Ever since the first Land Rover vehicle was conceived in 1947, we have built vehicles that challenge what is possible. These in turn have challenged their owners to explore new territories and conquer difficult terrains. Our vehicles epitomize the values of the designers and engineers who have created them. Each one instilled with iconic British design cues, delivering capability with composure. Which is how we continue to break new ground, defy conventions and encourage each other to go further. Land Rover truly enables you to make more of your world, to go above and beyond.

DESIGN

EXTERIOR

With its striking lines, muscular shoulder and tapered roof, Range Rover Evoque sets itself apart from its contemporaries.

Whether discovering hidden parts of town or being seen in all the right places, it's always ready for action. Striking the perfect balance between distinctive exterior design, a contoured cabin, capability and performance, the vehicle defines contemporary city life.

Adaptive full LED headlamps complement the vehicle's design cues by combining a distinctive look with enhanced light output for better visibility at night. The headlamps adaptive function enables light beams to be automatically aligned with steering inputs and follow curves in the road*.

The Daytime Running Lights (DRLs) have a new shape creating a distinctive signature which also serves as the directional indicator where it flashes amber.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

INTERIOR

A range of individual features provide added appeal to the clean, architectural shapes of the vehicle's interior. The all-new seats incorporate the latest technologies such as **climate control** options in the front seats to ensure a truly relaxed and comfortable ride. Details include the use of premium materials such as Oxford leather and twin-needle stitching.

The cabin is also complemented by new-look door insert finishings which are enhanced further by deeply padded premium materials.

For the ultimate in comfort, optional front **massage seats*** allow both the driver and front passenger to select individual programs via the Touch-screen**. Varying in intensity, there are five settings to choose from; each one delivers a soothing massage to improve both passenger and driver's comfort.

The infotainment center in Range Rover Evoque allows music to be heard and felt the way it should. Bright trebles. Deep bass notes. Rich tones that let every instrument sing. These are the characteristics of the **Meridian™ Sound System**. Added to which, the vehicle's eight-inch Touch-screen has 800 x 480 pixel resolution, Bluetooth® streaming and phone connectivity.**

Finally, **Configurable Mood Lighting** is also controlled via the Touch-screen. With a range of ten colors on offer, the brightness can be dialled up or down to suit every occasion. A 'Stealth' setting is also available to reduce cabin illumination to a minimum.

*Only available on Autobiography.

**Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use mobile phones and other devices, even with voice commands, when it is safe to do so.

TERRAIN RESPONSE®

Land Rover has always been synonymous with capability and Range Rover Evoque lives up to even the most demanding expectations. Confident and responsive, the drive is further enhanced by a generous wheel articulation and innovative off-road technologies such as Terrain Response®.

This feature adapts to the responses of the vehicle's engine, gearbox, differentials and chassis systems to maximize driveability, comfort and traction.

There are four Terrain Response® settings: General Driving, Grass/Gravel/Snow, Mud & Ruts and Sand. A fifth setting, Dynamic Mode is available on vehicles specified with Adaptive Dynamics*. This mode tunes the suspension to deliver even tighter body control with flatter handling and sharper responses.

ACTIVE DRIVELINE

The Active Driveline delivers benefits in both on and off-road situations. In many on-road driving conditions, the system is able to disconnect drive to the rear of the vehicle, providing maximum two-wheel drive fuel economy. The sophisticated software continuously monitors key vehicle and environmental parameters. If the requirements for four-wheel drive are met, the system seamlessly and imperceptibly reconnects that drive within 300 milliseconds.

When cornering, the vehicle's agility and stability are enhanced by the **Torque Vectoring by Braking system**. Monitoring the vehicle, the system is designed to constantly balance the distribution of torque between all the wheels to improve grip and steering whether on or off-road.*

ADAPTIVE DYNAMICS

Adaptive Dynamics* with advanced MagneRide™ is designed to monitor vehicle movements at least 1,000 times per second, reacting to driver or road inputs instantaneously to give greater control and minimize body roll, providing a balanced, flat ride.

The system will also sense off-road conditions and optimize the advanced MagneRide™ damper settings accordingly. Whether driving in town or on country roads and tracks, there's a sense of greater control.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. Image shown left is HSE Dynamic five-door in Yulong White.

