STARCRAFT 

Quality and Integrity Since 1903

We're known for the company we keep.

PGA Player of the Year, **Paul Azinger**, travels in a Starcraft GT during the PGA tour. Paul understands Starcraft's dedication to quality and precision.

Three time Indy 500 winner and TV personality, **Johnny Rutherford**, has owned and driven numerous Starcraft products since 1980.

In the boardroom or at the race track, **Roger Penske** is one of the most respected and successful competitors in the world. He demands reliability, quality and performance from all of his many operations. That's why Starcraft vans are the official vans of Penske Speedway, Inc.

When it came time to choose a grand prize for the 1989 **Kodak Indy 500 Sweepstakes** and the **Kodak/SupereX Christmas Instant Winner Game**, **Kodak** chose a Starcraft GT van—quality companies working together.

Alan Osmond and the new generation of The Osmond Boys enthusiastically endorse Starcraft products.

Starcraft vans were the only ones chosen as VIP transport for both **President Reagan's** and **President Bush's** inaugural ceremonies.

Indy race car driver **Pancho Carter** tours the CART circuit in his Starcraft GT van and motor home.

Again in 1989, the Pole Winner at the **Indianapolis 500** drove home in a Starcraft GT van. Starcraft is the choice of the Indianapolis 500 and the drivers who qualify first.

Pro-Football Hall of Fame member **Johnny Unitas** put his mark on football history and is proud to put his name next to Starcraft's. Johnny's class all the way.

Own the best value. Own a Starcraft!

The best value in today's van market is priced competitively, fully equipped, built with great attention to detail and holds its value at resale. The best value is a Starcraft! When you purchase a Starcraft, you are buying into an 87-year legacy of quality and integrity. After all, Starcraft revolutionized the van market by producing the first truly automotive-styled van conversion.

Today, Starcraft is still leading the van conversion industry with superior innovation and design. Starcraft offers the finest quality and reliability available today. That's because Starcraft manufactures all major components in-house for complete quality control. The Starcraft warranty is written in plain English

and backed by 87 years of customer satisfaction. A coast-to-coast dealer network, in the U.S. and Canada, is your assurance of prompt and reliable service. We supply comprehensive, illustrated owners and service manuals because we're proud of our products and want you to enjoy them to the fullest. For safety, Starcraft vans meet or exceed all Federal Motor Vehicle Safety Standards and RVIA codes. For your lifestyle, Starcraft has more models, fabrics, colors, standard features and available options than any other brand! And when the time comes, Starcraft has the highest resale value of any van conversion on the market today; just ask any dealer who knows about vans.

Driving Innovations...

