Duster

SUNDANCE: AFFORDABLE FUN DUSTER: EXPRESSIVE PERFORMANCE

The 1993 Sundance and Duster, with more than 40 standard features including a driver-side air bag, are among the best-equipped family cars in the small-car class. Along with its welcome affordability, Sundance is sporty, fun to drive, durable, and dependable. There are other things to like about Sundance... contemporary aerostyling, front-

Duster

Sundance

wheel-drive engineering, agile performance, comfortable seating for five, and liftback versatility. But safety doesn't take a back seat to fun and practicality in this car. A major new safety advantage — four-wheel

antilock disc brakes — is now available. Other safety features such as child-protection rear door locks and side door beams are standard (see details on this page and on page 15). Duster offers all the qualities of Sundance, plus a distinctively sporty personality with standard V6 power, and more. Individual tastes are further accommodated

with the choice of two-door or four-door body styles, making Duster and Sundance fully capable of meeting the needs of the single commuter or the young family. Clearly, Duster and Sundance main-

tain Plymouth's tradition of delivering a lot of car for the money. Add to this the strong Owner's Choice Protection Plan (see page 19), and you've made an even wiser choice. **Advantage: Sundance.**

SAFETY FIRST

■ Driver-Side Air Bag

Provides added safety for the driver when used with a lap-and-shoulder restraint. Standard.

■ Three-Point Unibelt Restraint System

Standard lap and shoulder belts help protect outboard front- and rear-seat passengers.

■ Four-Wheel Antilock Disc Brake System

Contributes to braking stability on slippery roads, helps driver maintain vehicle control during hard braking. Optional.

■ Child-Protection Rear Door Locks

Help keep kids secure while riding in the rear seat. Child-protection locks are standard on four-door Duster and Sundance models.

■ Energy-Absorbing Bumpers

Standard steel front and rear bumper reinforcements offer protection that meets federal impact safety standards.

SPORTY AND VALUE-PACKED

Duster

Duster's sporty styling features a monochromatic look, power dome hood, 15-inch Triad wheel covers, and "Duster" deck lid and bodyside decals. Handling is quick and precise, thanks to an advanced sport suspension, speed-rated steel-belted radial tires, and power-assisted 16-to-1 ratio rack-and-pinion steering.

The color-keyed standard rear spoiler is another distinguishing mark of Duster's sporty design.

A smooth, responsive standard 3.0-liter OHC (overhead cam) V6* MPI (multipoint fuel-injected) engine gives Duster its exhilarating performance.

*See page 16 for details.

