CHEVY II

ALL WEATHER AIR CONDITIONER

The "All Weather" air conditioner and heater and defroster operate independently. The "All Weather" system can be operated on outside air, recirculated air or a mixture of both to control the temperature and reduce humidity.

ENJOY:

- The quieter ride with less wind roar and enjoy your radio programs as you ride with all windows closed.
- The Conditioned air with the excess "MOISTURE" and 98% of the irritating "POLLEN" removed.
- The warm air on the floor and cool air at the breath level on the in-between days of spring and fall. The smoke and odor-free air when using outside air with either the air conditioner or heater.

OPERATING TIPS:

For moderate cool down, place the "Temperature" lever to the extreme left "Cold" position, set air lever to "Outside" position, press the fan switch down to "High" blower position; after reaching a comfortable in-car temperature move fan switch up to medium or low blower position. On extremely hot humid days move the air lever to the "inside" position. The "Temperature" lever when in extreme right hand position will give maximum heat for winter driving. The lower lever places the defrosters into operation. *Available as factory option only.*

CUSTOM FEATURE ACCESSORIES TO HELP BUILD YOUR CAR TO YOUR EXACT REQUIREMENTS

REAR SEAT SPEAKER

A fader type switch is included with a matched speaker. Either the front or rear speaker can be played, or both.

TACHOMETER

A transistorized tachometer for six or eight cylinder engines.

CHEVY II CUSTOM FEATURE ACCESSORIES 1966

CHEVY II "CUSTOM" AIR CONDITIONER

The "CUSTOM" air conditioners are designed to become an integral part of the car. With a factory heater and Custom air conditioner, the air can be tempered and dehumidified in the spring and fall seasons. The air outlets are designed to distribute cool air. The volume of cool or heated air is controlled by three speed centrifugal blowers.

ENJOY:

The warm air on the floor and cool air in the upper level of the car with both the heater and air conditioner operating on the in-between days of spring and fall.

Arriving fresh and neat with no perspiration damp or wrinkled clothing.

Cleaner, quieter ride as you drive with all windows closed.

The conditioned air with excess moisture and 98% of irritating "POLLEN" removed.

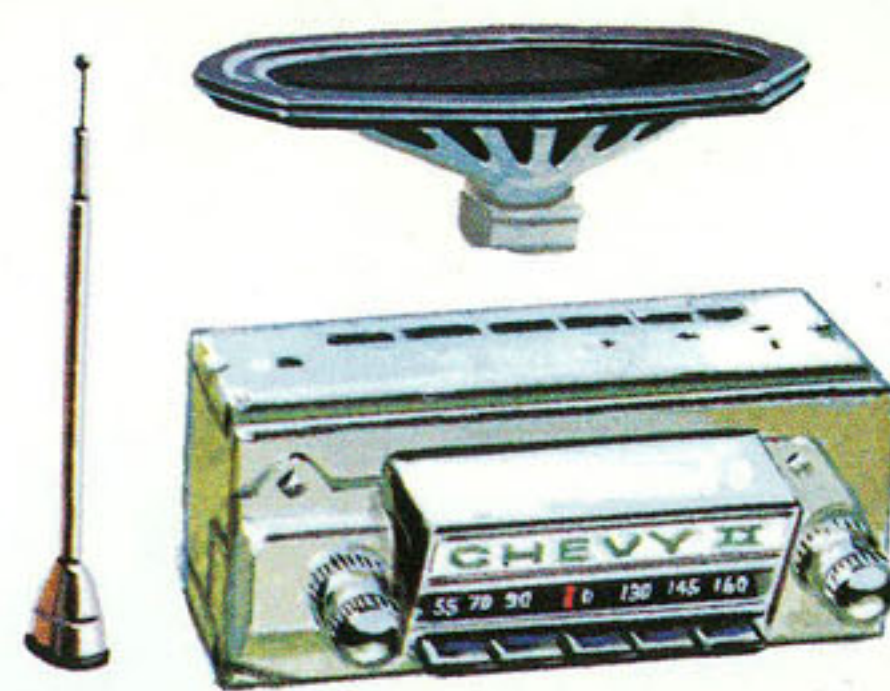

OPERATING TIPS:

Turn switch to "HI" position to cool car quickly. After the desired temperature is obtained, turn switch to desired blower speed to maintain desired temperature.

Turn temperature control knob to extreme right position for rapid cooling. After desired in-car temperature is obtained, turn knob counter clock-wise to maintain desired temperature.

Available only as a dealer installed option.