Six-Way storage

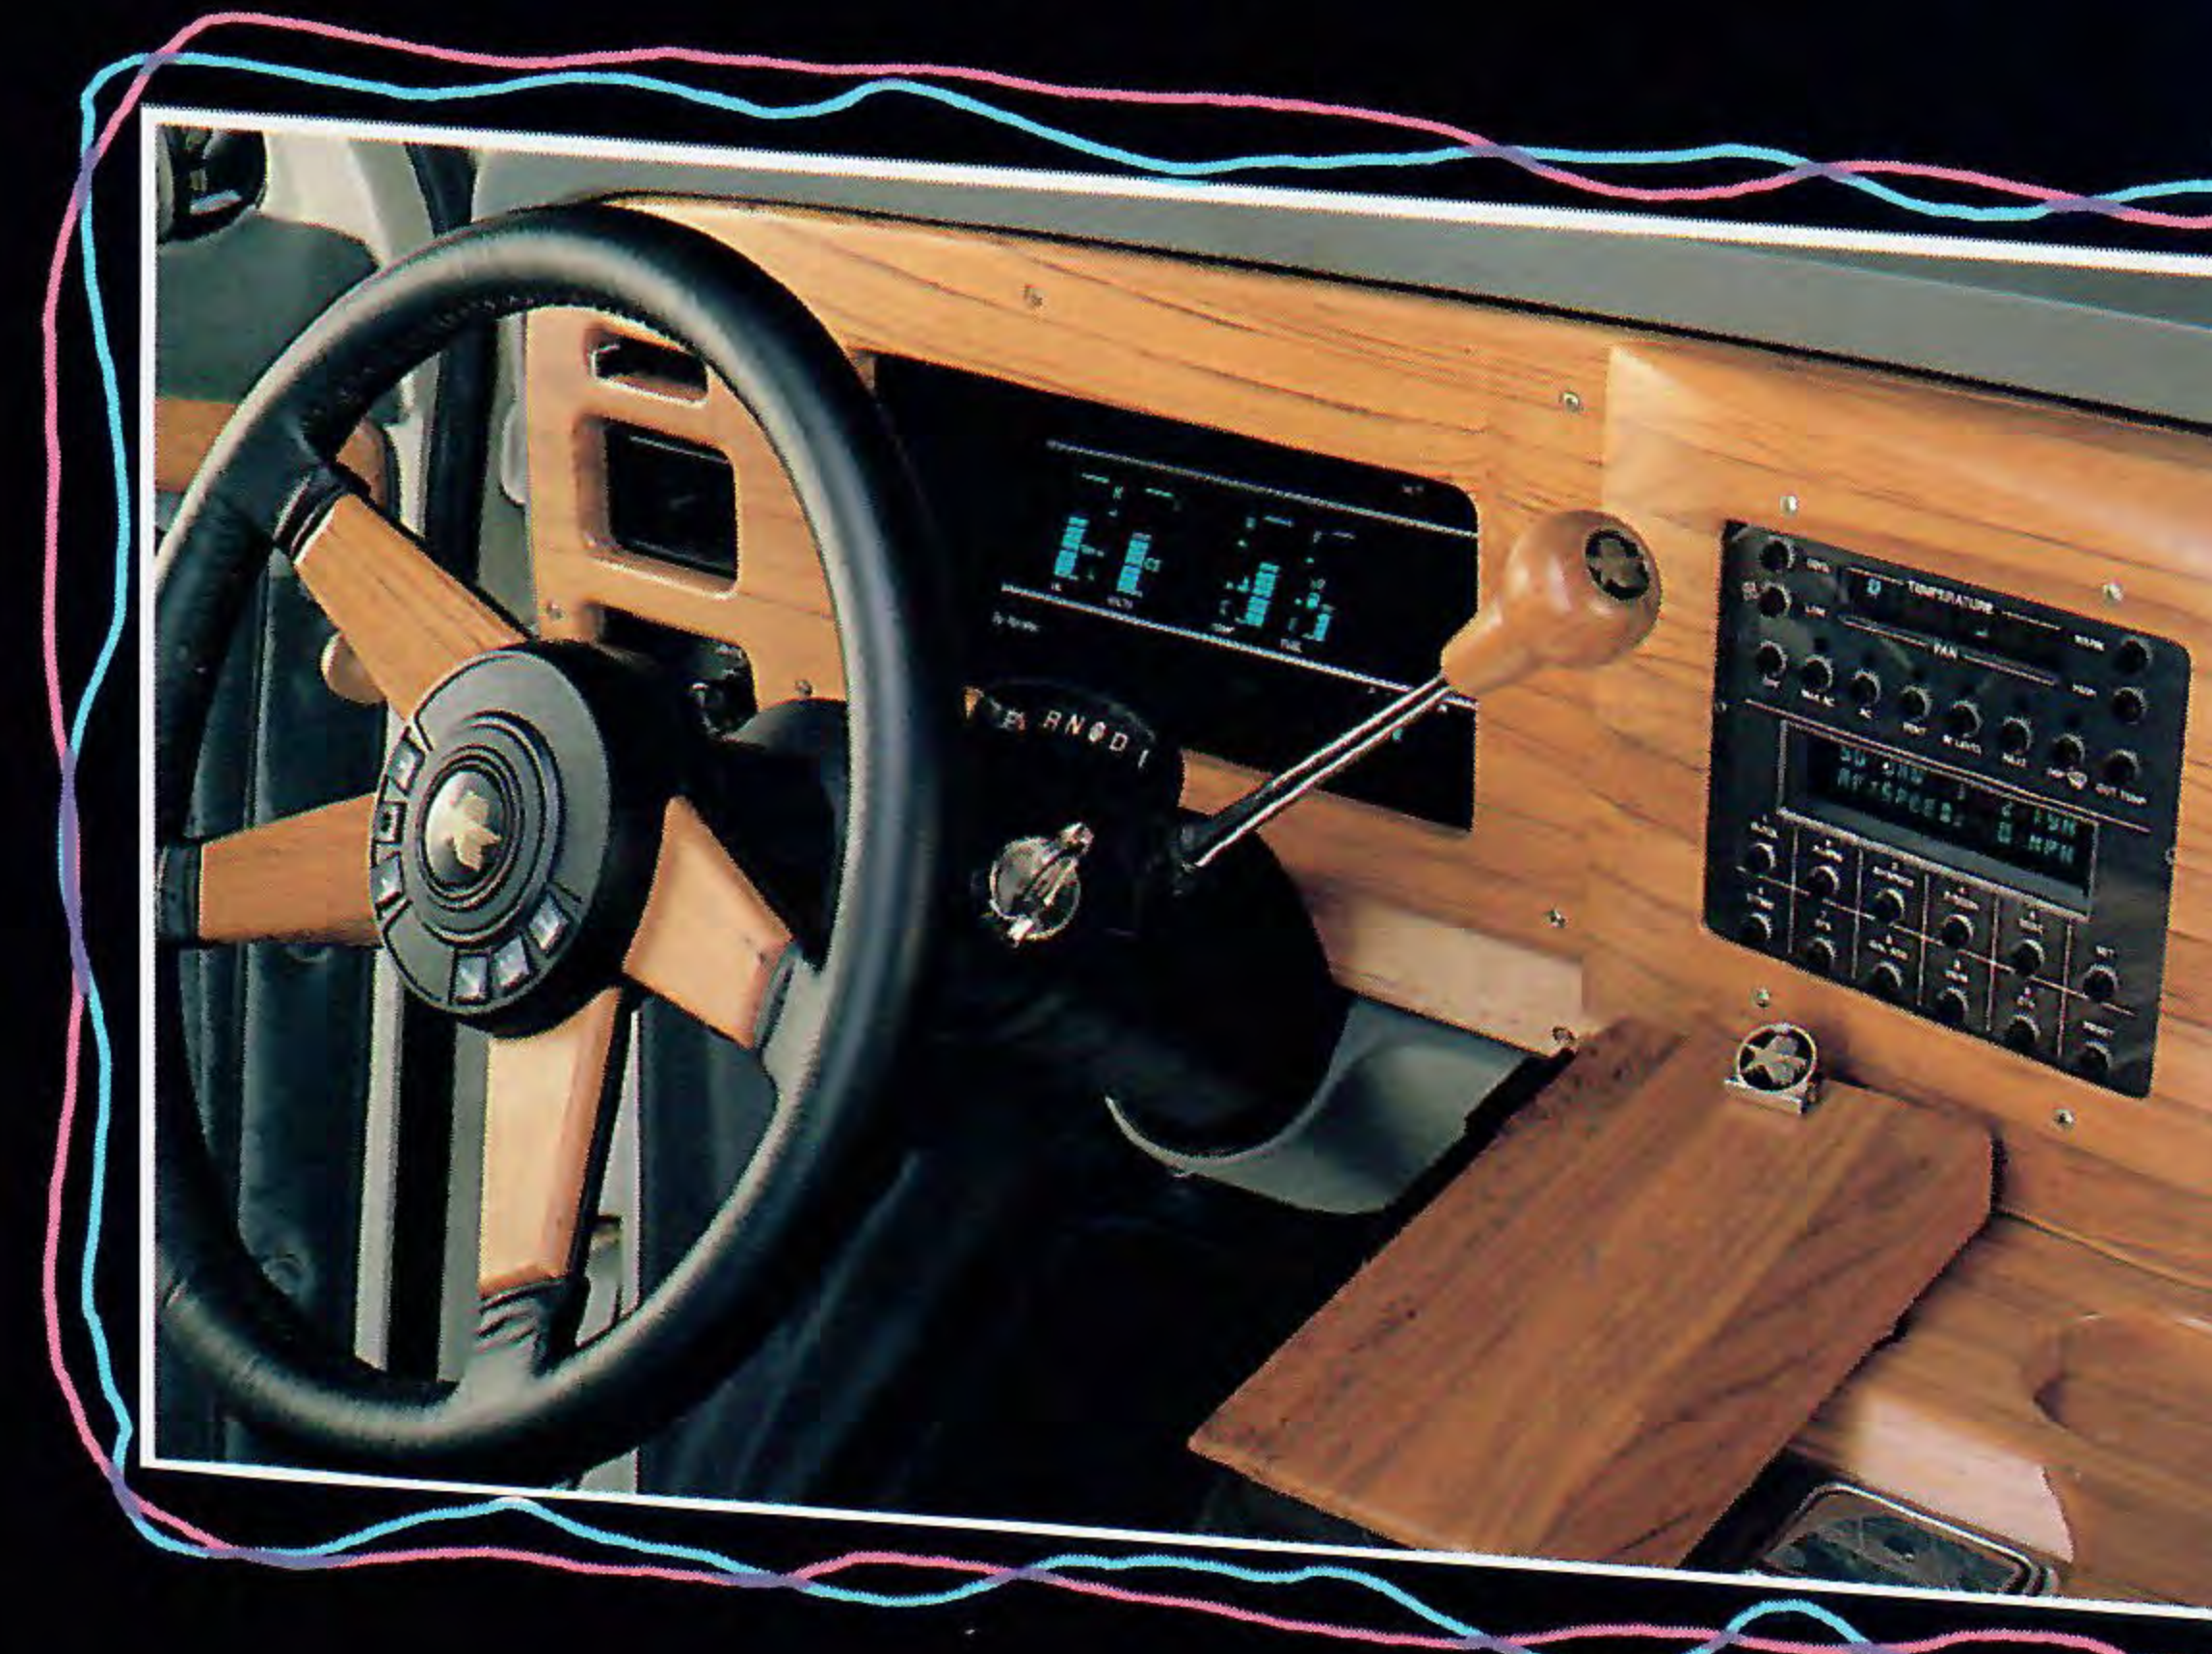

The Six-Way storage system is so unique it's patented! This six position, flexible shelf: (1) completely folds behind the sofa for totally open storage, (2) extends one fold into a storage shelf with storage underneath, (3) extends two folds for added storage—w/o cushion and sofa up, (4) extends completely into a large cargo area—sofa folded down, (5) makes a large 64" x 78" bed when fully extended with cushions in place, (6) makes a smaller bed with sofa up and cushions in place.

*The Starcraft Six-Way storage system should not be occupied while the vehicle is in motion. Never leave young children unattended in your vehicle.

The StarCommand™

This exclusive system features vacuum fluorescent gauges that are easy to read in any light condition. Unlike many digital dashes, StarCommand™ displays all functions simultaneously: speed [miles or kilometers at the touch of a button], fuel level, engine temperature, oil pressure and battery voltage. There is a bar graph tachometer with digital RPM read-out and two trip meters. StarCommand is also a full function trip computer. It incorporates a digital clock with alarm and computes: average speed, average fuel economy, distance traveled per trip, distance to destination, elapsed time per trip, estimated time of arrival, distance to empty, time to empty and even the mileage since your last oil change! StarCommand's computer readout can even be programmed in Spanish.

StarCommand also controls the van's environment.

First with Fiberglass

Another Starcraft innovation was the first one-piece, fiberglass running boards with integral fender flares in the van conversion industry. The Starflair option is a rugged fiberglass trim package with aerodynamic front and rear bumper shrouds, ground effects running boards with integral fender flares, and three-dimensional rocker

panel moldings. No one matches the fit and finish of Starcraft's fiberglass components, which are designed and manufactured in-house to exacting standards. Starcraft's unique raised roof design is aerodynamic, functional on the inside and has a clean appearance. Starcraft fiberglass—first in design, first in quality.

Other Innovations:

- Starcraft was first with a performance suspension option.
- A rear stereo system that only plays through headphones. A necessity with teenagers!
- Furniture quality, hardwood dashboard and instrument panel accents.
- Many more.

Building a reputation for fine quality.