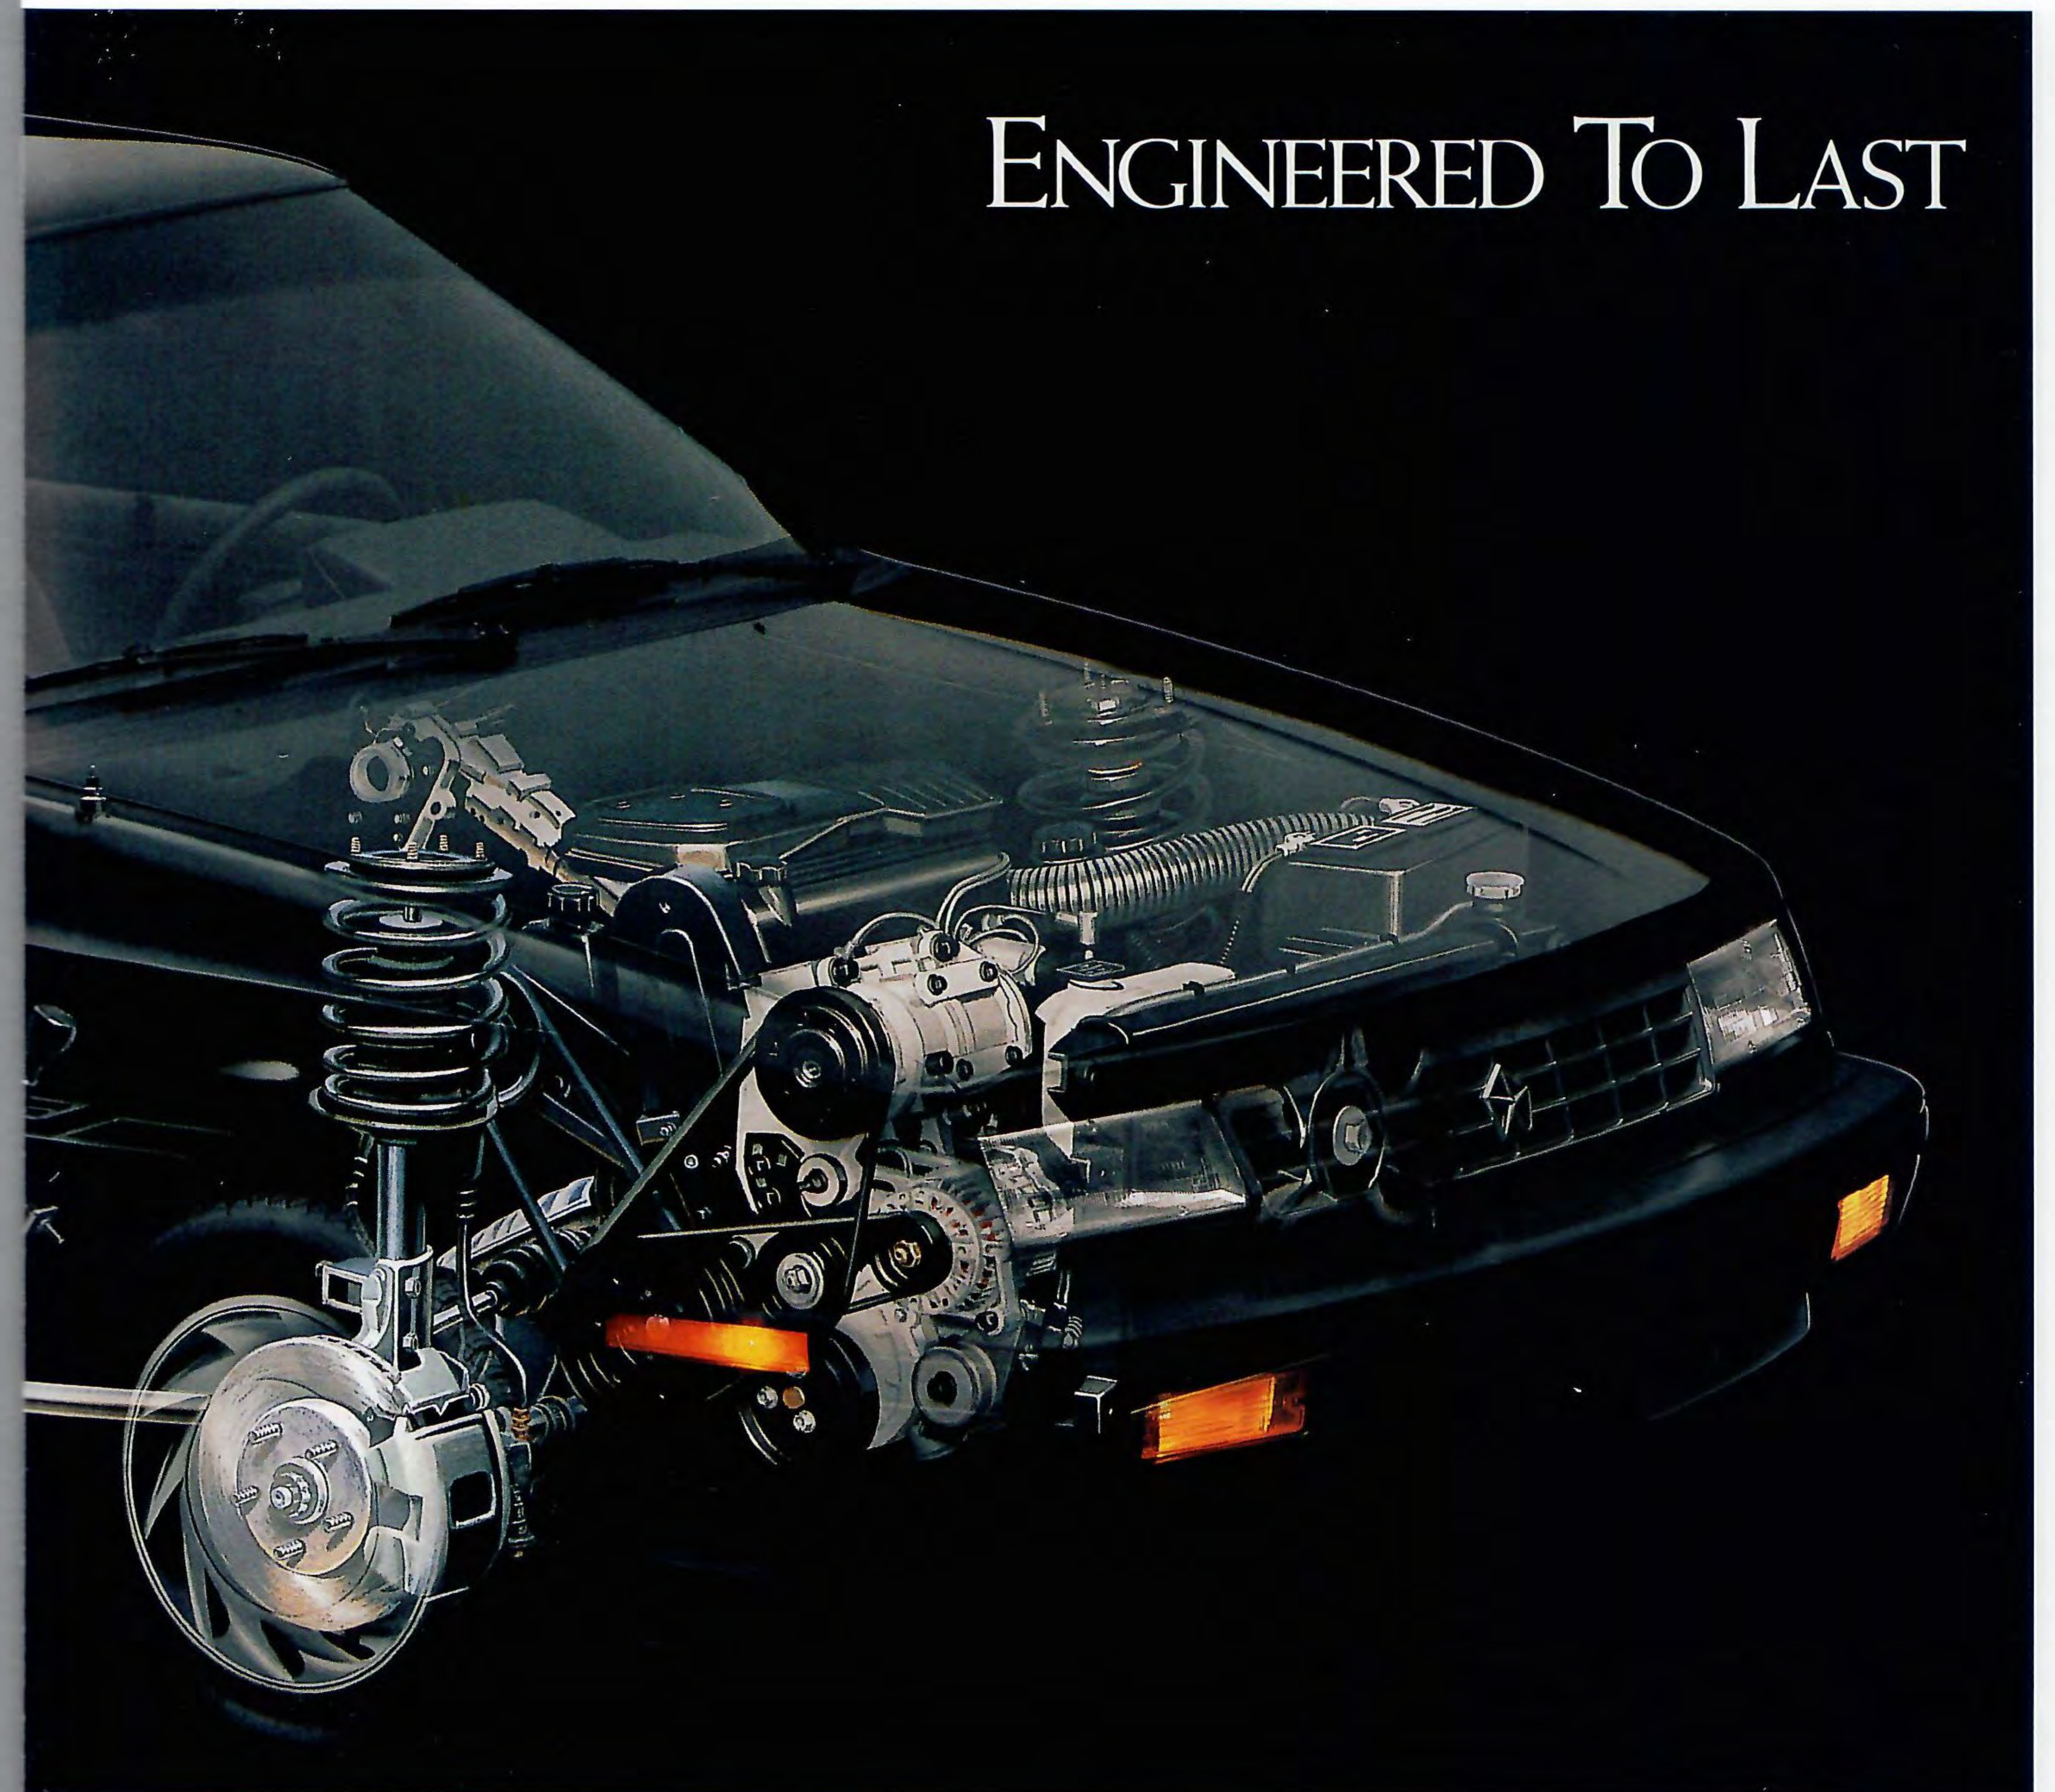

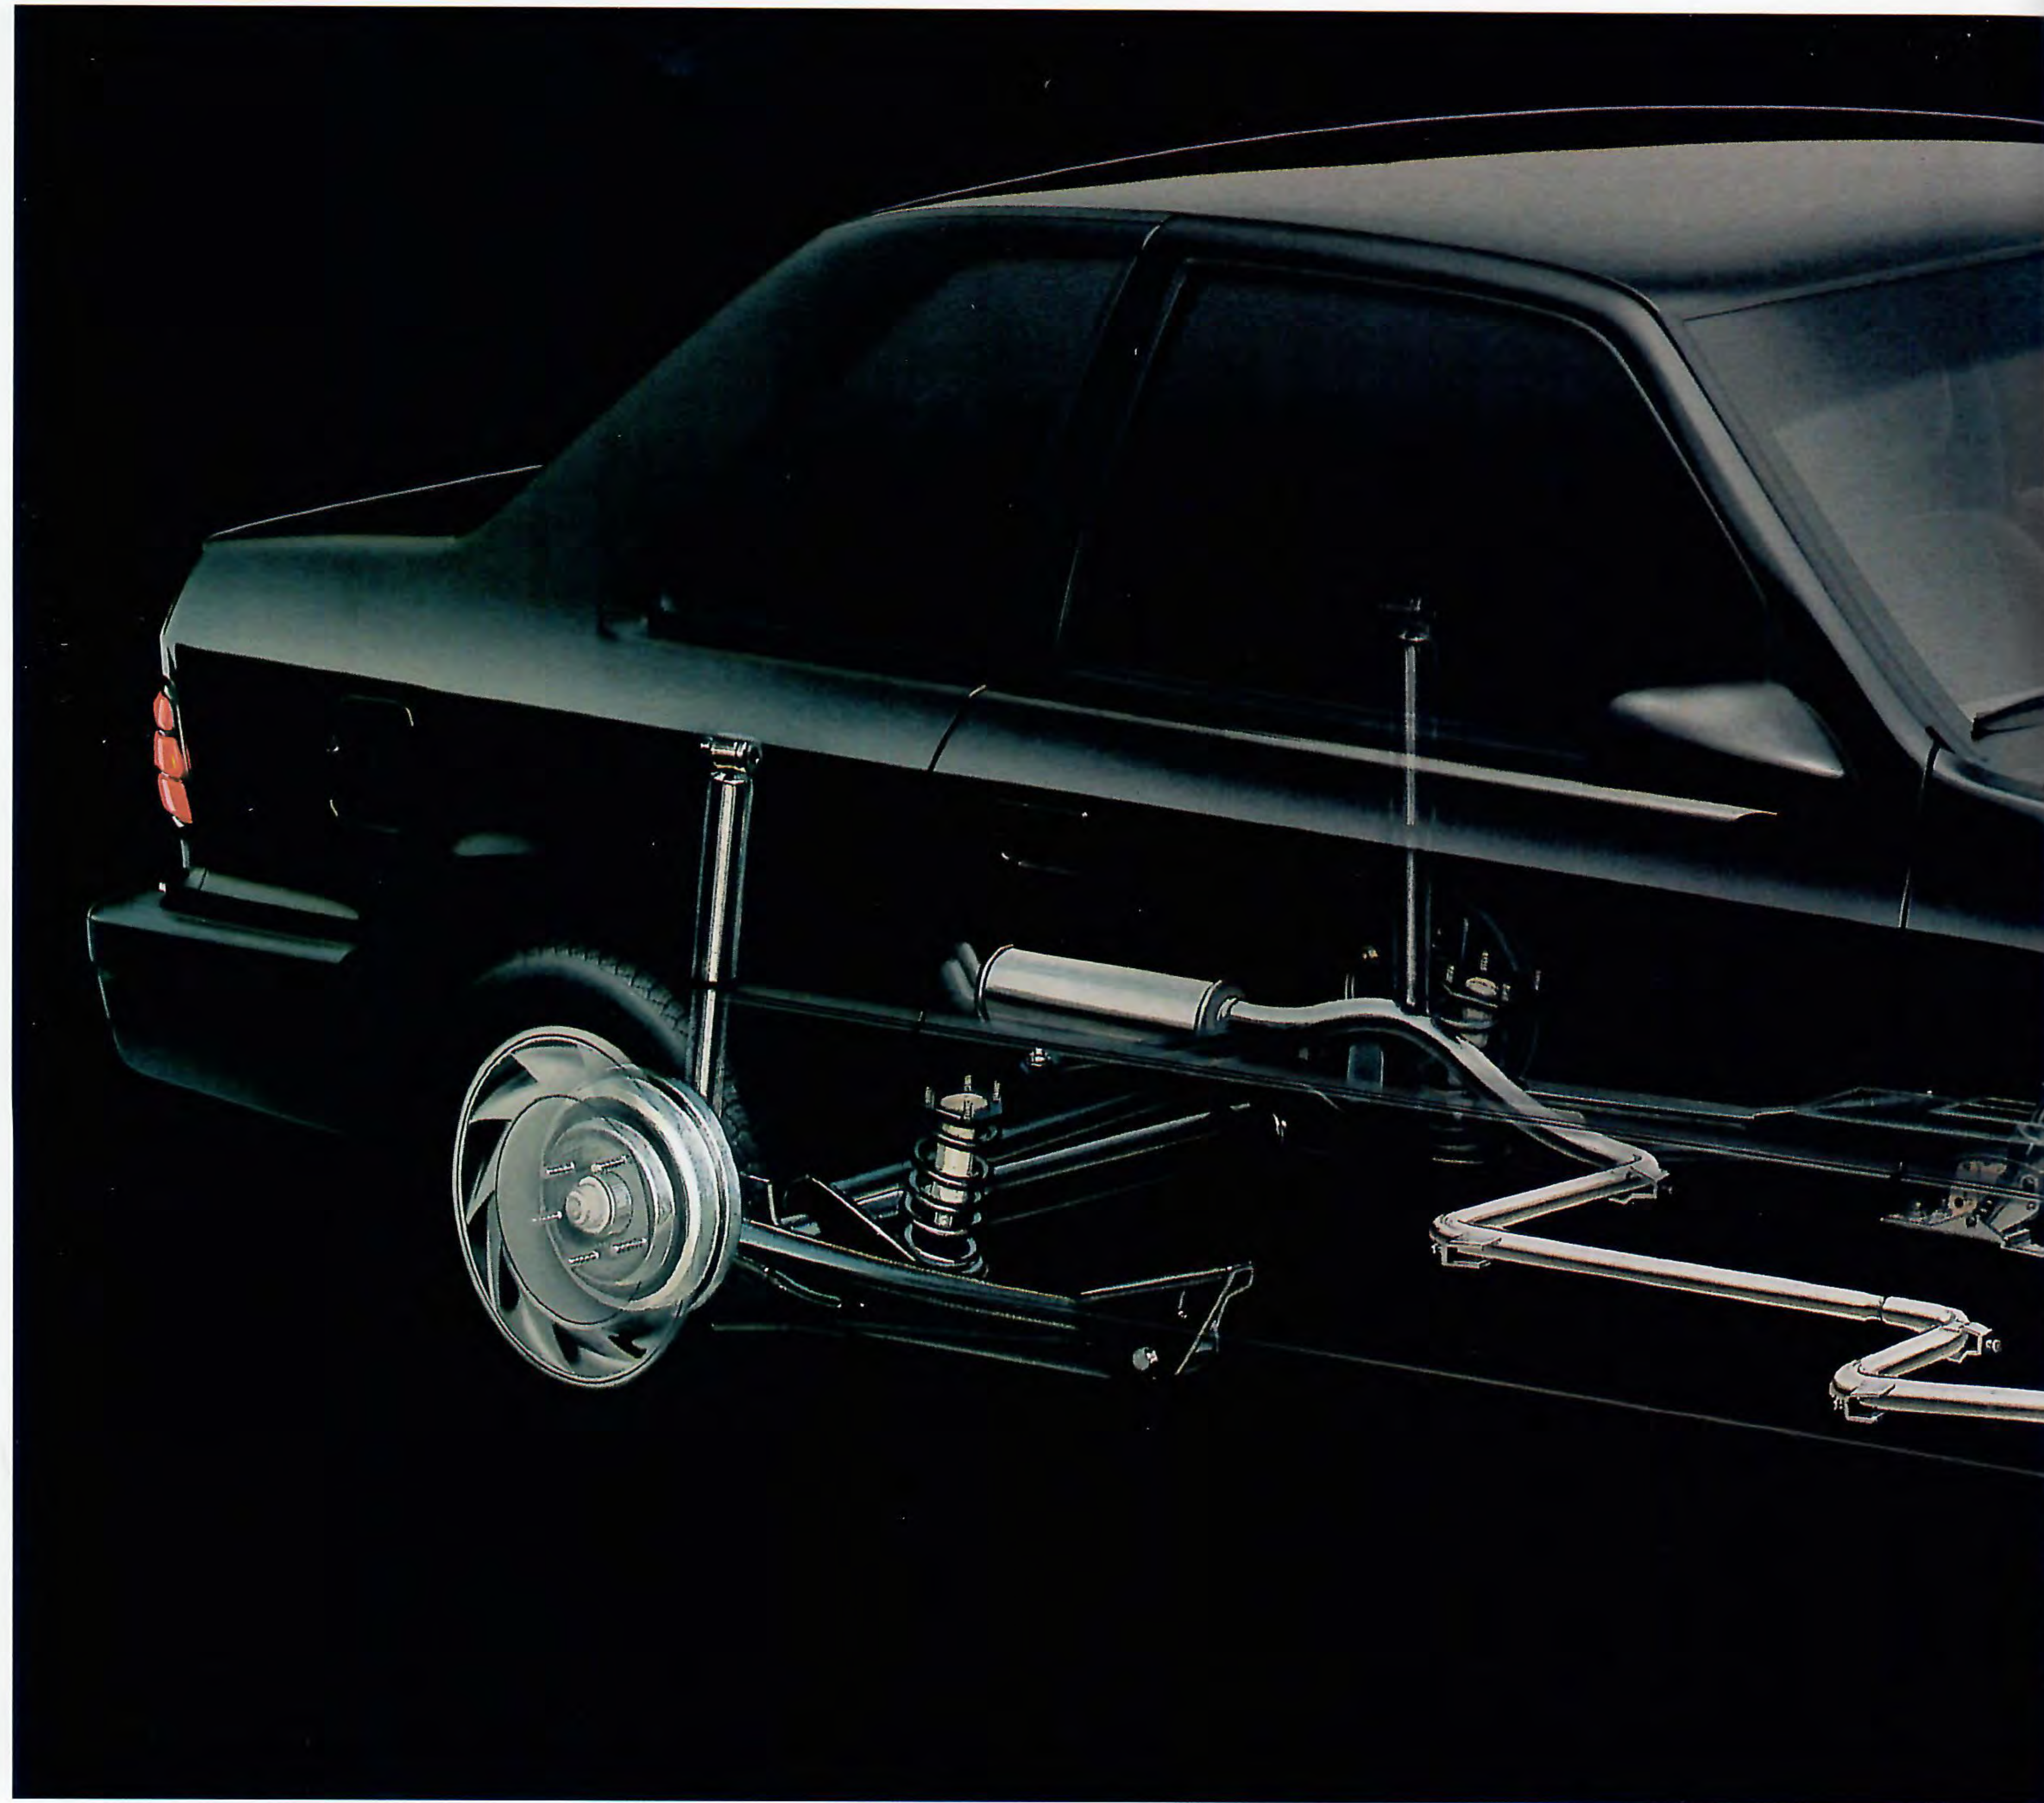

Speed- and impact-sensitive retractors cause the seat belts to operate instantly during severe deceleration or in a collision.

Simulated air bag deployment shown.

The standard driver-side air bag has proved its outstanding reliability in extensive crash testing and in service.