MERIDIAN™ SOUND SYSTEM

Land Rover has partnered with Meridian, a world leader in audio technologies and digital sound processing, to develop advanced audio systems for Range Rover Evoque.

The 380W Meridian Sound System features 12 channels and 11 loudspeakers including a dual-channel subwoofer. The Meridian Surround Sound System is also available and produces an incredible 825W of surround sound through 15 channels and 17 loudspeakers including a subwoofer.

Digital Signal Processing (DSP) allows a speaker to perform with the characteristics of a speaker of eight times the volume.

The result is the very best in world-class audio reproduction with sound that can be felt and heard, just as the artist intended.

Also pioneered by Meridian is Trifield™ technology which ensures a perfect stereo image for each occupant, producing an holistic sound within the cabin to further improve the concert-like experience.

A special feature, Dynamic Volume, detects variations in the cabin and balances out the sound quality so that it's consistent throughout the car.

Meridian is a registered trademark of Meridian Audio Ltd. CD and MP3 disc and file compatibility for your iPod® or other MP3 devices is standard.

HEAD UP DISPLAY*

Head Up Display is a technology option that presents key vehicle data such as road speed, gear position and navigation directions on the windshield, without distraction or the need for the driver to take their eyes off the road. The Land Rover system features laser holographic techniques, resulting in superior color saturation, brightness and contrast.

This innovative laser system is more robust against issues such as 'washout' – the effect that the glare from sunlight has on LED-based systems.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. COMFORT FOR ALL

SEATING

For the ultimate comfort whatever the temperature, climate front seats are available. This option provides both heated and cooled ventilation through perforations in the Oxford leather seats. The driver and passenger preferences can be independently controlled via the Touch-screen. Heated rear seats are also available where the outer seats are heated.

Optional front massage seats* allow both the driver and front passenger to select individual programs via the Touch-screen. Varying in intensity, there are five settings to choose from; each one delivers a soothing massage to improve both the passenger and driver's comfort.

CONFIGURABLE MOOD LIGHTING

Mood Lighting adds to the calm, contemporary atmosphere. No matter what the light is outside, it's always comfortable inside.

Configurable Mood Lighting is also available, again controlled via the vehicle's Touch-screen, with a range of ten configurable colors available. The brightness of the ambient lighting is also configurable, and a 'Stealth' setting is available to reduce cabin illumination to minimum. Create the mood. Enjoy the surroundings. Get more out of the drive.

PANORAMIC ROOF

The optional full-size, fixed panoramic glass sunroof** enhances the sense of space and light, as well as providing uninterrupted views of the surrounding environment.

Importantly, the toughened glass has a dark tint to maintain a comfortable temperature inside the cabin and protect occupants and the interior from the sun's rays. A full-sized, powered interior blind is also provided for those who may prefer a more private experience.

*Only available on Autobiography.

**Panoramic roof standard on Coupe.

COMFORT FOR ALL

REAR SEAT ENTERTAINMENT*

The Rear Seat Entertainment system has the ability to play high quality DVD Video and route it through two eight-inch screens located in the back of the front headrests. The system can also play MP4 Video Files stored on a USB Device plugged into a USB Port located in the vehicle.

The Rear Seat Entertainment system comes with a remote control, which allows intuitive operation. Two wireless digital headphones featuring WhiteFire™ technology provide high quality sound and clarity to passengers.

USB CHARGING POINTS

Connectivity is state-of-the-art with Bluetooth® streaming as well as USB/iPod® connections for hands-free phone operation and a choice of listening while on the move.

An additional, dedicated USB socket allows the connection of compatible phones via a standard USB Cable (not supplied). This will allow the user to operate compatible apps via the Touch-screen.**

POWERED GESTURE TAILGATE

Opening and closing is further enhanced with the option of a hands-free powered tailgate. This will allow the driver to operate the tailgate (both to open and close) from outside the vehicle without needing to physically touch either the vehicle or the remote key fob.

Provided that the key fob is detected, the tailgate may be operated by waving a foot underneath the rear of the vehicle.

Additionally, two sensors mounted on either side of the tailgate allow curbside operation, rather than needing to be immediately behind the vehicle.

*Only available on five-door models. Not available on SE.

**Do not use Land Rover InControl® features under conditions that will affect your safety or the safety of others. Driving while distracted can result in loss of vehicle control.