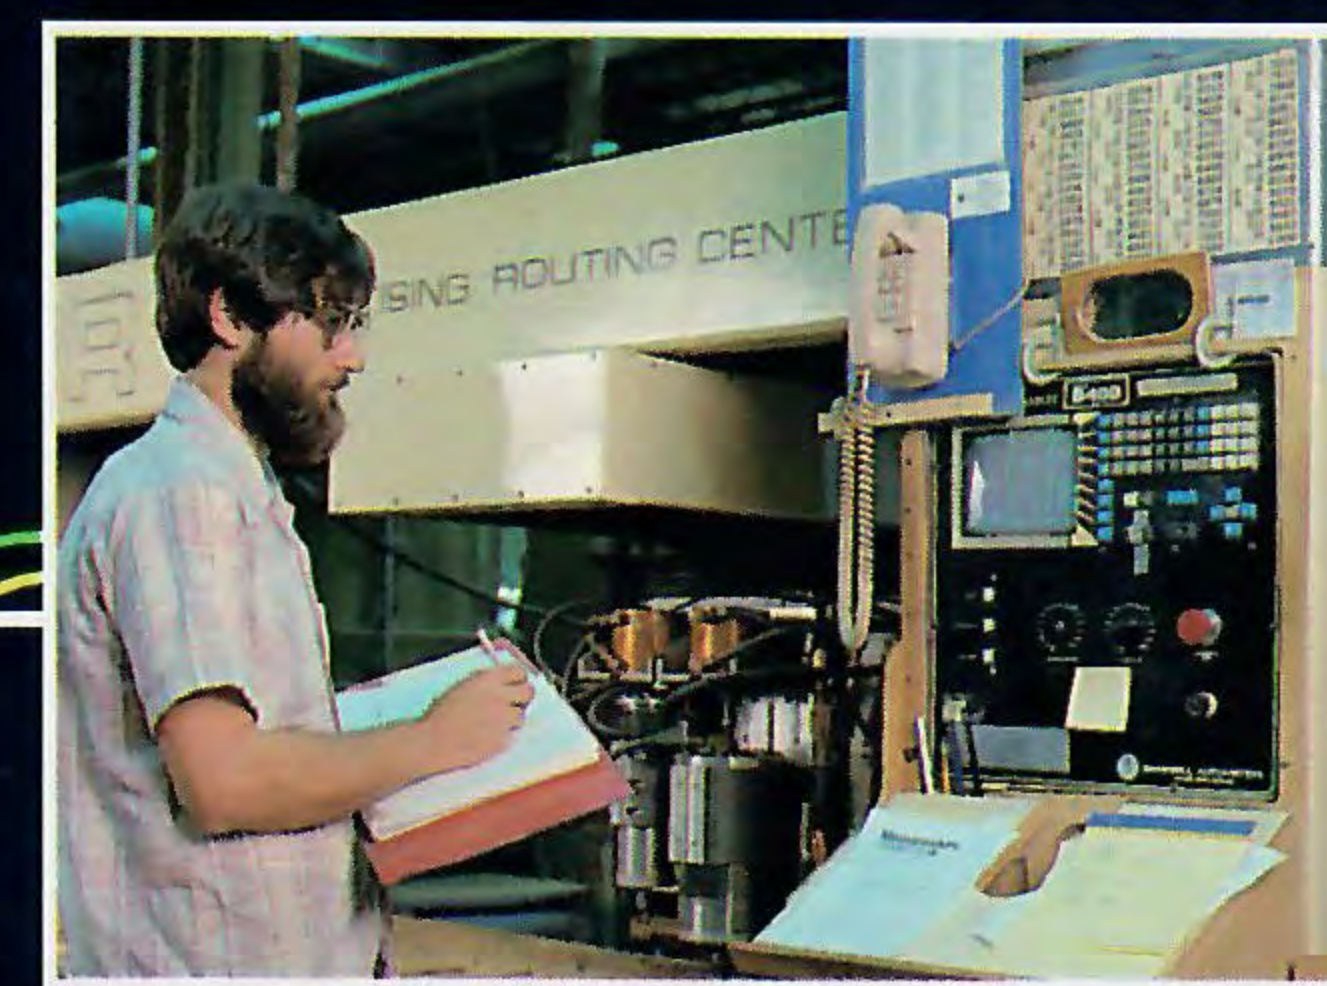

Starcraft is fortunate to have a work force dedicated to producing products of world class stature. Each van is hand-crafted to meet the highest quality standards. Our attention to detail makes us the most respected name in vans. That's why Starcraft is the leading American brand in Japan and Sweden—two countries known for discriminating auto consumers.

Upholstery is meticulously sewn in our own state-of-the-art manufacturing facility. Starcraft builds a better seat for your comfort and safety.

Handcraftsmanship is alive and well in the Amish country of Northern Indiana, Starcraft's home. Teak and oak wood accents are finished by hand.