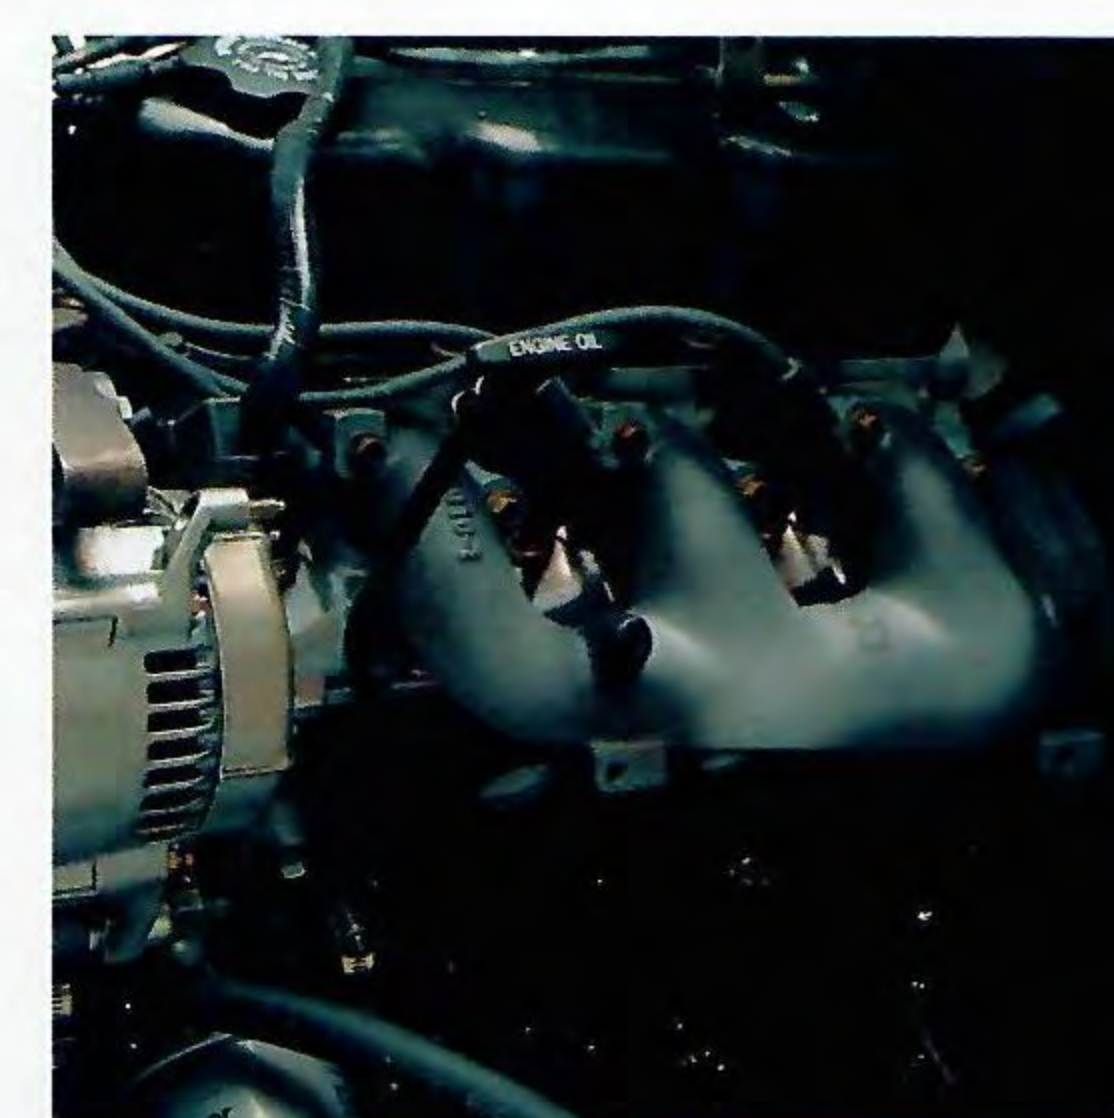

ENGINEERED TO LAST

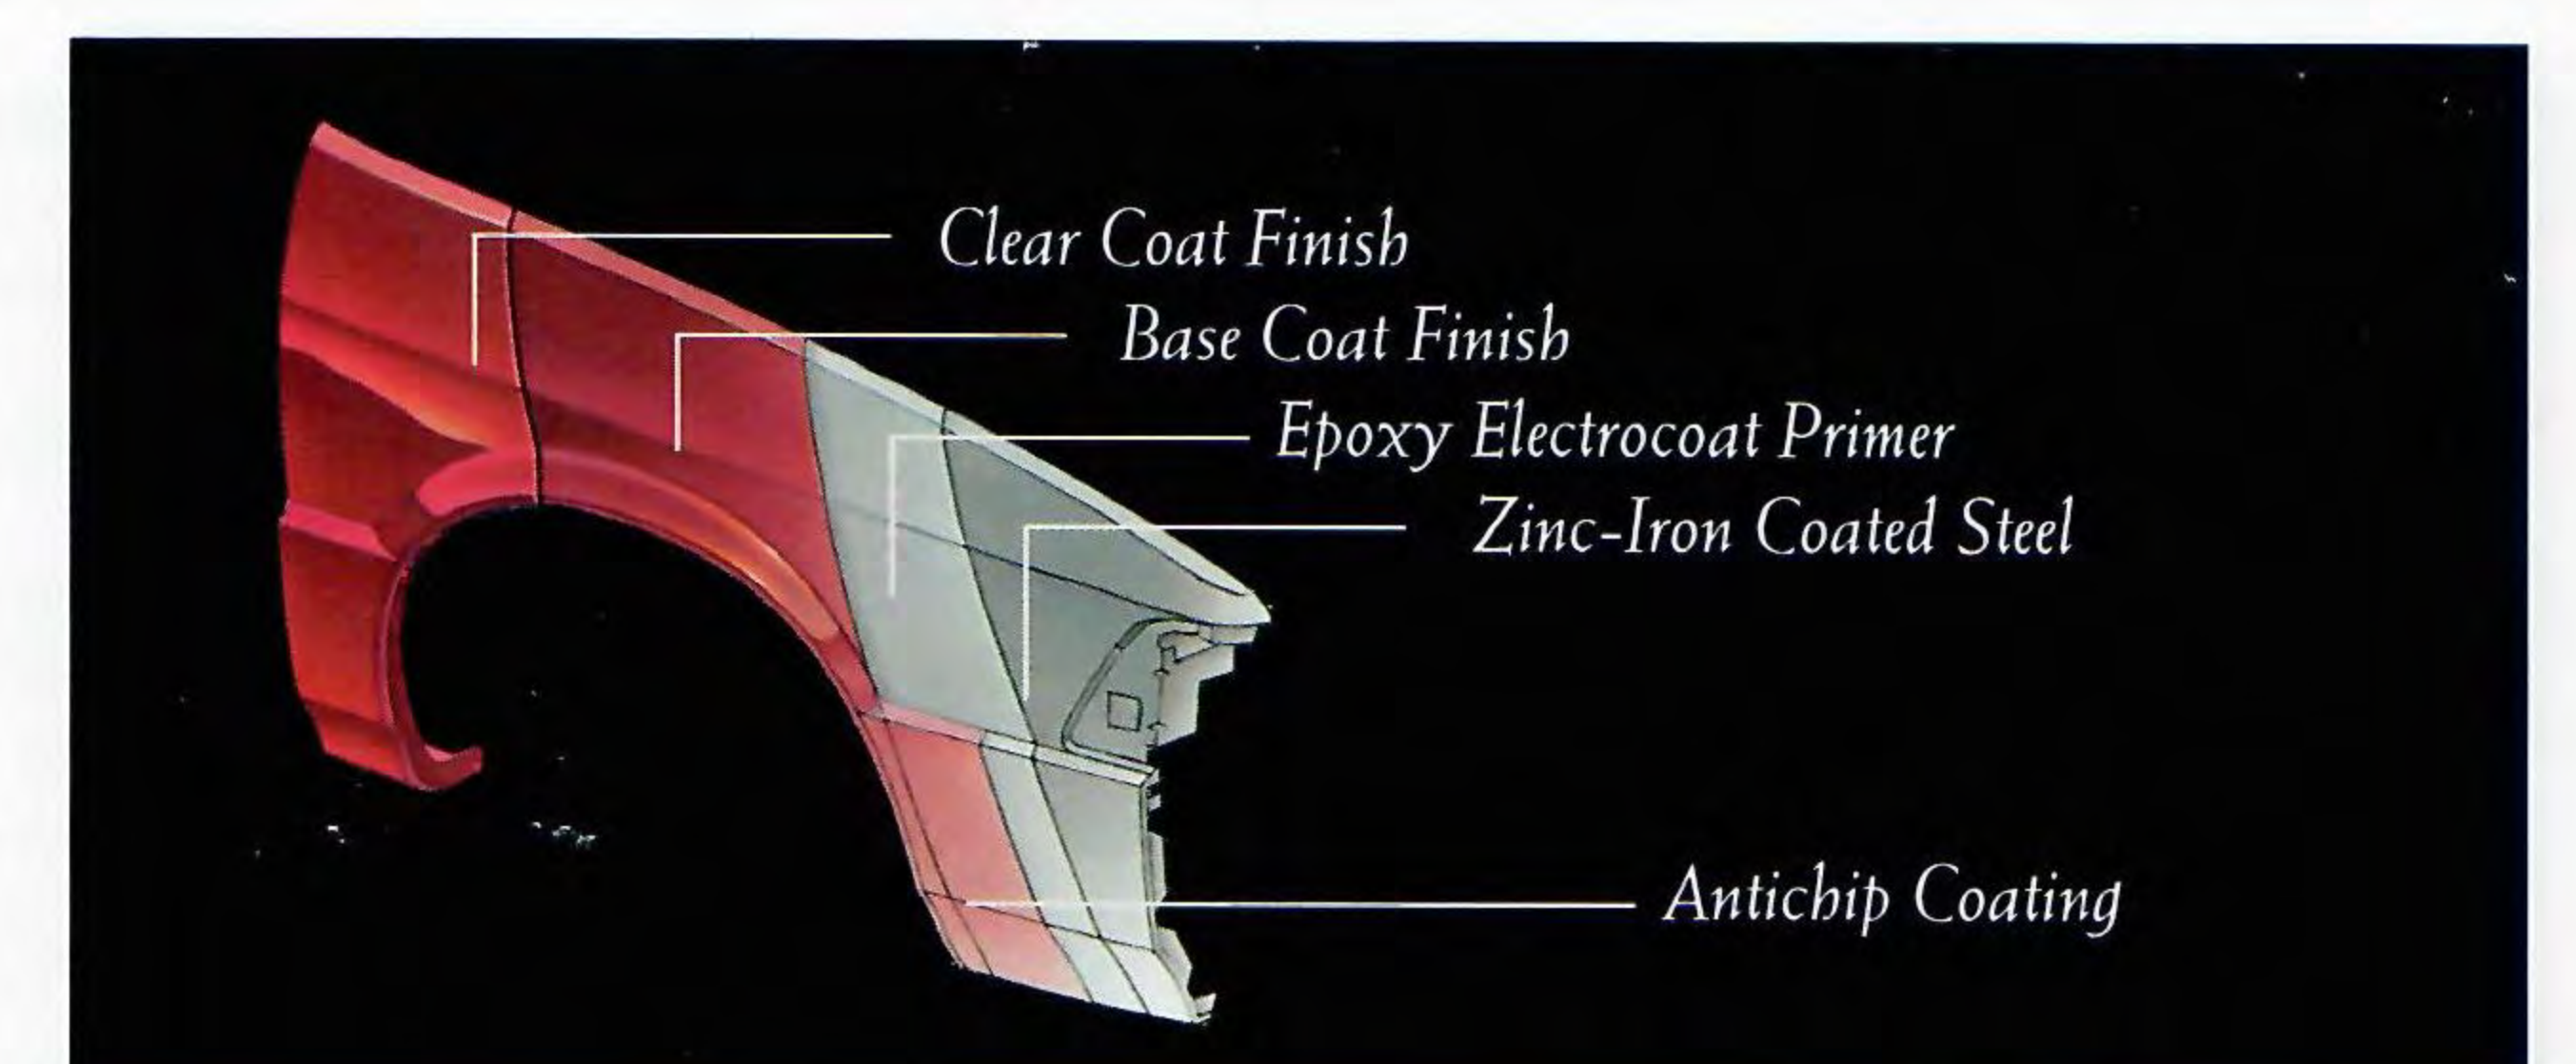

Crash characteristics of vehicle body and chassis components are accurately measured through extensive collision testing. Computer simulation is another process for achieving the goal of maximum driver and passenger safety.

New for 1993, a vacuum-boosted antilock disc brake system is available on all Duster and Sundance models for increased stopping power.

To ensure long service life, Plymouth engine designs must pass demanding 800-hour endurance testing.

Anticorrosion protection: All body panels, except roof, are two-side galvanized/galvannealed, then three layers of primer, paint and clear antichip coatings are applied to create an environmentally resistant mirror finish.

Duster

SPORTY AND COMFORTABLE

Duster value includes one of the roomiest passenger compartments in its class, with comfort for five. Sporty-looking cloth with vinyl trim low-back, reclining front bucket seats are standard. The three-passenger rear bench seat with fold-down rear seatback can easily handle long cargo. The standard

mini floor console includes a front storage bin, floor shifter and rear cubby bin. Those who want extra style and convenience can choose the optional full center console (shown above) with front storage compartment, dual slide-out cup holders, cubby bin and center armrest that covers a storage area.

Duster's optional integral compact disc player features fast forward/rewind, track scan, pause, elapsed time display, five-band graphic equalizer, and much more.

Duster's instrument panel emphasizes driver control and convenience with a sporty flair. A tachometer and a new AM stereo*/FM stereo radio with cassette player or integral CD player and four-speaker system are optional. Also, air conditioning† and electronic speed control are available.

*Some AM stereo broadcasting may not be compatible with this radio.

†There are special engine cooling requirements for field-installed air conditioning. Failure to follow these requirements may invalidate warranty. See your dealer for details.