LAND ROVER INCONTROL®

TOUCH-SCREEN

The Touch-screen is the command center for a wealth of features designed to make your driving experience more entertaining. It features a contemporary and fresh graphical design displayed on an eight-inch screen*.

It is the central hub from where you can connect and control your chosen entertainment and media. You can therefore enjoy an unimaginable amount of music and imagery all within one simple to use system. The ability to connect your smartphone via Bluetooth® is also available.

It is the interface where you can control the ambient lighting to suit your mood and preference, by varying the color and brightness level. The system also controls the air flow distribution within the car and allows you to operate the climate seats.

The Touch-screen provides all of the capabilities that you need such as navigation system, Bluetooth® connection on your phone, ECO Data functionality and the Land Rover 4x4i function.*

ABOVE & BEYOND

LAND ROVER INCONTROL®

INCONTROL PROTECT™

InControl Protect™ enables you to monitor your vehicle wherever you are. InControl Protect™ gives you peace of mind through SOS Emergency call and Optimized Land Rover Assistance. In the event of an emergency, the SOS Emergency call notifies the emergency services of the location of your vehicle.

INCONTROL REMOTE™

InControl Remote™ is an app available on Android™ and iPhone®, which allows you to interact with your vehicle remotely. InControl Remote not only provides basic information with the use of a remote it also enables you to communicate with your vehicle. You are able to lock/unlock your vehicle, remotely start, cool/heat your vehicle to the desired temperature prior to your journey and set a 'beep and flash' in order to locate your vehicle in a crowded parking lot.**

The InControl Remote App ensures you are fully prepared for your journey by displaying the fuel level and location of your vehicle. The Remote App also gives you vital information on fluid levels and whether your vehicle is locked or any doors or windows are open. You are also able to download your journeys to assist in reviewing mileage.

INCONTROL APPS™*

Connects your smartphone with the Touchscreen in your vehicle, meaning you can stay connected to your smartphone. Land Rover InControl® Apps™ enables you to control compatible apps on the InControl Touch-screen, ensuring the convenient use of apps that have been optimized specifically for use within your vehicle.

INCONTROL WI-FI™**†

Creates a Wi-Fi hotspot, allowing you and your passengers to stay connected on the move. You can connect up to eight devices to browse and stream the web, meaning you never have to be out of touch.

*Do not use Land Rover InControl® features under conditions that will affect your safety or the safety of others. Driving while distracted can result in loss of vehicle control.

**Functionality is market dependent. Please ask your Land Rover Retailer for more information.

†Data charges may apply when using this service.

iPhone® is a registered trademark of Apple Inc., registered in the US and other countries.

Features and their availability may differ by vehicle specification and market. Please contact your Land Rover Retailer for further information.

NINE-SPEED AUTOMATIC

The lightweight, compact nine-speed automatic transmission provides optimum fuel economy and CO₂ emissions as well as greater control in low-grip conditions or when towing through the specially designed, ultra-low first gear.

The nine-speed automatic transmission is specifically designed for transverse applications, and is one of the most efficient and technically advanced transmissions ever used in a production vehicle. Smaller ratio steps give improved response during acceleration, improved shift quality, drive and refinement.

The higher top gear not only reduces fuel consumption but the lower engine revs improve comfort and reduce noise when cruising at a sustained speed.

The nine-speed automatic is extremely robust and perfectly complements Land Rover's rugged all-terrain ability while delivering exceptionally high levels of refinement and efficiency.

2.0 LITER TURBOCHARGED I-4

The 2.0 Liter Turbocharged I-4 engine is a lightweight all-aluminum 2.0 liter engine with the latest direct-injection technology, advanced turbocharging and independent variable valve timing to help lower fuel consumption and CO₂ emissions compared with traditional larger capacity engines delivering equivalent performances.

The engine delivers a rich, powerful engine sound during strong acceleration and features a unique exhaust manifold for quicker warm-up and lower emissions, a low friction design and a state-of-the-art electronic management system. This includes Smart Regenerative Charging, which prioritises the charging of the battery when the vehicle is decelerating to capture wasted kinetic energy and reduce fuel consumption.

BODY AND CHASSIS

STRENGTH AND STABILITY

BODY

Range Rover Evoque features an extremely strong, lightweight body structure which has been developed using advanced, weight-saving materials to deliver outstanding stiffness and refinement together with excellent crash performance.