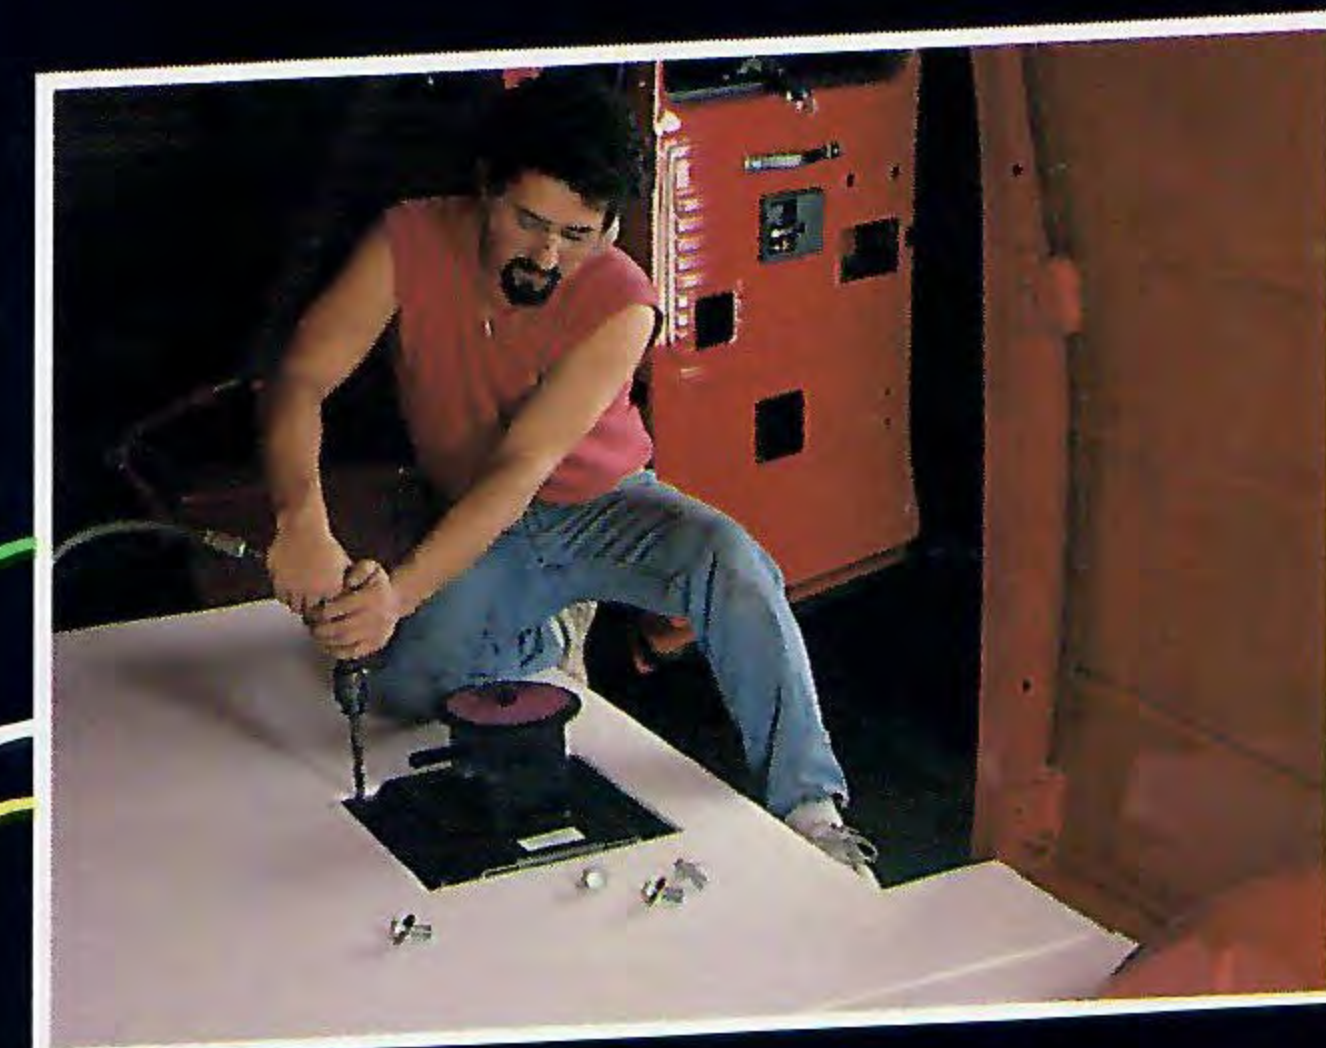

Old world craftsmanship meets high technology in Starcraft's 150,000 square-foot woodworking facility. This computerized router cuts wood to exacting tolerances for a perfect fit.

Color-coded wiring systems plug together without splices. All plug connections are soldered and insulated. Wiring harnesses use resettable circuit breakers instead of fuses.

Foam injection means a quieter, more enjoyable ride. No one provides a better combination of sheet insulation and injected foam than Starcraft.

Improved for 1990! Plywood underlayment has been replaced by a dense, molded foam underlayment that conforms to the bed of the chassis.

Starcraft's custom built seats assure your family's safety. Pedestals of 8-gauge steel are secured to the chassis with grade five hardened steel bolts torqued to 60 ft. pounds of pressure.

Starting with rugged recliner frames of 16-gauge, square-tube steel, we custom build our seats with dense, durable molded foam and the finest automotive fabrics available today.

After ports are cut for the Vista Bay windows, rustproofing is applied to the exposed metal edges. Attention to details like this give Starcraft vans the highest value at resale.

All exposed edges on our carpeting are serged for a clean look and great durability.

Our headliner has four layers for a quiet ride and better insulation properties: steel or fiberglass, injected foam in roof ribs, dense foam and durable fabric. Wood trim is standard.

Starcraft uses heavy grade jute-backed, 100% heat-set 26-ounce nylon carpeting. Matching carpet floor mats have a foam backing that helps keep them in place.

Each Starcraft van goes through a stringent, quality control approval system before it ships to your dealer. At Starcraft, we are proud of our high quality standards.

Fast and reliable parts and service is one of the greatest values of owning a Starcraft. Replacement parts usually ship to our dealers within 24 to 48 hours of the order!

Starcraft has satisfied over two million customers in 87 years of continuous operation. Now that you're considering owning a van, own America's best choice—own a Starcraft!

The GT—What first class travel was always meant to be.

Some units may be shown with optional equipment.