Sundance

SPIRITED BUT SMOOTH

A standard 2.2-liter SOHC (single overhead cam) EFI (electronic fuel-injected) engine means driving responsiveness in Sundance. For still livelier action, a 2.5-liter SOHC EFI 100-horsepower engine is available. Both offer increased power for '93 and can be teamed with a

standard five-speed manual overdrive transaxle or optional three-speed automatic. And the precision-feel suspension system works well with the power train. Components include gas-charged front dual path Iso-Struts, gas-charged rear shock absorbers, plus front and rear antisway

bars. Sundance's performance is complemented by a good-looking exterior. New 14-inch Bullet-design cast aluminum wheels (set of four) and other features are available for customizing Sundance through Customer-PreferredSM Packages (see page 17).

Sundance rewards its driver with nimble performance and a sense of fun behind the wheel.

A well-balanced front-to-rear weight distribution enables Sundance to handle lane-change and slalom maneuvers with confidence on the Chrysler test course. Directional stability is engineered into the car from the wheels up.

Sundance

AFFORDABLE AND VERSATILE

With a highly affordable price and a standard driver-side air bag, Sundance is a value-packed alternative to higher-priced imports. The impressive level of standard features includes power-assisted steering, power-assisted front disc and self-adjusting rear drum brakes,

front-wheel-drive engineering, a long-lasting stainless steel exhaust system, and reduced rolling resistance steel-belted radial tires (set of four) with all-season tread. Inside, Sundance offers the comfort of standard cloth-and-vinyl-covered door trim panels, full cargo compartment

carpet trim, and a luxury steering wheel with the integral air bag. The versatile liftback (shown right) provides 30.8 cubic feet of cargo-hauling ability with the rear seatback down. A removable rear shelf panel (not shown) conceals items stored in the cargo area.

An electronically tuned AM/FM stereo radio with cassette player, four speakers and integral digital clock is available.