The structure is based on a steel monocoque platform. Delivering the exciting design and sporting dynamics of Range Rover Evoque dictated that an all-new structure was developed. Lightweight technologies are used extensively in the body design, including:

- Front fenders and tailgate assembly
- Magnesium cross car beam
- Optimized steel structure with 18 percent high strength Boron steels.

OPTIMIZED STRUCTURE

The use of special ultra-high-strength steels in strategic load-bearing areas was a key design objective. The finished steel structure uses 18 percent (by weight) of high strength Boron steels. These specialized steels deliver increased strength in critical areas, without the need to increase the thickness and weight of the pressings.

The ultra-high-strength Boron steel has been used in key parts of the crash safety cell, including the A and B-pillars and the sills. The resulting structure protects occupants using an incredibly strong and stable safety cell, and provides a very stiff platform for superior NVH and vehicle dynamics.

The use of ultra-high-strength Boron steel in the A-pillar was critical in retaining the slim, raked pillar of the vehicle, without compromising the strength and safety of the structure.

The optimized steel structure protects occupants using an incredibly strong and stable safety cell, which is complemented by a comprehensive system of airbags and restraints including driver and passenger airbags, knee airbags, and side curtain and thorax airbags.*

The crash structure was optimized using state-of-the-art computer simulation tools, which allowed engineers to conduct 'virtual' crash tests long before physical prototypes were available.

CHASSIS AND VEHICLE DYNAMICS

Range Rover Evoque has a chassis which has been specially developed by Land Rover's engineers to deliver on-road dynamics which combine sporting and agile responses with impressive refinement, while not compromising all-terrain capability.

Range Rover Evoque has fully independent suspension, with coil sprung struts front and rear, and isolated front and rear subframes, mounted to an exceptionally stiff steel monocoque bodyshell. The performance of the base suspension system is supplemented by advanced technologies such as an intelligent four-wheel drive system.

The chassis features a number of innovations, such as Electric Power Assisted Steering (EPAS)**, which help the car achieve its unique dynamic character and improved efficiency.

*Please remember that the safety belts in a vehicle constitute the primary protection system for driver and passengers in collisions. Airbags are not designed to deploy in all collisions. The airbag Supplemental Restraint System (SRS) is a supplement to the safety belts and is designed to work as a system with the safety belts. Although airbags provide additional protection, airbags without safety belts do not provide optimal protection in a crash. Always wear your safety belts. Children younger than 13 years old should always be properly restrained in a back seat, away from airbags. Never place an infant seat in the front seat.
 **These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

BLIND SPOT MONITORING WITH CLOSING VEHICLE SENSING**†

Designed to see what might be missed, these optional systems have discrete sensors hidden in the side and the rear bumpers. When a vehicle enters a blind spot on either side of the vehicle, Blind Spot Monitoring is designed to alert the driver via an icon displayed in the appropriate door mirror. If a vehicle approaches at speed from behind when changing lanes, the Closing Vehicle Sensing function is designed to alert the driver by flashing the icon in the door mirror.

LANE DEPARTURE WARNING**†

A forward-looking camera mounted ahead of the rear view mirror monitors the lane markings on both sides of the vehicle is designed to give driver a warning when the vehicle drifts out of its lane without the indicators being triggered. The alert comes in the form of a discrete vibration through the steering wheel, allowing the driver to take the appropriate action.

AUTONOMOUS EMERGENCY BRAKING**†

Autonomous Emergency Braking helps further enhance the driver assist aspects of the vehicle. Using a forward-facing digital camera, the system is designed to detect static vehicles or vehicles traveling ahead in the same direction and automatically reduces impact speed if it calculates that a collision is likely. The driver is alerted of the risk by a visual and audible warning signal.

TRAFFIC SIGN RECOGNITION†Δ

Working in conjunction with the Navigation System, this optional feature scans the road ahead for certain traffic signs and displays them in the Message Center in the instrument pack. The following signs are detected: speed limit signs, no-overtaking signs, variable overhead speed signs and traffic signs with extra information – such as reduced speeds for wet roads.

The system can be configured to provide speed alert warnings when the vehicle is travelling at or above the current speed limit, as well as warning of no-overtaking zones.