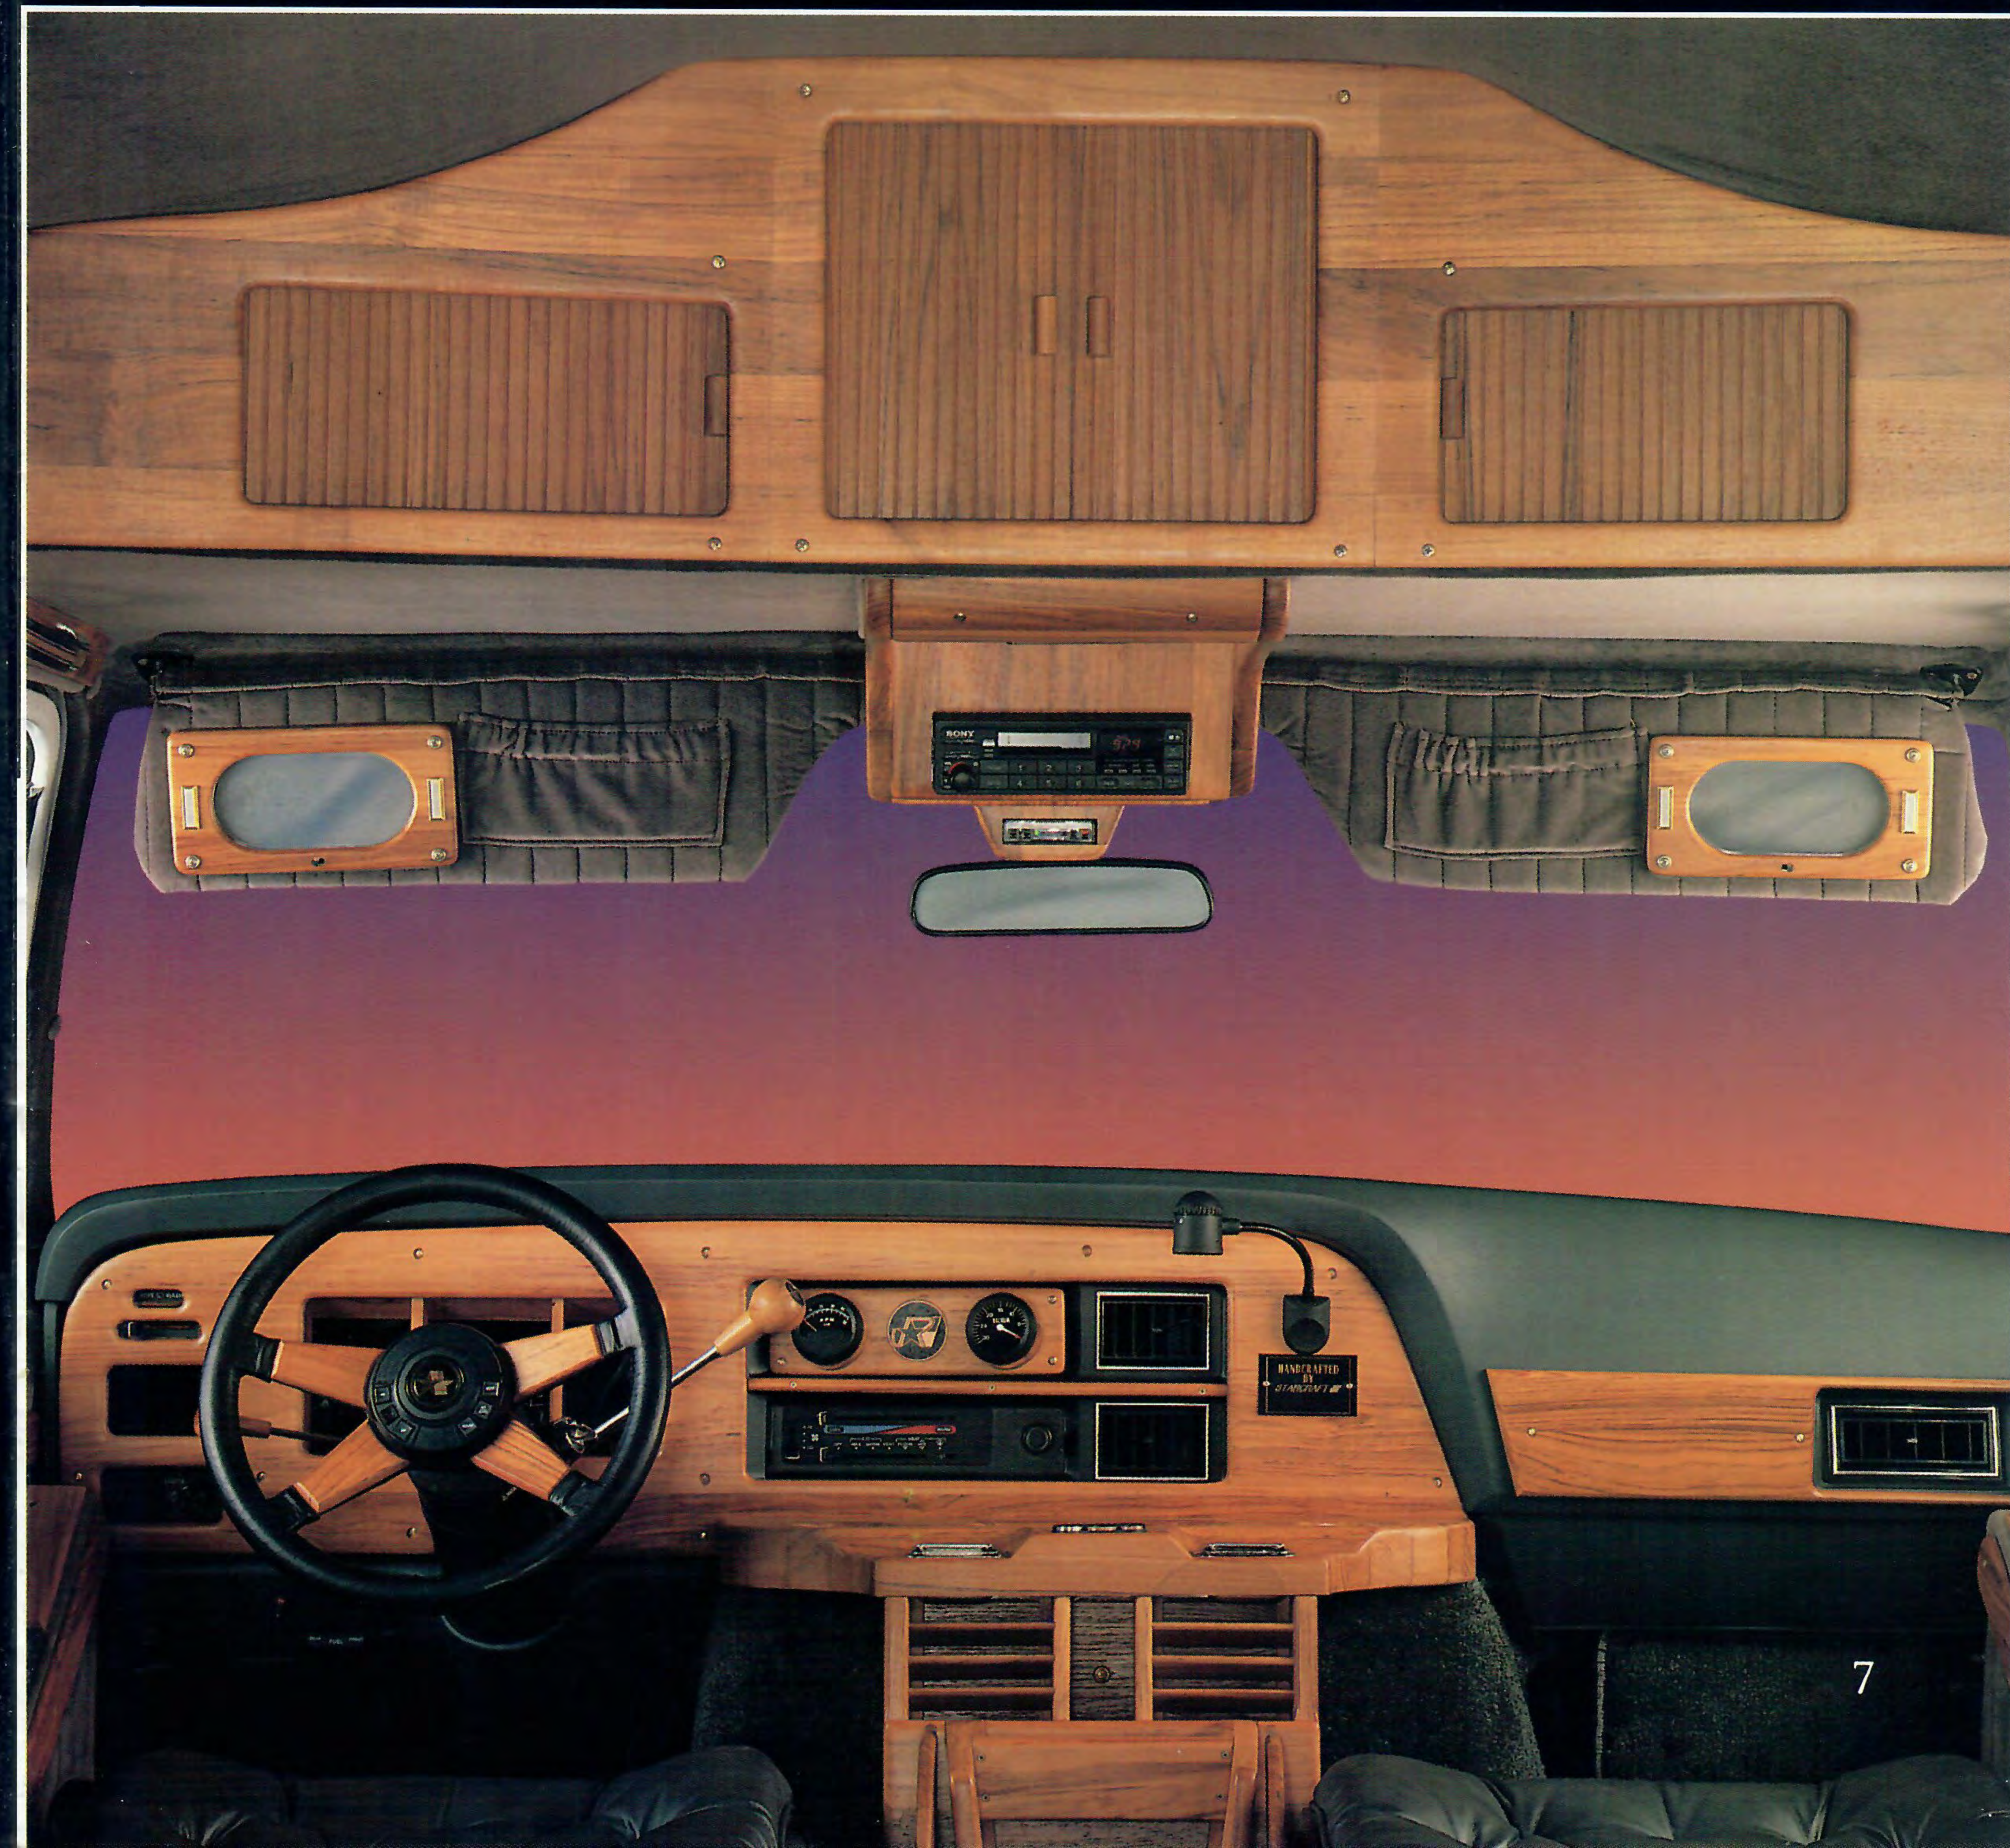

Luxurious GT interiors are loaded with new standard features for 1990. The rear air conditioner/heater with solid teak cowling is now a standard feature. Teakwood accents, such as the new tapered teak valances, are upgraded for 1990. Our new high luster fabric is so tough it's covered with a three year limited warranty!

Starcraft's raised roof option adds another dimension of comfort to your driving experience. A third color accent stripe, in the color of your choice, enhances this year's exterior. GT models include fiberglass running boards with integral fender flares at no extra charge!

The incomparable GT Series solid teak dash surrounds you with all the conveniences and control it takes to handle the fastest commute or the longest family vacation! Standard features include a gooseneck map light and coin holder. The raised roof option turns the passenger area into an entertainment area with a 10" color TV, VCP and tape storage. Teakwood tambour doors hide equipment from view when it's not in use.

The GT—Nothing can compare. It's unsurpassed!

Experience the Starcraft GT. Discover interior appointments that surpass today's finest luxury automobiles. Spacious interiors allow you room to stretch. Exotic, exquisitely crafted teakwood is used generously throughout. Each superbly comfortable seat surrounds you with warmth and support you never thought possible in an automobile. The GT oak cluster embroidery on the headrest adds a classic touch. As a result of Starcraft's superior design and engineering, all the elements needed for the ultimate cruising experience are right at your fingertips. The Starcraft GT has an aura of refinement

unmatched by any other vehicle. Shop and compare. The GT has more quality construction, standard features and options than any other manufacturer.

GT seats for 1990 are larger for improved support and comfort. Choose from 12 colors of upholstery in fabric, vinyl or leather.

Luxury conveniences in the Starcraft GT include a solid teakwood pedestal table, rear-door refreshment center and storage area, sunglass pockets in the visors and foam-backed carpeted floor mats. A roomy ice chest and matching tool storage box are hidden under the rear sofa.

