and column
- International operating control symbols on instrument panel
- Woodtone instrument cluster applique
- Stalk-mounted controls on steering column—near stalk has horn, turn signals and high/low headlamp beam switch; far stalk has windshield wiper/washer

- Door belt color-keyed to interior
- Speedometer calibrated in miles/kilometers per hour
- Economy spare tire located beneath luggage compartment floor
- Luggage compartment mat
- Flat luggage compartment floor

FUNCTIONAL

- 2.3 liter 2V 4-cylinder engine
- Four-speed manual transmission
- Unitized body construction
- Rack-and-pinion steering
- Front disc/rear drum brakes
- P175/75R14 steel-belted radial-ply tires (BSW)
- Strut-type front suspension
- Four-bar link design coil-spring rear suspension

- 40-amp. alternator
- Front stabilizer bar
- DuraSpark ignition
- Electronic voltage regulator
- Fluidic windshield washer
- High/low ram air ventilation
- Inside hood release
- Fixed quarter windows (2-door models)
- Coolant recovery system

95 Luxury Exterior Decor Group — Includes:

- Bright window frames
- Rear quarter window moldings

Order Code

- Deluxe protective bodyside moldings
- Dual accent stripes on hood
- Dual bright outside rearview mirrors
- Wheelie and rocker panel moldings deleted

Not available with Exterior Accent Delete Option or on sedans with Luxury Interior Option. Included with sedans with Ghia Option.

Zephyr ●	Zephyr Z-7 na	Zephyr Wagon ●	Villager Wagon na
-------------	------------------	-------------------	----------------------

96 Luxury Interior Option — Includes:

- Luxury non-reclining Flight Bench seat (bucket seats optional)
- Full door trim panels with woodgrain insert and carpet lower portion (standard on Z-7)
- Luxury steering wheel
- Cloth headlining
- High-gloss woodgrain appliques on instrument panel, cluster and optional radio (standard on Z-7)
- Carpeted luggage compartment (sedans) or carpeted liftgate (wagon)
- Deluxe seat belts (standard on Z-7)
- Visor vanity mirror
- Cigar lighter
- Rear-seat ashtrays (2)
- Day/night mirror
- Glove Box lock
- Luxury sound package

Requires dual outside rearview mirrors on sedans and wagons. Not available with Interior Accent Group, manual transmission, bench, or sedans with Luxury Exterior Decor Group. Included in Ghia Option.

Zephyr ●	Zephyr Z-7 ●	Zephyr Wagon ●	Villager Wagon ●
-------------	-----------------	-------------------	---------------------

97 Villager Option — See page 7.

Zephyr na	Zephyr Z-7 na	Zephyr Wagon ●	Villager Wagon na
--------------	------------------	-------------------	----------------------

98 Ghia Option — Includes:

- Luxury Interior Option
- Luxury Exterior Decor Group (sedans only)
- Ghia badge

Not available with Interior Accent Group, sedans with bodyside moldings or bright window frames.

Zephyr ●	Zephyr Z-7 ●	Zephyr Wagon na	Villager Wagon ●

MAJOR ZEPHYR ENGINEERING SALES FEATURES

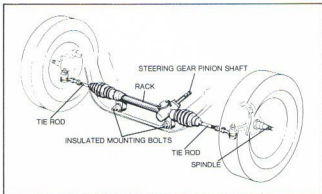

MODERN AERODYNAMIC DESIGN

Aerodynamics is an important element of Zephyr's basic design that received special attention in the attempt to improve fuel efficiency because as wind resistance is reduced, fuel economy increases. *

* Refer to EPA fuel economy ratings when they become available

RACK-AND-PINION STEERING

Zephyr's rack-and-pinion steering system is similar to the type used on many European luxury sedans and sports cars.

- Rack-and-pinion steering is a simple, low-friction system

- The rack converts the rotary motion of the steering wheel into lateral motion, which turns the front wheels
- Steering precision and responsiveness result in part from the elimination of conventional components such as the gear box

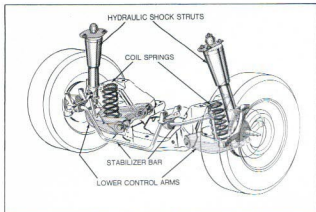

VARIABLE RATIO POWER STEERING (Optional)

The Power Steering option also includes a variable ratio steering feature. This feature combines a conventional steering gear ratio for straight-ahead driving and progressively faster steering gear ratios for quick turns and easy parking. The system provides three major benefits:

- A power assist to reduce driver effort in turning the steering wheel
- A familiar feel-of-the-road for straight-ahead driving that is not overly sensitive to slight movements of the steering wheel
- Ability to increase the rate and ease with which front wheels are turned when quick directional steering responses are desired. Fewer turns of the steering wheel are required than with conventional systems

MAJOR ZEPHYR ENGINEERING SALES FEATURES (continued)

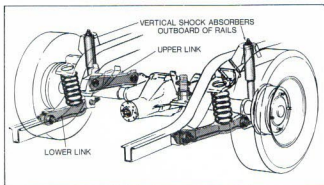

STRUT-TYPE FRONT SUSPENSION

We use strut-type front suspension because of its ride and handling characteristics. You will find it on many European luxury sedans. In this advanced design pioneered for Zephyr, the spring is located between the lower control arm and the vehicle structure rather than being conventionally mounted on the strut.