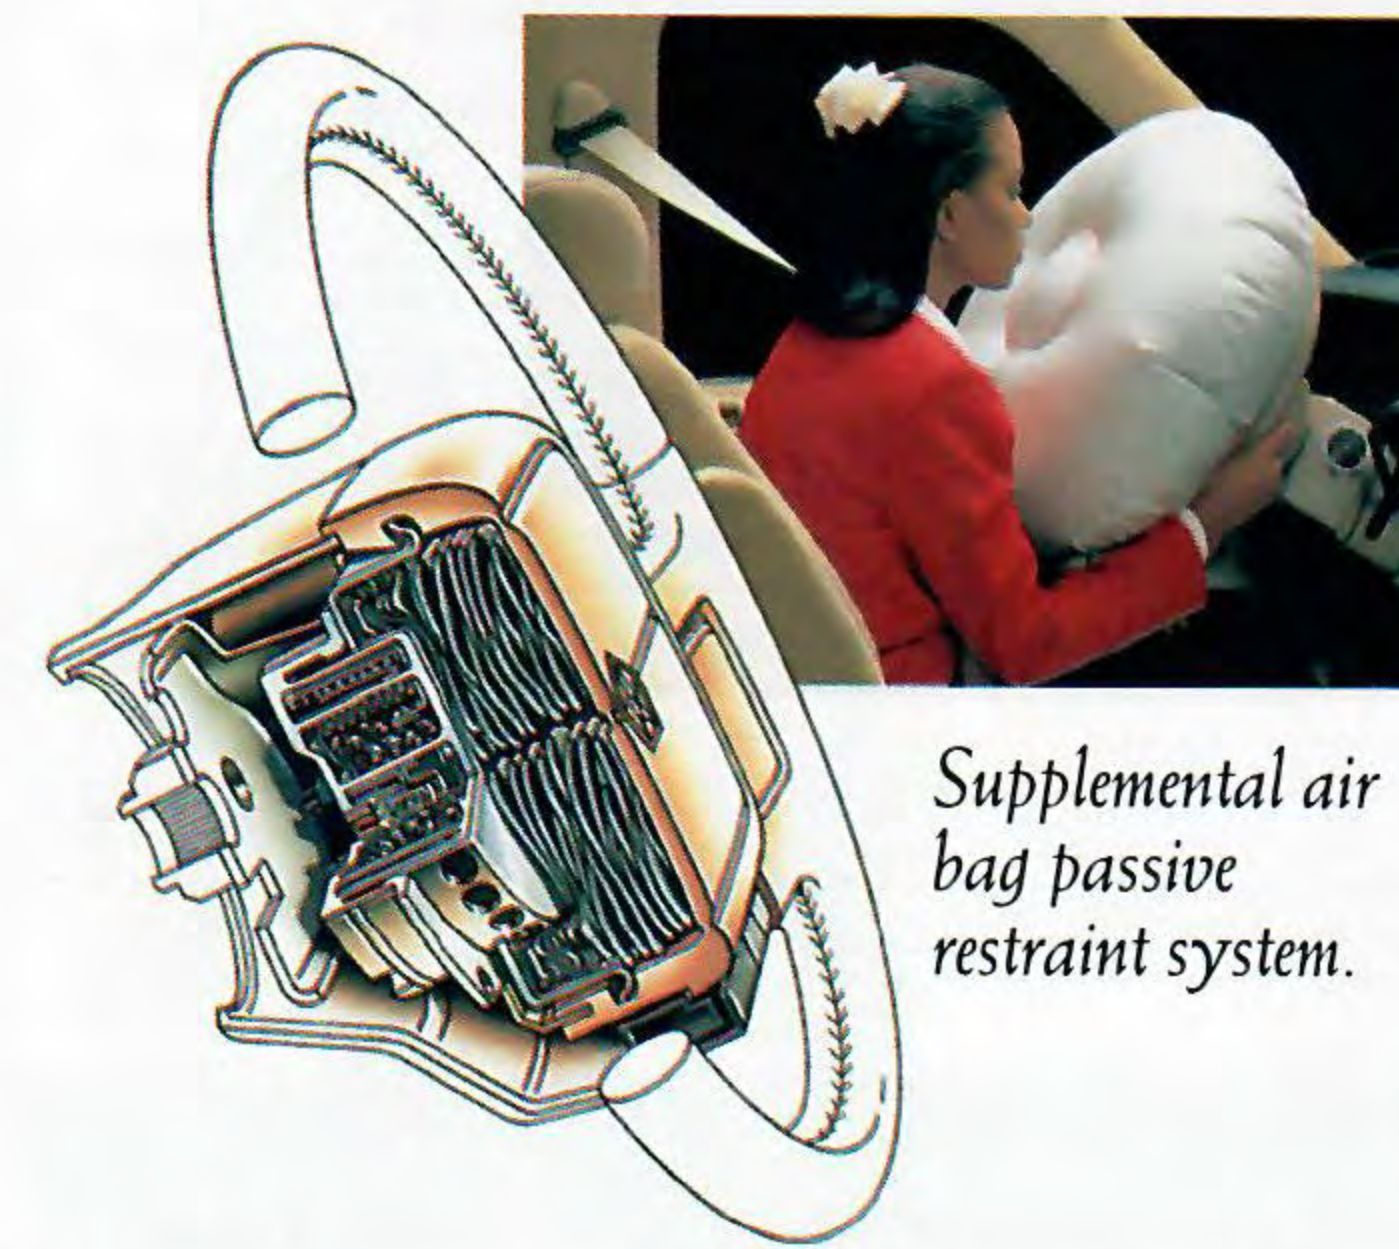

Sundance

QUIET AND SAFE

Road and wind noises are reduced to minimal levels for a quieter ride. The reason? Premium sound insulation in many key areas of the vehicle, and a new molded dash-panel silencer pad, are now standard. For safety, Duster and Sundance offer standard features such as tether anchors

for child-seat restraints, antitheft liftback lock, and a center high-mounted rear stoplight. Plus options like tinted window glass to reduce glare and an electric rear window defroster* for better rearward visibility in inclement weather.

*Required on all passenger vehicles registered in New York State.

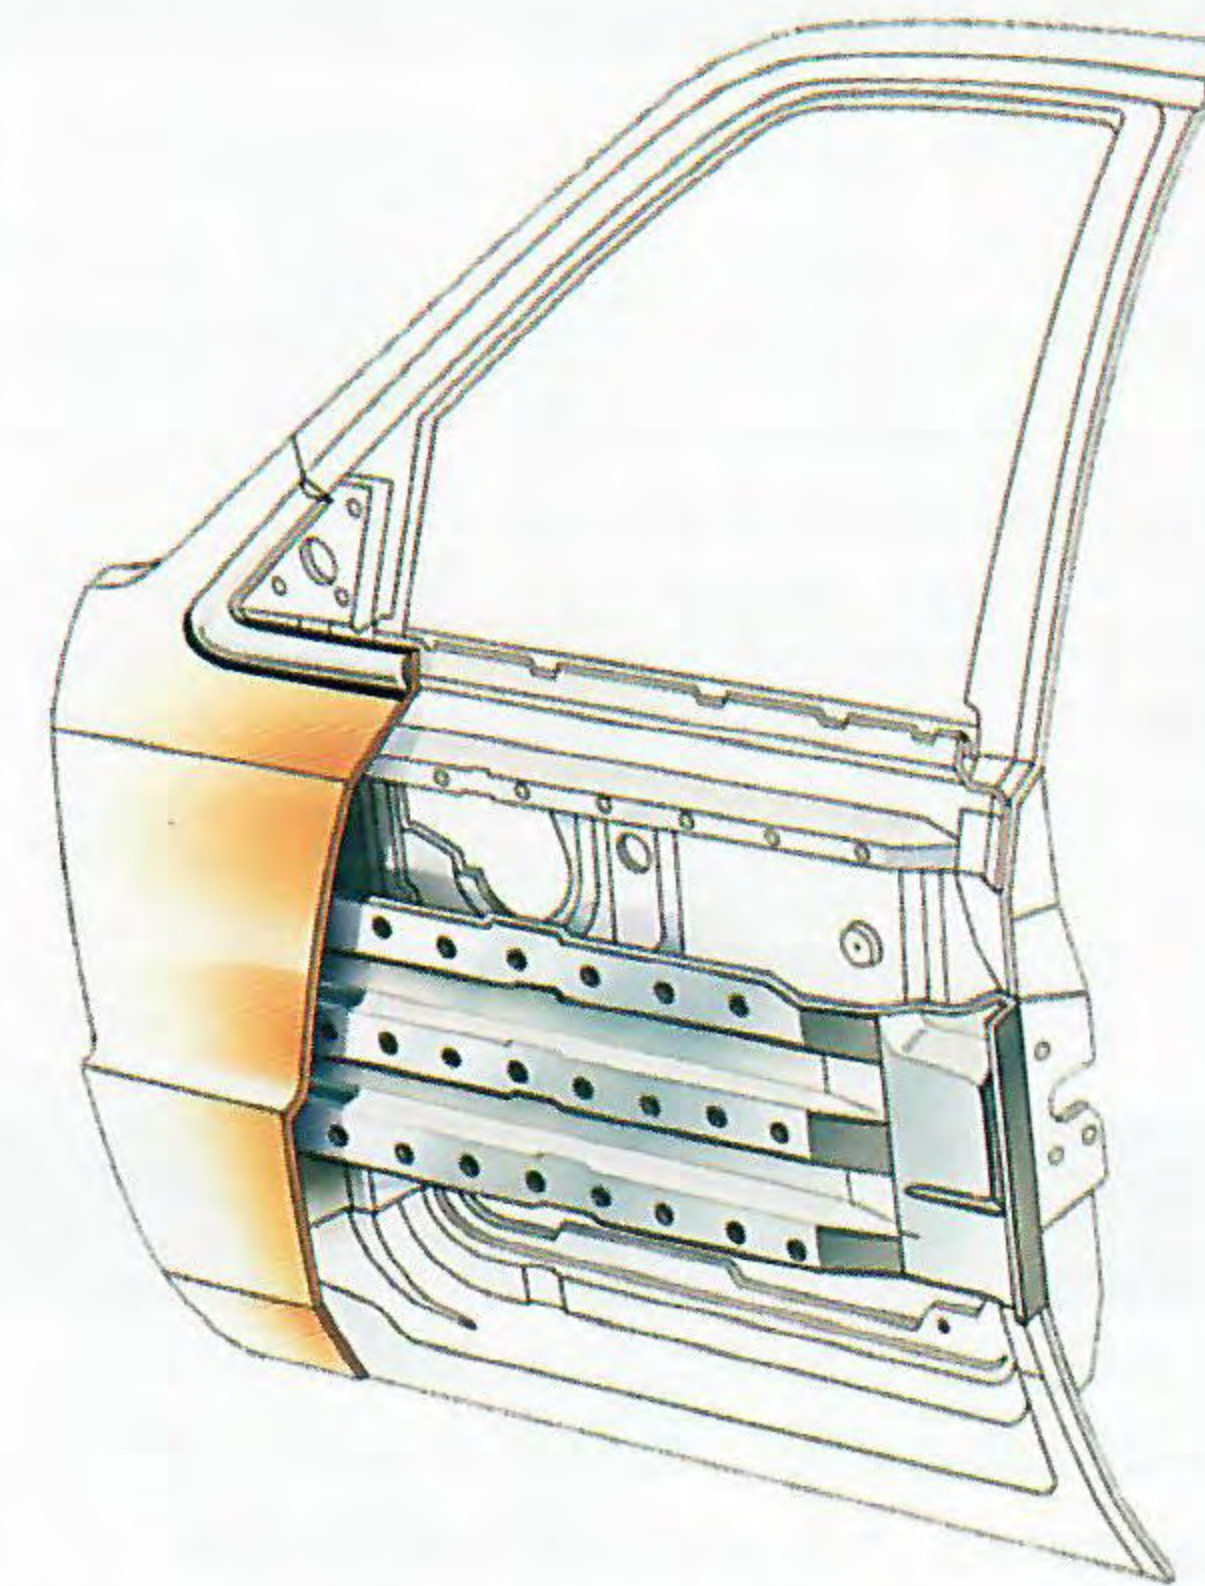

Supplemental air bag passive restraint system.