More teakwood trim is used throughout the 1990 GT. Note the tapered teakwood valances, ceiling trim and sidewall accents. You won't find comparable detailing anywhere!

New for 1990, these fabric coated window shrouds house the matching day/night shades in the Vista Bay windows and the side and rear doors. These shrouds are made of a tough molded material and coated with a fabric substance that is durable and soft to the touch.

Door panels are designed to be as visually pleasing as they are functional. Electric windows, auto-

matic door locks and an optional mirror adjustment knob are at your fingertips. Room for optional speakers and a standard storage pocket are found below the armrest. Additional upholstery along the bottom of the window covers the metal so it's soft to the touch.

The GT exterior is clean and tasteful. Starcraft has always been dedicated to the automotive styled conversion. Our designers strive for the perfect blend of utility and style. The luggage rack on the roof of the 1990 GT doubles as a TV antenna. New landau lights and a high mounted brake light accent the exterior. Tinted Vista Bay windows are the highest quality automotive glass and include vents with screens. Painted graphics are of durable DuPont Centari enamel in chassis manufacturer colors. The paint is heat cured by an infra-red system and we only use top quality 3M accent graphics. Fiberglass running boards with integral fender flares conform perfectly with the lines of the van so they never look added on. For the ultimate exterior look, turn heads with Starcraft's Starflair option and raised roof. Inside and out, the Starcraft GT offers you more!

Deep, dual map pockets are a convenient feature on the back of each seat. The teak

tissue holder on the seat base is easy to reach for both driver and passenger.

The LX—Compared with the competition's "finest," LX wins.

The elite package #1 gives you the choice of two styles of overhead consoles. The overhead extension console, shown here, houses a CB radio, tachometer, clock, switch panel and tissue holders. The other style console is similar to the GT unit pictured on page seven, only in oak.

The mid-range Starcraft LX surpasses the competition's best—hands down! Compare the LX's extensive list of standard features and luxurious conveniences to the competition's top models, and you'll see that the LX is by far the best value.