- The near "zero scrub" radius of this system is such that the turning axis of each front wheel intersects the road surface near the tire's center line to offer excellent stability
- The strut-type design also provides good isolation from noise, vibration and harshness (NVH), through the use of special bushings and coil spring insulators and dampers to eliminate metal-to-metal contact
- In addition, Zephyr's standard front stabilizer bar helps in cornering

4-BAR LINK COIL SPRING REAR SUSPENSION

Zephyr's rear suspension is a four-bar link system with coil springs.

- The rear shock absorbers are positioned vertically outboard of the rear rails for optimum shock and ride control
- This system is designed for lightweight efficient low-friction operation
- The suspension provides ample interior roominess in the body design, especially in luggage compartment capacity

2.3L TURBOCHARGED ENGINE (Optional)

The exciting 2.3 liter turbocharged engine, first introduced on the sporty Capri, is available as an option on Zephyr sedans and Z-7 models. The turbocharged engine provides the fuel economy of a small four for routine cruising and low power operation, yet generates on demand power comparable to some engines with a larger displacement.

- A standard engine must run on the amount of air/fuel mixture that enters the combustion chambers under normal atmospheric pressure
- A turbocharger boosts this pressure — when engine loads are high — for a greater mass of air/fuel mixture and a corresponding increase in power
- After optimum pressure is achieved, a by-pass valve for exhaust gases prevents further increase
- Under light load conditions, energy extracted from exhaust gases is insufficient to activate a significant power boost. Therefore, the engine operates like a standard engine without a turbocharger

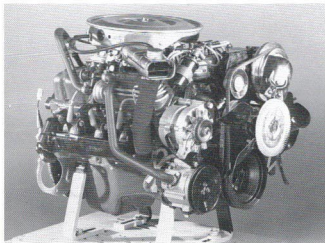

Zephyr's 2.3 liter turbocharged engine option also includes bucket seats, automatic transmission and power dome hood with Turbo nomenclature.

4.2 LITER V-8 ENGINE (Optional)

The new, efficient 4.2 liter V-8 engine — derived from the proven 5.0 liter V-8 engine — represents the latest generation of V-8 engines for Lincoln-Mercury. The 4.2 liter V-8 includes cast-iron construction and a variety of features designed with the more stringent fuel and emissions standards of the 1980's in mind.

- The 4.2L engine has less weight — approximately 13% less than the 5.0L V-8. Major areas of weight saving include the cylinder block, cylinder heads, water pump and crankshaft
- Reduced runner sizes increase cylinder charging efficiency for low and mid-range engine speeds
- Camshaft design aids low speed functioning such as in city driving

POWERTRAIN REFINEMENTS

In addition to the new engine offerings, several powertrain refinements are being implemented to improve overall vehicle efficiency and meet tough, new emission standards.

• Revised Choke System

- The standard 2.3 liter 2V engine features a choke cap with revised bimetallic element to improve cold starts
- The optional 3.3 liter 1V engine will include an all electric choke system for improved cold-start emissions performance

- **Self-Adjusting Clutch** — This feature is standard with manual transmissions. It eliminates the need for clutch adjustment, thereby reducing cost of ownership

- **Emission Systems** — Emission systems will incorporate an additional light-off catalyst. The purpose of the new light-off catalyst is to reach efficient operating temperatures quickly after engine cold starts so that higher level emissions generated while the engine is on choke cycle are converted as quickly as possible. The California systems will feature three-way catalysts

OTHER NEW TECHNICAL FEATURES . . .

HALOGEN HEADLAMPS

Halogen sealed beam headlamps are standard on the 1980 Zephyr. Halogen headlamps offer two major advantages

- They emit a more natural, whiter light than the previous standard lights
- They require significantly less power for the same light output — approximately five amps less on low beam

P-METRIC RADIAL-PLY TIRES

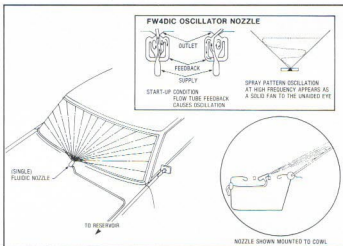

New P-Metric radial-ply tires are standard equipment on Zephyr. These tires incorporate the latest technology for improving fuel economy due to reduced rolling resistance at higher operating pressures. Special features include:

- Provisions for increased inflation pressure (up to 35 pounds in some applications)
- Lighter overall tire weight
- Reduced rolling resistance tread compound

FLUIDIC WINDSHIELD WASHER

A new concept in cleaning windshields, the fluidic windshield-washer system utilizes a single nozzle to produce a solid fan-like pattern of large droplets that spray the entire windshield.

- The center mounted nozzle sprays a single oscillating jet stream
- Droplets dispersed over the entire windshield provide a more efficient cleansing action
- The larger, heavier droplets are less susceptible to wind drift (often a problem at highway speeds)

See Technical Information Section for More Detailed Engineering Information