The air bag module is hidden inside the steering wheel hub. When impact sensors detect a front-end collision requiring air bag deployment, the air bag inflates in 50 milliseconds (about 1/10th of a second) to help protect the driver's head and chest, then partially deflates immediately.

Seat belt-cinching latchplate holds the driver, passengers or a child seat securely in position for maximum safety. Standard on front and rear three-point Unibelt restraint system.

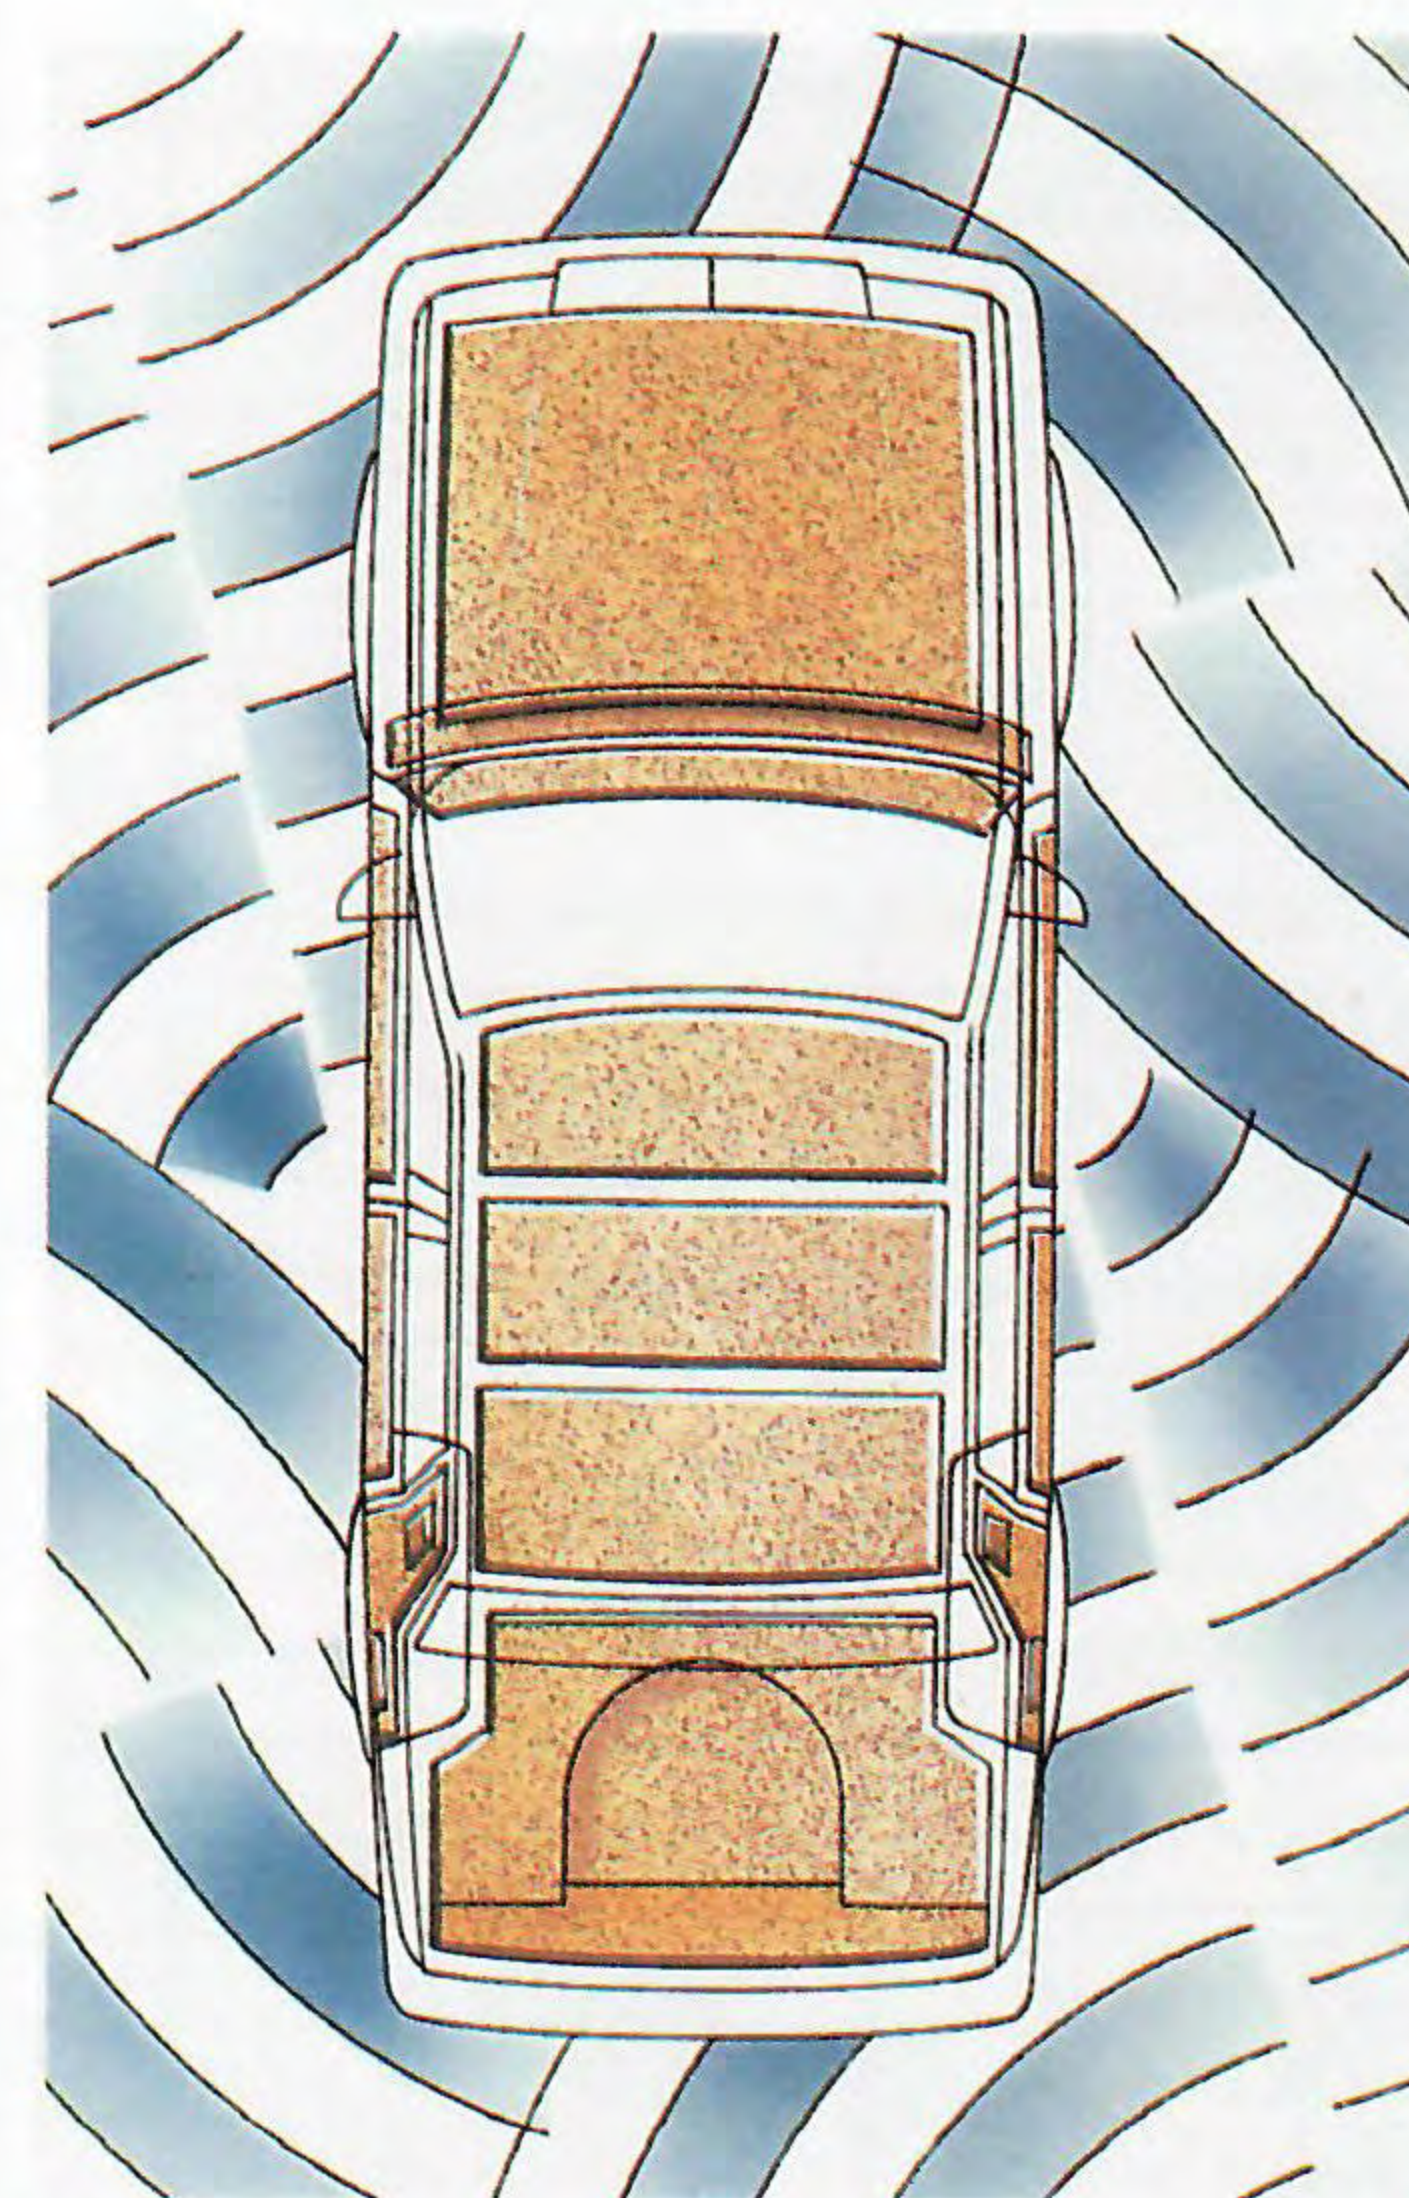

Tough standard steel-beam members add extra protection for occupants on both sides of the car.

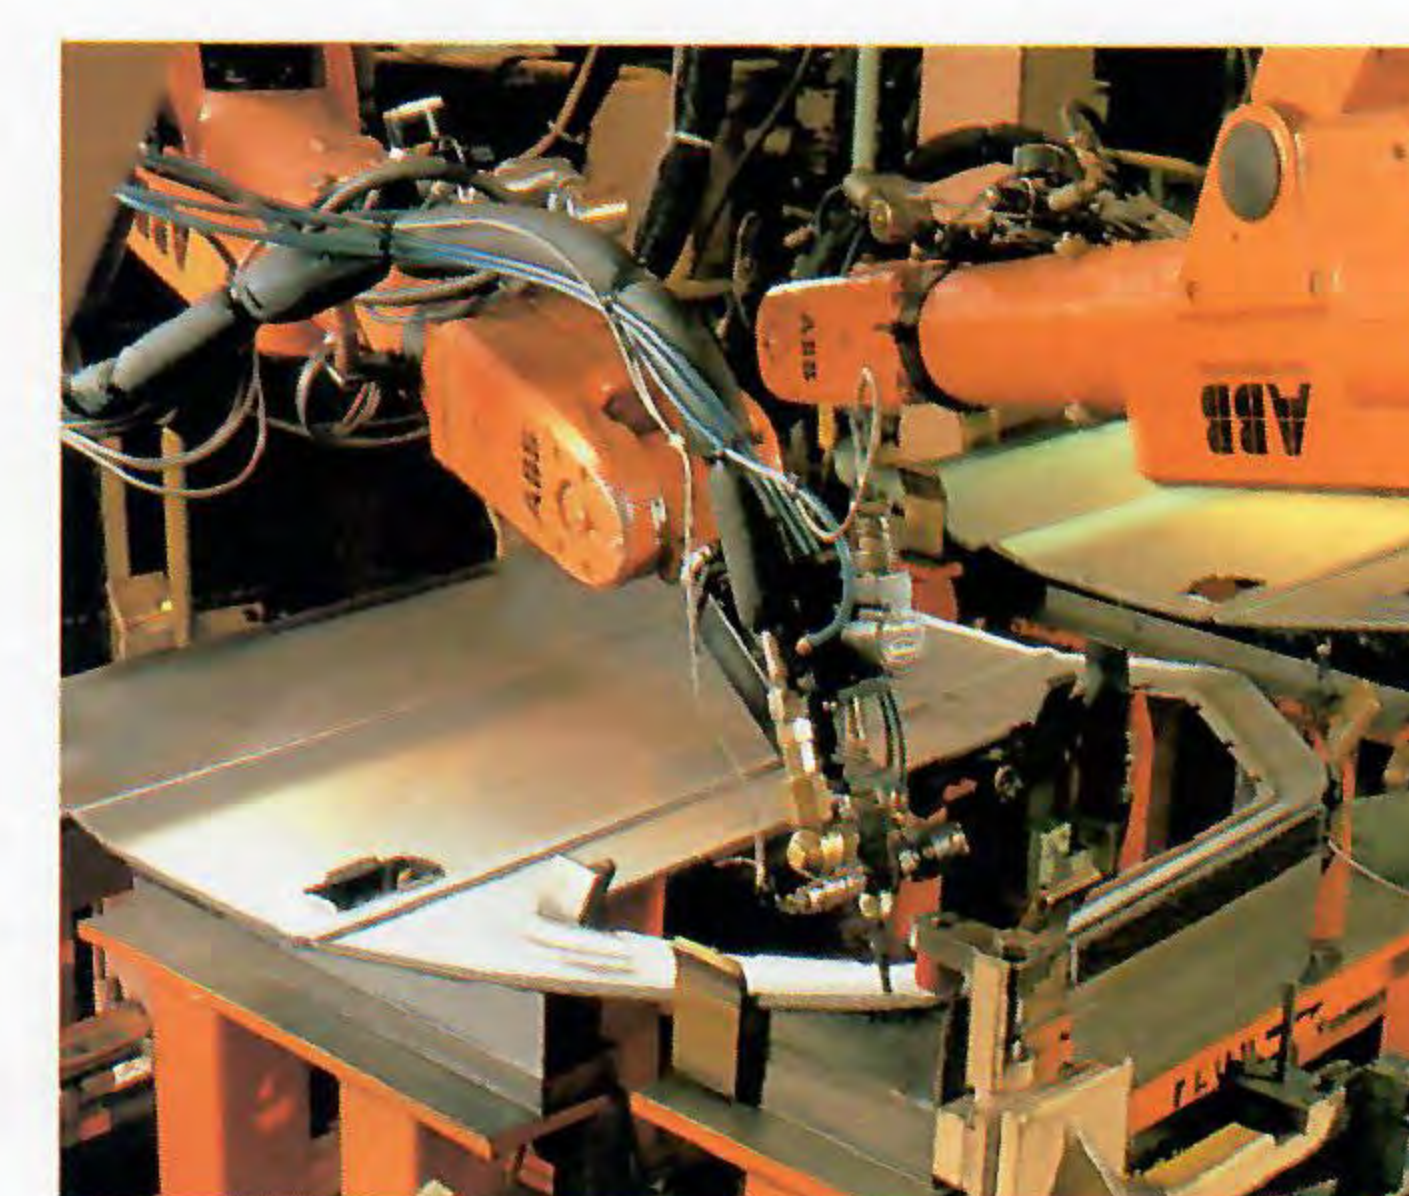

Kinematic occupant computer modeling promotes greater interior safety for drivers and passengers. Engineers study and evaluate the various forces acting upon the human body during a collision, then design vehicle interiors that result in fewer injuries to occupants.

Computer-controlled "shaker" suspension simulator tests the suspension designs of all Plymouth vehicles. This advanced mechanism simulates and evaluates the action of road harshness and vibration on the suspension system and other vehicle components.

Noise and vibration reduction testing is conducted on power train, chassis, body and interior systems by engineers using sophisticated sound-level measuring equipment. Components are scientifically analyzed to achieve ongoing improvements that will ensure the quietest possible ride.

Strong epoxy adhesive material is applied by a robotic machine in a continuous bead that bonds vehicle door frames to their outer skins. Excellent structural strength, superior corrosion resistance, and reduced noise are the benefits.

Mopar's diagnostic service system offers Chrysler-Plymouth dealership customers today's most advanced technical service capability. Technicians use computerized procedures to quickly and accurately service your vehicle.