The 1990 LX is loaded with so many standard features that it is approaching the status of our legendary GT. Redesigned seats are larger and feature a textured pattern and button-tufted upholstery. Remove the rear seats easily with Starcraft's new quick-release pedestals. New fabrics enrich the interior of the LX and we install 26-ounce 100% nylon carpet for high durability. More finely-finished oak enhances the dash and passenger areas and doors than ever before. An incredible list of standards on the LX interior includes: solid oak overhead switch console with dome light, high style dash crafted in solid oak, oak beverage tray, two rear speakers, oak window valances, oak ceiling trim, side-mount oak magazine rack with tissue holder and map light,

Rear air conditioning and heating comes standard on the LX. The heating and cooling unit is hidden away nicely behind an attractive solid oak cowling. Optional leather seating adds a distinctive touch to your LX. Fabric interiors are available in silver, dark blue, charcoal, mauve, brown and jade.

TV power outlet with oak plate, indirect lighting with oak trim, gooseneck map light on dash, oak flip-up refreshment table in rear sofa, two-position pedestal table, built-in vacuum on side door, clothes bar and matching drapes and visors.

Today's LX is comparable to our GT model of several years ago—demonstrably the most copied van in the industry. Why buy a lower quality copy when you can own an original.

Choose from a wide variety of exterior color choices and graphics to make your own personal statement. Add a third color to the standard window/body accent stripe if you wish. Starcraft has exterior graphics to satisfy the most discriminating tastes.

Fiberglass running boards with integral fender flares give the LX a distinctive, aerodynamic look at no extra charge! The standard, tinted Vista Bay windows lend an elegant look to the exterior. Other standards include a spare tire holder with stainless steel ring and matching cover, TV antenna/luggage rack with ladder and landau lights.

Starcraft's patented Six-Way storage system and the new rear-door refreshment center combine to make the LX fantastic for tailgating. The LX—Compared to the competition's "finest," LX wins.

Competitors may forget the door panel, but not Starcraft! Complete automotive styling includes insulation, decorative trim, upholstery and carpet along the lower edge.

New for 1990—this rear-door refreshment center provides tables and beverage storage for picnicking or tailgating. The system is made of solid oak and comes as standard equipment.

Starcraft graphics are tasteful and sharp. A third color for the accent stripe is available at no extra charge.

The SL - Loaded with fine detailing and standard features.

The basic SL package includes Vista Bay windows and distinctive graphics featuring a third color accent stripe of your choice at no extra charge.

The SL Series is the most upgraded of all the 1990 Starcraft vans. It's packed with standard features, including a ten inch color TV, and built with the same attention to detail as our GT Series.

The SL Series offers all the across-the-board changes as the rest of our 1990 vans — at no extra charge! Begin with dense molded foam floor underlayment for improved insulation and a quieter ride. Other improvements include: standard six-way storage, built-in vacuum in side door, TV antenna/roof rack and a high mounted third brake light. SL interiors are more luxurious than ever before. The SL's all new seats are almost exactly the same as the 1989 GT seats and feature finer fabrics in a variety of six new colors:

silver, burgundy, jade, blue, brown and mauve. These fabrics are so durable that they carry a three year limited warranty! New quick-release pedestals allow you to remove the center position seats. SL carpeting is now 26-ounce, jute-backed 100% nylon — matching carpeted floor mats are standard.

There's more solid oak than ever before! The new lighted overhead switch panel puts interior conveniences at the driver's fingertips. Solid oak standards include: ceiling trim, magazine rack, sidewall drink holders, pedestal table, dash trim with drink tray, door trim and drapery rods.

But the really big news for 1990 is a ten inch Audiovox color TV in a solid oak floor cabinet. It features space for an optional VCP. And it's all standard.

With beautiful interiors like these, it's hard to believe that the Starcraft SL is so modestly priced. Fabrics are available in six colors and covered by a three year limited warranty. The clean beauty of solid oak is handfinished for a perfect fit and a high luster. The solid oak floor cabinet/table module houses the standard ten inch color TV!

Choose an optional rear air conditioner/heater. The heating and cooling unit is tucked away behind a tasteful solid oak cowl-ing. Hard to believe the SL is an economy model.

These quick-release pedestals allow removal of the center position seats with the turn of a lever. Starcraft wants your van to be as versatile as your lifestyle.

The standard Six-Way storage system handles anything from light hauling to sleeping two comfortably. The system is so unique it's patented. You'll enjoy its simple operation.

Exercise Your Options!

Starcraft has more available options than any other manufacturer. Choose the options you desire to customize your Starcraft van and meet the needs of your lifestyle. Add options that enhance your driving experience and make a personal statement. Here are just a few of the incredible Starcraft options.

This tailgate refreshment center features a stainless steel sink, 2.5 gallon water tank, ice box (12-volt refrigerator is available), and plenty of storage space.

The rear sound system with remote headphones is an independent AM/FM cassette system that plays only through the headphones. Other passengers are not disturbed.

The overhead, center-mounted compact disc player is encased in stylish teakwood or oak. This option includes disc storage that holds six of your favorite compact discs!

The center-mounted, easy-to-remove, overhead radar detector is available in two types. Choose from a Passport or a Fox. All wiring is concealed.

Order this side-mounted Nintendo entertainment center. The package includes cartridge storage and two hand controls. Or order the pre-wired cabinet only.

Only Starcraft offers a performance package with Goodyear Eagle GT+4 tires, front and rear anti-sway stabilizer bars, special mag-style wheels, Koni shocks, tachometer and vacuum gauge.

The power sofa electronically reclines from a sofa to a bed.

Power seats adjust six ways: up and down, tilt front to back, moves forward and back. It's a reliable Delco system.

A new tamboured waste paper basket is both attractive and functional.

The special XR paint treatment is a contemporary alternative to the standard automotive styling.

Choose from four distinctive styles of wheels: Futura, Modular-style, Gold wire modular or the Deluxe.

Remote TV and VCP controls allow programming changes while the vehicle is in motion.

The front bumper step gives easier access to the windshield and folds back into an attractive Starcraft plate.

The remote start allows you to start your van from indoors so it is warmed up or cooled down by the time you're ready to go.

Order the floor console with a ten inch Audiovox TV and VCP for the ultimate entertainment center.