*On SE Premium, only available with Driver Assistance Package **Optional on HSE and HSE Dynamic and standard on Autobiography †These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc. Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details
 ΔOnly available with Lane Departure Warning.

CONTENT

SPECIFICATIONS

REVERSE TRAFFIC DETECTION^{††}

Activated while reversing, Reverse Traffic Detection is an optional feature that works by informing the driver in the event of a vehicle approaching from either side which may present a hazard, with both audible and visual warnings.

PARK ASSIST – PARALLEL PARK / PARKING EXIT[†]

Using sensors, this optional feature identifies parking spaces and helps to parallel park in tight spots. The screen prompts the driver to select reverse and then automatically steers the vehicle into place. The driver stays in control using the brake and graphics in the instrument panel to guide through each maneuver.

With Parking Exit, the system enables easy maneuvering out of parallel parking spaces. Graphics and alerts on the Message Center screen keep the driver informed at all times.

ADAPTIVE CRUISE CONTROL WITH QUEUE ASSIST AND INTELLIGENT EMERGENCY BRAKING[†]

Optional Adaptive Cruise Control (ACC) is a radar based cruise control system that helps maintain a pre-set gap from the vehicle in front, even if it changes speed. Discretely mounted behind the front grille, it detects and monitors the vehicle's front and sets the most appropriate speed.

Queue Assist adds to ACC functionality by assisting the driver to stop the vehicle when it reaches a traffic queue. Intelligent Emergency Braking uses radar to detect vehicles travelling in the same direction and is designed to automatically reduce impact speed if it calculates that a frontal collision is unavoidable.

SURROUND CAMERA SYSTEM[†]

Using five digital cameras mounted around the vehicle, this optional system provides an all-round view of your surroundings on the full-color Touch-screen, assisting in tight maneuvering. When towing, it provides additional information to aid with reversing.

SUSTAINABILITY

Range Rover Evoque is the smallest Range Rover ever. Its credentials stem from a comprehensive approach to reducing environmental impact throughout the life-cycle of the car. Its compact size has helped Range Rover Evoque minimize weight, improve aerodynamic performance, and deliver more sporting, agile handling with a lower center of gravity.

Such radical thinking and production processes bear testimony to Land Rover's unwavering commitment to deliver a more sustainable future.

ABOVE & BEYOND

SPECIFICATIONS

ADVANCED LIGHTWEIGHT MATERIALS

Starting at just 3,649lbs and using a range of advanced lightweight materials, Range Rover Evoque is the lightest Range Rover ever. There are key weight-saving materials throughout the vehicle, including an aluminum hood and roof and a magnesium cross car beam. The front fenders and tailgate assembly are constructed from composite materials.

Even the thickness of the laminated windshield is reduced to save weight and improve fuel efficiency, performance and handling.

The interior has also been independently tested by a leading international consultancy to ensure that all occupants enjoy an allergy-free environment. With 32lbs of recycled plastic and 46lbs of renewable and natural materials in each car, it's taking big steps to reduce its environmental footprint.

One particular innovation in the use of recycled material is the use of 95 percent recycled aluminum in the authentic metal interior finishers used on all models.

STOP/START

All engines feature Intelligent Stop/Start technology that automatically shuts down the engine at rest and starts it again as soon as the brake pedal is released. This helps to reduce fuel consumption and CO₂ emissions.

DRIVELINE AND ENGINE PERFORMANCE

The 2.0 Liter Turbocharged Four-Cylinder engine uses the very latest powertrain, coupled with lightweight all-aluminum technology and the nine-speed transmission, delivering improved fuel efficiency and lower CO² emissions.

The 2.0 Liter Turbocharged Four-Cylinder engine goes from 0-60mph in just 7.1 seconds.* The engine features Intelligent Stop/Start technology that automatically shuts down the engine at rest and starts it again as soon as you lift your foot off the brake.

■ Standard □ Optional - Not Available.

(2) Please remember that the safety belts in a Land Rover vehicle constitute the primary protection system for driver and passengers in collisions. Airbags are not designed to deploy in all collisions. The airbag Supplemental Restraint System (SRS) is a supplement to the safety belts and is designed to work as a system with the safety belts. Although airbags provide additional protection, airbags without safety belts do not provide optimal protection in a crash. Always wear your safety belts. Children younger than 13 years old should always be properly restrained in a back seat, away from airbags. Never place an infant seat in the front seat.

(3) These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions, etc.

Driver should not assume that these systems will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

(4) Option in Driver Assistance Plus Package. When Adaptive Cruise Control is specified, the grille is always painted Narvik Black regardless of other trims.

(5) Option in Driver Assistance Package.

(6) Option in SE Tech Package.

LAND ROVER APPROVED ACCESSORIES

Range Rover Evoque is so capable and adaptable it can get straight to work across a huge variety of vastly differing conditions and roles. Even so, some owners want to add their own stamp of individuality by tailoring their Range Rover Evoque to their specific needs with a range of stylish, practical accessories that are tough, versatile and bring an opportunity

for personalization to Range Rover Evoque. Importantly, these accessories can be added at any stage during the vehicle's life – not just when it's new. Naturally, Land Rover Approved Accessories are designed, tested and manufactured to the same exacting standards as the original equipment fitted to your vehicle.

LAND ROVER EXPERIENCE

Ever since its inception, Land Rover has been ready for anything. Its legendary capability has seen it tackle the most demanding of terrains, in the most difficult conditions. Its versatile interior has become synonymous with comfort and greater loadspace. And its 'can do' attitude has made it the most welcome of vehicles across the globe.

You can be part of the Land Rover story at one of our Land Rover Experience Centers. You can see how each and every one of these iconic vehicles is built. You can take one out onto off-road tracks where your driving skills will be put to the test. Or you can go even further on one of our Adventure Travel holidays to such countries as Tanzania, Iceland or Morocco.

Adventure awaits.

BEHIND THE SCENES TOURS

Ever wanted to discover how your Land Rover was built? To see the incredible journey upon which each and every one of our vehicles travels before you receive it?

You can experience how it is created using state-of-the-art technologies, the most efficient processes, the finest materials and British Craftsmanship at our facilities around the world.

From on-demand ordering of parts, to final trim and quality tests, the entire process will come to life before your eyes. It's a truly impressive display of engineering, craft and precision; one that you can then physically enjoy by taking a vehicle out onto one of our Experience Drives.

For more information, visit landrover.com/behindthescenestours

EXPERIENCE DRIVES

Wading through mud. Crossing a Tipping Bridge. Or creeping up a slippery, steep incline. Our Experience centers have an array of obstacles and challenges to tax even the most accomplished of drivers.

Our experts will teach you how to navigate through some of the most demanding terrain. Then, you can take the skills that you have learned and use them when you drive every day.

There's a choice of courses from Taster Drives through to Full Day Experiences, available in over 40 Land Rover Experience operations around the globe. Each one provides a unique and hugely memorable adventure that you, your family and friends can all enjoy.

You'll never feel more confident behind the wheel.

To book, go to LandRoverUSA.com/experiencedrives

ADVENTURE TRAVEL

Which destination would top your wish list of places to go on an adventure? The wide open, savagely beautiful plains of the Serengeti? Or simply exploring castles and manors around Britain? Well, you can revel in an epic adventure from the comfort and luxury of a Land Rover, assured in the meticulous planning and local insight for which Abercrombie & Kent is renowned. These two great British brands have come together to bring you a world of exploration, adventure and luxury in iconic worldwide destinations.

Each trip has a local guide and expert Land Rover instructors to provide support and guidance, ensuring you get the most out of your driving experience. Added to which, you will stay in boutique accommodation. Be part of an extraordinary journey, reimagined.

The company reserves the right to alter or withdraw any color finish without notice. Certain specifications are built to customer special order.

For delivery availability information, please consult your Land Rover Retailer. Some of these colors may not be obtainable in your country. Please check availability with your Land Rover Retailer. This publication is for international usage and while Land Rover takes the utmost care in ensuring that all the details in the publication are correct at time of printing, we are constantly striving for improvements, and therefore reserve the right to alter specifications and equipment without notice. Details of specifications and equipment are also subject to change to suit local market conditions and requirements, and not all products are available in every market. Some vehicles may be shown with accessories or optional equipment fitted.

These products vary from market to market. Please consult your Land Rover Retailer who will be pleased to advise you on current specifications. Retailers are not agents of Land Rover and have absolutely no authority to bind Land Rover to any express or implied undertaking or representation.
